george hickey wikipedia: Heroes, Rascals, and the Law James L. Robertson, 2018-12-28 James L. Robertson focuses on folk encountering their constitutions and laws, in their courthouses and country stores, and in their daily lives, animating otherwise dry and inaccessible parchments. Robertson begins at statehood and continues through war and depression, well into the 1940s. He tells of slaves petitioning for freedom, populist sentiments fueling abnegation of the rule of law, the state's many schemes for enticing Yankee capital to lift a people from poverty, and its sometimes tragic, always colorful romance with whiskey after the demise of national Prohibition. Each story is sprinkled with fascinating but heretofore unearthed facts and circumstances. Robertson delves into the prejudices and practices of the times, local landscapes, and daily life and its dependence on our social compact. He offers the unique perspective of a judge, lawyer, scholar, and history buff, each role having tempered the lessons of the others. He focuses on a people, enriching encounters most know little about. Tales of understanding and humanity covering 130 years of heroes, rascals, and ordinary folk—with a bundle of engaging surprises—leave the reader pretty sure there's nothing quite like Mississippi history told by a sage observer.

george hickey wikipedia: Surviving the 21st Century Julian Cribb, 2016-09-20 The book explores the central question facing humanity today: how can we best survive the ten great existential challenges that are now coming together to confront us? Besides describing these challenges from the latest scientific perspectives, it also outlines and integrates the solutions, both at global and individual level and concludes optimistically. This book brings together in one easy-to-read work the principal issues facing humanity. It is written for the two next generations who will have to deal with the compounding risks they inherit, and which flow from overpopulation, resource pressures and human nature. The author examines ten intersecting areas of activity (mass extinction, resource depletion, WMD, climate change, universal toxicity, food crises, population and urban expansion, pandemic disease, dangerous new technologies and self-delusion) which pose manifest risks to civilization and, potentially, to our species' long-term future. This isn't a book just about problems. It is also about solutions. Every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level —but it also empowers individuals with what they can do for themselves to make a difference. Unlike other books, it offers integrated solutions across the areas of greatest risk. It explains why Homo sapiens is no longer an appropriate name for our species, and what should be done about it.

george hickey wikipedia: Corrections and Collections Joe Day, 2013-08-21 America holds more than two million inmates in its prisons and jails, and hosts more than two million daily visits to museums, figures which represent a ten-fold increase in the last twenty-five years. Corrections and Collections explores and connects these two massive expansions in our built environment. Author Joe Day shows how institutions of discipline and exhibition have replaced malls and office towers as the anchor tenants of U.S. cities. Prisons and museums, though diametrically opposed in terms of public engagement, class representation, and civic pride, are complementary structures, employing related spatial and visual tactics to secure and array problematic citizens or priceless treasures. Our recent demand for museums and prisons has encouraged architects to be innovative with their design, and experimental with their scale and distribution through our cities. Contemporary museums are the petri dishes of advanced architectural speculation; prisons remain the staging grounds for every new technology of constraint and oversight. Now that criminal and creative transgression are America's defining civic priorities, Corrections and Collections will recalibrate your assumptions about art, architecture, and urban design.
