educated tara westwood reviews: Summary: Educated - a Memoir by Tara Westover
ExecutiveGrowth Summaries, 2019-07-10 Notice: This is a SUMMARY of Tara Westover's bestseller, *Educated: A Memoir*. *Educated: A Memoir* became a #1 New York Times bestseller for simple reasons... In *Educated: A Memoir*, Dr. Tara Westover recounts her experiences growing up in rural Idaho under the authority of fundamentalist Mormon parents and an abusive older brother. Her father believed public education to be a danger to their way of life and, therefore, Tara did not attend school. Her mother, a self-taught midwife, and herbalist served as the family's source of medical assistance during sickness and even severe injuries. Tara eventually left her mountain home and received a formal education, graduating magna cum laude from Brigham Young University and then earning her Ph.D. from Cambridge University while also winning a Gates Cambridge Scholarship. The process of becoming educated set her on a path that proved unacceptable to her parents and some of her other family members. It was also a path that gave Tara the ability to perceive her entire childhood in a much different light. In that light, she found a truer way of existing. Her story reveals nine principles that are present in many journeys walked by those who seek growth, maturity, truth, and authenticity. This summary and analysis shares those nine principles and the specific instances of Tara's story that revealed them. If you resonate with Tara's journey and the principles therein, we highly advise you to read the full book. Why read ExecutiveGROWTH Summaries: The best-quality summaries on Amazon, guaranteed. educated tara westwood reviews: *Reading the Social in American Studies* Astrid Franke, Stefanie Mueller, Katja Sarkowsky, 2022-03-12 *Reading the Social in American Studies* offers a unique exploration of the advantages and benefits in using sociological terms and concepts in American literary and cultural studies and, conversely, in using literature—understood broadly—to uncover a microlevel of the social. Its temporal scope ranges from the early 19th to the 21st century, providing a historical dimension that is otherwise often missing from studies on the conjunction of literature and sociology. The contributors' approaches include genre reflections as well as close readings, theoretical discussions of crucial sociological terms, and literary observations backed up by empirical sociological studies. The book will familiarize international readers with ideas on the social from both sides of the Atlantic, including scholarship of such figures as John Dewey, Georg Simmel, Norbert Elias, and Pierre Bourdieu.

educated tara westwood reviews: *The Neurodiversity Affirmative Child Autism Assessment Handbook* Dr Maeve Kavanagh, Dr Anna Day, Davida Hartman, Tara O'Donnell-Killen, Jessica K Doyle, 2025-04-21 Based on new and emerging clinical research, this book is here to guide you through creating a neuro-affirmative child autism assessment process for your practice. Moving away from a deficit-based medical approach to child autism assessment (identification), this comprehensive and detailed handbook covers the most up to date research and best practice. Created to encourage and empower clinicians to make a paradigm shift to a more neurodiversity-affirmative approach, this book acknowledges the challenges of working within a system that is inherently deficit based and provides practice points and clinical reflections on how to embed neurodiversity-affirmative principles in their individual practice. This handbook is essential reading for those involved in assessing, as well as for those working with Autistic children more generally. Including helpful tips and methods that can be used during the identification process, this handbook also includes lived experiences of Autistic children and case studies, and perspectives from an OT and SLT, so clinicians can gain a much deeper understanding of the young people they are working with. It also includes guidance for post-identification support and provides a clear roadmap for what happens next.

educated tara westwood reviews: *Making Kids Cleverer* David Didau, 2018-12-20 In 'Making Kids Cleverer: A manifesto for closing the advantage gap', David Didau reignites the nature vs. nurture debate around intelligence and offers research-informed guidance on how teachers can help their students acquire a robust store of knowledge and skills that is both powerful and useful. Foreword by Paul A. Kirschner. Given the choice, who wouldn't want to be cleverer? What teacher wouldn't want this for their students, and what parent wouldn't wish it for their children? When David started researching this book, he thought the answers to the above were obvious. But it turns out that the very idea of measuring and increasing children's intelligence makes many people extremely uncomfortable: If some people were more intelligent, where would that leave those of us who weren't? The question of whether or not we can get cleverer is a crucial one. If you believe that intelligence is hereditary and environmental effects are trivial, you may be sceptical. But environment does matter, and it matters most for children from the most socially disadvantaged backgrounds those who not only have the most to gain, but who are also the ones most likely to gain

from our efforts to make all kids cleverer. And one thing we can be fairly sure will raise children's intelligence is sending them to school. In this wide-ranging enquiry into psychology, sociology, philosophy and cognitive science, David argues that with greater access to culturally accumulated information taught explicitly within a knowledge-rich curriculum children are more likely to become cleverer, to think more critically and, subsequently, to live happier, healthier and more secure lives.;Furthermore, by sharing valuable insights into what children truly need to learn during their formative school years, he sets out the numerous practical ways in which policy makers and school leaders can make better choices about organising schools, and how teachers can communicate the knowledge that will make the most difference to young people as effectively and efficiently as possible. David underpins his discussion with an exploration of the evolutionary basis for learning and also untangles the forms of practice teachers should be engaging their students in to ensure that they are acquiring expertise, not just consolidating mistakes and misconceptions. There are so many competing suggestions as to how we should improve education that knowing how to act can seem an impossible challenge. Once you have absorbed the arguments in this book, however, David hopes you will find the simple question that he asks himself whenever he encounters new ideas and initiatives Will this make children cleverer? as useful as he does.;Suitable for teachers, school leaders, policy makers and anyone involved in education

This book explores the multifaceted experiences of British Turks, particularly focusing on how they navigate and negotiate Islamophobia in contemporary British society. It delves into the complexities of identity, ethnicity, and religion, shedding light on the unique ways in which British Turks respond to and reshape the discourses surrounding Islamophobia. By examining the intersection of Turkish secularism, national identity, and global socio-political dynamics, this book offers a nuanced understanding of how Islamophobia is both experienced and deflected within this community. Through a combination of in-depth interviews, ethnographic insights, and analysis of social discourses, the book highlights how British Turks engage in practices of passing and identity negotiation. It uncovers how these strategies are informed by broader themes such as Brexit, cosmopolitanism, and the legacy of Turkey's relationship with Europe.
