financial independence website: Montenegro International Monetary Fund. Monetary and Capital Markets Department, 2025-04-04 The transparency of the Central Bank of Montenegro (CBCG)'s legal framework, its mandate, autonomy, and decision-making arrangements have all been strengthened over time, but further improvements are recommended. The most important room for

improvement is for the CBCG's website to clearly explain that Montenegro's unilateral euroization limits the scope for an independent monetary policy and for the provision of ELA. That should be aligned with an enhanced policy strategy, which should explain its operational framework and toolkit, helping the public understand how policies are formulated and what to expect. In addition, it should ensure timely publication of all its opinions on draft laws concerning the financial sector. The discussion on the website of the CBCG's existing functional autonomy could stress that the CBCG can perform its mandate without prior approval needed from the Government. Finally, the CBCG's transparency could be enhanced by clarifying the function of the Governor's Collegium and by publishing the general act establishing the remuneration of the Governor, Vice-Governors, and Council members on its website, along with existing links to their incomes and assets, which is already available in the Anti-Corruption Agency website.

financial independence website: *Organizing Independence* Raviola, Elena, 2022-02-04 This revealing book goes behind the scenes of normative principles of media independence to investigate how that independence is actually practiced and realized in everyday working life. Taking an ethnographically rich journey through European news organizations, Elena Raviola exposes the diverse and complex ways in which the ideal of independence is upheld, and at the same time inevitably betrayed, in the organizational life of media companies. Elena Raviola presents a distinct organizational analysis of media independence throughout the book, offering a close study of three news organizations in Europe - the largest Italian financial newspaper *Il Sole-24 Ore*, the largest Swedish regional newspaper company *Stampen* and the French pioneer online-only news website *Rue89*. In each of them, the implications of digitalization on their practices of independence is explored and analyzed. The book ultimately sheds light on how digital technologies are practically reshaping democratic principles such as media independence, while being embedded in the existing organizational and professional structures of democratic societies. *Organizing Independence* will enrich the reader's understanding of media independence in practice, beyond the normative principles, and so will be a key reference point for researchers in management and organization studies, media studies and anyone interested in the future of media--
