This updated edition includes a new afterword by the author, which pays close attention to two key developments in the twenty-first century: the accelerating fragmentation of the mass media and the continuing decline of Americans' confidence in the press. Provocative and often wise. . . . Cook, who has a complex understanding of the relationship between governing and the news, provides a fascinating account of the origins of this complicity.—James Bennet, *Washington Monthly* [*Governing with the News*] addresses central issues of media impact and power in fresh, illuminating ways. . . . Cook mines a wealth of historical and organizational literature to assert that the news media are a distinct political institution in our democratic system.—Robert Schmuhl, *Commonweal*

Lilien, Arvind Rangaswamy, Arnaud De Bruyn, 2013 The 21st century business environment demands more analysis and rigor in marketing decision making. Increasingly, marketing decision making resembles design engineering—putting together concepts, data, analyses, and simulations to learn about the marketplace and to design effective marketing plans. While many view traditional marketing as art and some view it as science, the new marketing increasingly looks like engineering (that is, combining art and science to solve specific problems). Marketing Engineering is the systematic approach to harness data and knowledge to drive effective marketing decision making and implementation through a technology-enabled and model-supported decision process. (For more information on Excel-based models that support these concepts, visit DecisionPro.biz.) We have designed this book primarily for the business school student or marketing manager, who, with minimal background and technical training, must understand and employ the basic tools and models associated with Marketing Engineering. We offer an accessible overview of the most widely used marketing engineering concepts and tools and show how they drive the collection of the right data and information to perform the right analyses to make better marketing plans, better product designs, and better marketing decisions.
