glenda cleveland death: *The Movies of Racial Childhoods* Celine Parreñas Shimizu, 2023-12-08 In *The Movies of Racial Childhoods* Celine Parreñas Shimizu examines early twenty-first-century cinematic representations of Asian and Asian American children. Drawing on psychoanalysis and her own perspective as a mother grieving for a deceased child, Shimizu considers how cinema renders Asian American children through sexualized racial difference, infantilization, and premature adultification. She looks at how Asian American childhood is characterized in film through experiences of alienation and trauma and contends that childhood development requires finding freedom and self-sovereignty through agentic attunement. In analyzing films that focus on queer Asian American youth such as *Spa Night* (2016) and *Driveways* (2019) and those that explore the trauma of being an immigrant like *Yellow Rose* (2019) and *The Half of It* (2020), Shimizu demonstrates that films can prompt viewers to evaluate their own childhood development. They also allow the opportunity to understand the demands placed upon Asian American children, particularly in regard to race and sexuality. In this way, cinema becomes a vehicle for empowering our inner child and the children all around us.

glenda cleveland death: *Love to Hate* Jody Roy, 2002-08-27 Why? is the simple, impulsive

question we ask when confronted by horrible acts of hatred and violence. Why do students shoot fellow students or employees their coworkers? Why do mothers drown their children or husbands stalk and kill their wives? Love to Hate challenges us to turn this question upon ourselves at a deeper level. Why, as a culture, are we so fascinated by these acts? Why do we bestow celebrity on the perpetrators, while allowing the victims to fade into a second death of obscurity? Are we, as Pope John Paul II famously accused, a culture of death? And if so, how can we break free of this unacknowledged aspect of the cycle of violence? Unlike those who point solely to media imagery, splintered families, or lax gun control laws in search of the roots of America's endemic violence, Jody M. Roy suggests that we all must be held responsible. She argues that we reveal our love affair with hatred and violence in the ways we think and speak in our daily lives and in our popular culture. The very words we use function as building blocks of callousness and contempt, betraying our immersion in subtexts of violence and hatred. These subtexts are further revealed in our complex attitudes toward street gangs, school shooters, serial killers, and hate groups and the paroxysms of violence they unleash. As spectators, driven by our impulse to watch, we become an integral part of the equation of violence. In the book's final section, *Freeing Ourselves of Our Obsession with Hatred and Violence*, Roy offers practical steps we can take—as parents, consumers, and voters—to free ourselves from linguistic and cultural complicity and to help create in America a culture of life.

glenda cleveland death: *Murder in New Orleans* Jeffrey S. Adler, 2019-08-02 New Orleans in the 1920s and 1930s was a deadly place. In 1925, the city's homicide rate was six times that of New York City and twelve times that of Boston. Jeffrey S. Adler has explored every homicide recorded in New Orleans between 1925 and 1940—over two thousand in all—scouring police and autopsy reports, old interviews, and crumbling newspapers. More than simply quantifying these cases, Adler places them in larger contexts—legal, political, cultural, and demographic—and emerges with a tale of racism, urban violence, and vicious policing that has startling relevance for today. *Murder in New Orleans* shows that whites were convicted of homicide at far higher rates than blacks leading up to the mid-1920s. But by the end of the following decade, this pattern had reversed completely, despite an overall drop in municipal crime rates. The injustice of this sharp rise in arrests was compounded by increasingly brutal treatment of black subjects by the New Orleans police department. Adler explores other counterintuitive trends in violence, particularly how murder soared during the flush times of the Roaring Twenties, how it plummeted during the Great Depression, and how the vicious response to African American crime occurred even as such violence plunged in frequency—revealing that the city's cycle of racial policing and punishment was connected less to actual patterns of wrongdoing than to the national enshrinement of Jim Crow. Rather than some hyperviolent outlier, this Louisiana city was a harbinger of the endemic racism at the center of today's criminal justice state. *Murder in New Orleans* lays bare how decades-old crimes, and the racially motivated cruelty of the official response, have baleful resonance in the age of Black Lives Matter.

