drum books reddit: The Oxford Handbook of Time in Music Mark Doffman, Emily Payne, Toby Young, 2021-12-17 Music represents one of humanity's most vivid contemplations on the nature of time itself. The ways that music can modify, intensify, and even dismantle our understanding of time's passing is at the foundation of musical experience, and is common to listeners, composers, and performers alike. The *Oxford Handbook of Time in Music* provides a range of compelling new scholarship that examines the making of musical time, its effects and structures. Bringing together philosophical, psychological, and socio-cultural understandings of time in music, the chapters highlight the act of 'making' not just as cultural construction but also in terms of the perceptual, cognitive underpinnings that allow us to 'make' sense of time in music. Thus, the Handbook is a unique synthesis of divergent perspectives on the nature of time in music. With its focus on contemporary music (while paying attention to some of the generative temporalities of the nineteenth century), the volume establishes the richness and complexity of so much current music-making and in the process overcomes historic demarcations between art and popular musics.

drum books reddit: *Principles of Electronic Music Production* Thomas Brett, 2025-11-10 *Principles of Electronic Music Production* offers a comprehensive overview of the fundamental concepts that shape contemporary electronic music production, revealing it as a complex tradition. Over ten chapters richly illustrated with the practices and ideas of innovative musicians past and present, across a range of styles, this book looks at the producer as an omnimusical figure—a composer-performer-engineer who improvises, designs sounds, programs MIDI, sculpts audio, makes beats, shapes arrangements, and balances mixes. The chapters explore the power of serendipities and musical systems, the phenomenology of listening, using minimalism and constraints, the lessons of AI, playing software as a musical instrument, the alchemy of sound design, creating dynamic musical form, and iterating tracks towards quality to answer a perennial production question: how does one make music that sounds alive at many levels at once? Establishing foundations that music production students, professionals, and hobbyists can build on when thinking creatively in their own work, *Principles of Electronic Music Production* is a fascinating insight into the art of electronic musicianship.

Enseñar Historia en la era digital presenta un conjunto de investigaciones hechas por especialistas internacionales que buscan dar respuesta a estas preguntas desde distintos ejes: por un lado, se estudian los debates históricos que se dan entre los usuarios en plataformas como TikTok y Facebook, y también se analizan los discursos históricos que propician los videojuegos.
