edgenuity help: *Algorithmic Rights and Protections for Children* Mizuko Ito, Remy Cross, Karthik Dinakar, Candice Odgers, 2023-06-27 Essays on the challenges and risks of designing algorithms and platforms for children, with an emphasis on algorithmic justice, learning, and equity. One in three Internet users worldwide is a child, and what children see and experience online is increasingly shaped by algorithms. Though children's rights and protections are at the center of debates on digital privacy, safety, and Internet governance, the dominant online platforms have not been constructed with the needs and interests of children in mind. The editors of this volume, Mizuko Ito, Remy Cross, Karthik Dinakar, and Candice Odgers, focus on understanding diverse children's evolving relationships with algorithms, digital data, and platforms and offer guidance on how stakeholders can shape these relationships in ways that support children's agency and protect them from harm. This book includes essays reporting original research on educational programs in AI relational robots and Scratch programming, on children's views on digital privacy and artificial intelligence, and on discourses around educational technologies. Shorter opinion pieces add the perspectives of an instructional designer, a social worker, and parents. The contributing social, behavioral, and computer scientists represent perspectives and contexts that span education,

commercial tech platforms, and home settings. They analyze problems and offer solutions that elevate the voices and agency of parents and children. Their essays also build on recent research examining how social media, digital games, and learning technologies reflect and reinforce unequal childhoods. edgenuity help: Diverse Students, Diverse Outcomes Frank S. Kelly, 2022-08-16 In recent decades, the populations in major urban areas across the country have become increasingly diverse in terms of their ethnicities, languages, and economics, and within these evolving contexts many of our schools have struggled to produce good learning results for substantial numbers of their students. Our schools have tried to be fair to all they serve by using similar instructional methods, materials, and technology, and comparable schedules, facilities, and funding, but the outcomes realized for many students are seriously worrisome in terms of their abilities to succeed in our economy in the future. The Covid-19 pandemic further exacerbated this problem. *Diverse Students, Diverse Outcomes: Portal Schools for Access to Diverse Teaching and Learning* proposes ways to preserve our enormous staff and facility investments in order to provide schooling that will help different students learn in different ways and in the process make education much more attractive and engaging for all concerned—and thereby more economical. The concepts outlined are enriched by perspectives of other building types and supplemented with brief descriptions of twenty-eight schools created over the last fifty years that have been very successful—yet from which we seem to have learned little.

edgenuity help: An Answer to Disenfranchised Students Sharon D. Jones Deloach, 2016-09-01 Many school districts across this great nation are facing serious patterns of underachievement of students who do not fit well in a mainstream educational environment. The purpose of this qualitative phenomenological research study was to explore the perceptions and experiences of graduates from a credit-recovery nontraditional alternative high school that influenced his or her graduation. Nationally, many high school students are not earning sufficient credits to remain on grade level with their freshman level cohort. These at-risk students need options with stronger incentives to obtain high school credits and meet graduation requirements. Credit-recovery nontraditional alternative high schools involve an at-risk student population who are at a greater risk of academic, social, and emotional struggles. These students benefit from additional support that a nontraditional setting offers. This study involved interviewing 12 high school graduates who attended and graduated from a credit-recovery nontraditional alternative high school. There was a diversified group by age and other demographics representing five graduating classes. With this

research study, the investigator determined graduates' perceptions of credit recovery in their nontraditional alternative high school were overwhelmingly positive. The lived experiences explored in this study may help school leaders, policy makers, teachers, staff, parents, and community partners understand the unique needs of this population.

edgenuity help: Trust, Organizations and the Digital Economy Joanna Paliszkievicz, Kuanchin Chen, 2021-09-27 Trust is a pervasive catalyst of human and business relationships that has inspired interest in researchers and practitioners alike. It has been shown to enhance engagement, communication, organizational performance, and online activities. Despite its role to cultivate cooperation, knowledge-sharing, and innovation, trust through digital means or even trust in digital media has presented new opportunities and challenges in society. Examples include a wider and faster dissemination of trust-influencing messages, and richer options of digital cues that engage, disrupt, or even transform how trust is formulated. Despite that, trust helps people to live through risky and uncertain situations, and the many capabilities enabled on the digital platforms have made

the formation and sustaining of trust very different compared to traditional means. Trust in today's digital environment plays an important role and is intertwined with concepts including reliability, quality, and privacy. This book aims to bring together the theory and practice of trust in the new digital era and will present theoretical and practical foundations. Trust is not given; we must work to build it, but it is a very fragile and intangible asset once built. It is easy to destroy and challenging to rebuild. Researchers, academics, and students in the fields of management, responsibility, and business ethics will gain knowledge on trust and related concepts, learn about the theoretical underpinnings of trust and how it sustains itself through digital dissemination, and explore empirically validated practice regarding trust and its related concepts.

edgenuity help: LGBTQIA+ Inclusive Children's Librarianship Lucy Santos Green, Jenna Spiering, Vanessa Lynn Kitzie, Julia Erlanger, 2022-05-16 This book breaks new ground, offering school and public librarians serving children in grades K-8 a roadmap for implementing and upholding queer-inclusive programs, policies, and services. School and public librarians are serving ever greater numbers of LGBTQIA+ children and families. Transgender children may begin to express a strong sense of gender identity as early as 2-3 years of age. Children are also identifying as gay much sooner than earlier generations-often between the ages of 7 and 12. Additionally, more children than ever before are living with LGBTQIA+ caregivers. In seeking to make our programs and services inclusive and equitable for these growing populations, librarians may court controversy and face community backlash from patrons who feel queer-inclusive content is inappropriate for young children. This book codifies a set of best practices for librarians as they rise to this challenge, defining queer-inclusive programs, identifying potential barriers to implementation, and offering strategies and resources to overcome them.