glenda cleveland death: *The Life and Death of States* Natasha Wheatley, 2025-12-02 An intellectual history of sovereignty that reveals how the Habsburg Empire became a crucible for our contemporary world order Sprawled across the heartlands of Europe, the Habsburg Empire resisted all the standard theories of singular sovereignty. The 1848 revolutions sparked decades of heady constitutional experimentation that pushed the very concept of "the state" to its limits. This intricate multinational polity became a hothouse for public law and legal philosophy and spawned ideas that still shape our understanding of the sovereign state today. *The Life and Death of States* traces the history of sovereignty over one hundred tumultuous years, explaining how a regime of nation-states theoretically equal under international law emerged from the ashes of a dynastic empire. Natasha Wheatley shows how a new sort of experimentation began when the First World War brought the Habsburg Empire crashing down: the making of new states. Habsburg lands then became a laboratory for postimperial sovereignty and a new international order, and the results would echo

through global debates about decolonization for decades to come. Wheatley explores how the Central European experience opens a unique perspective on a pivotal legal fiction—the supposed juridical immortality of states. A sweeping work of intellectual history, *The Life and Death of States* offers a penetrating and original analysis of the relationship between sovereignty and time, illustrating how the many deaths and precarious lives of the region's states expose the tension between the law's need for continuity and history's volatility.

glenda cleveland death: *Descendants of William Cromartie and Ruhamah Doane* Amanda Cook Gilbert, 2013 This ambitious work chronicles 250 years of the Cromartie family genealogical history. Included in the index of nearly fifty thousand names are the current generations, and all of those preceding, which trace ancestry to our family patriarch, William Cromartie, who was born in 1731 in Orkney, Scotland, and his second wife, Ruhamah Doane, who was born in 1745. Arriving in America in 1758, William Cromartie settled and developed a plantation on South River, a tributary of the Cape Fear near Wilmington, North Carolina. On April 2, 1766, William married Ruhamah Doane, a fifth-generation descendant of a Mayflower passenger to Plymouth, Stephen Hopkins. If Cromartie is your last name or that of one of your blood relatives, it is almost certain that you can trace your ancestry to one of the thirteen children of William Cromartie, his first wife, and Ruhamah Doane, who became the founding ancestors of our Cromartie family in America: William Jr., James, Thankful, Elizabeth, Hannah Ruhamah, Alexander, John, Margaret Nancy, Mary, Catherine, Jean, Peter Patrick, and Ann E. Cromartie. These four volumes hold an account of the descent of each of these first-generation Cromarties in America, including personal anecdotes, photographs, copies of family bibles, wills, and other historical documents. Their pages hold a personal record of our ancestors and where you belong in the Cromartie family tree.

Some achieved great success in film and other areas of show business, but others failed to get the breaks or became victims of the studio system's sometimes unpleasant brand of politics. The personal and professional obstacles that each actress encountered are here set out in detail, often with comments from the actresses who granted interviews with the author and from those people who knew them best on and off the movie set. A filmography is included for each of the fifteen.

glenda cleveland death: *Sexual Predators* Robert A. Prentky, Howard E. Barbaree, Eric S. Janus, 2015-06-26 Convicted sex offenders released from custody at the end of their criminal sentences pose a risk for re-offense. In many US states, Sexually Violent Predator (SVP) laws have been enacted that allow for the post-prison preventive detention of high risk sex offenders. SVP laws require the courts to make dispositions that protect the public from harm while at the same time respecting the civil rights of the offender. This book describes these SVP laws, their constitutionality, and aspects of their operation. Courts hear expert risk testimony based heavily on the results of actuarial risk assessment. Problems associated with this testimony include the lack of a theory of recidivism risk, bias due to human decision-making, and the insularity of scholarship and practice along developmental lines. The authors propose changes in legal standards, as well as a unified developmental model that treats sexual violence as an evolving condition, with roots traceable to childhood and paths that extend into adolescence and adulthood.
