elements of writing allyn bacon: Writing Instruction in Nineteenth-Century American Colleges James A. Berlin, 1984-04-30 Defining a rhetoric as a social invention arising out of a particular time, place, and set of circumstances, Berlin notes that "no rhetoric—not Plato's or Aristotle's or Quintilian's or Perelman's—is permanent." At any given time several rhetorics vie for supremacy, with each attracting adherents representing various views of reality expressed through a rhetoric. Traditionally rhetoric has been seen as based on four interacting elements: "reality, writer or speaker, audience, and language." As emphasis shifts from one element to another, or as the interaction between elements changes, or as the definitions of the elements change, rhetoric changes. This alters prevailing views on such important questions as what is appearance, what is reality. In this interpretive study Berlin classifies the three 19th-century rhetorics as classical, psychological-epistemological, and romantic, a uniquely American development growing out of the transcendental movement. In each case studying the rhetoric provides insight into society and the beliefs of the people.

elements of writing allyn bacon: Content Management George Pullman, Gu Baotung, 2017-03-02 This collection of articles is the first attempt by academics and professional writers to delve into the world of content management systems. In the last few years content management software has become as common as word-processing software was five years ago. But unlike word processors, which are designed for single authorization and local storage, content management systems are designed to accommodate large-scale information production, with many authors providing many different pieces of information kept in a web-accessible database, any piece of which might find its way into electronic documents that the author doesn't even know exist. These software systems are complex, to say the least, and their impact on the field of writing will be immense.
