future of america secret: The Future of War Lawrence Freedman, 2017-10-10 An award-winning military historian, professor, and political adviser delivers the definitive story of warfare in all its guises and applications, showing what has driven and continues to drive this uniquely human form of political violence. Questions about the future of war are a regular feature of political debate, strategic analysis, and popular fiction. Where should we look for new dangers? What cunning plans might an aggressor have in mind? What are the best forms of defense? How might peace be preserved or conflict resolved? From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan, Lawrence Freedman, a world-renowned military thinker, reveals how most claims from the military futurists are wrong. But they remain influential nonetheless. Freedman shows how those who have imagined future war have often had an idealized notion of it as confined, brief, and decisive, and have regularly taken insufficient account of the possibility of long wars-hence the stubborn persistence of the idea of a knockout blow, whether through a dashing land offensive, nuclear first strike, or cyberattack. He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s, and how the boundaries between peace and war, between the military, the civilian, and

the criminal are becoming increasingly blurred. Freedman's account of a century and a half of warfare and the (often misconceived) thinking that precedes war is a challenge to hawks and doves alike, and puts current strategic thinking into a bracing historical perspective.

future of america secret: Creating America's Future James T. Ziegenfuss, 2008 American citizens assume that the future for this country will be a future much like the past-beautiful in many respects. This optimistic view is now countered by those who see a country in decay, struggling to address problems in health care, education, the environment, international affairs, and other sectors. This book calls on citizens and their leaders to build the future they most desire. The future should not happen to citizens but instead be created by citizens. In part one, this book examines the reasons for future building and the processes for doing so through interactive public sector-private sector dialogue and by applying methods of continuous improvement, reengineering, and visioning. In part two, Ziegenfuss presents scenarios of America's future that include the country's points of decay, trends, vision, and strategies in each of the parts of America, meaning energy, health care, transportation, business, housing and urban development, education, arts and entertainment, science, environment, agriculture, international affairs and defense, and law and justice. Public and private citizens, especially students, teachers, and planners are encouraged to lead the debates with hope and vision, defining the future they most desire. Book jacket.

future of america secret: *The Future of Warfare in the 21st Century* The Emirates Center for Strategic Studies and Research, 2014-10-15 Concepts and theories of war-fighting have evolved radically over the past twenty years, resulting in equally radical changes in military doctrine. Emergent non-conventional security threats have led to a proliferation of asymmetric conflicts, while new modes of virtual warfare have developed in the realms of cyberspace. The ECSSR 18th Annual Conference, *The Future of Warfare in the 21st Century*, held at the Center on April 9-10, 2013 in Abu Dhabi, and the resultant papers contained in this volume, explore how warfare may be affected by technological, strategic and civil developments in the coming years, particularly the revolutionary use of remote and autonomous systems on the modern battlefield, the budding application of cyber attack and defense strategies, and the future direction of intelligence operations in the 21st century. The authors also discuss political and civil influences on the future of warfare, particularly in terms of the evolving state of civil-military relations; the growing employment of contractors in contemporary conflicts; and the complex evolving relationship between defense industries and military establishments.

future of america secret: *The Arms of the Future* Jack Watling, 2023-09-07 From sensor-fuzed munitions and autonomous weapons, to ground moving target indication radar, laser vibrometers and artificial intelligence, the weapons of warfare are undergoing a rapid transformation, with modern technologies reshaping how armies intend to fight in the twenty-first century. *The Arms of the Future* analyses how the emergence of novel weapons systems is shaping the risks and opportunities on the battlefield. Drawing on extensive practical observation and experimentation, the book unpacks the operational challenges new weapons pose on the battlefield and how armies might be structured to overcome them. At a time when defence spending across NATO is on the rise, and conflict with Russia raises new questions of what it means to fight a truly 'modern' war, Watling examines not just the arms to be employed but how they can be fielded and wielded to survive and prevail in future wars.

future of america secret: The Future Is Asian Parag Khanna, 2019-02-05 In the 19th century, the world was Europeanized. In the 20th century, it was Americanized. Now, in the 21st century, the world is being Asianized. The "Asian Century" is even bigger than you think. Far greater than just

China, the new Asian system taking shape is a multi-civilizational order spanning Saudi Arabia to Japan, Russia to Australia, Turkey to Indonesia—linking five billion people through trade, finance, infrastructure, and diplomatic networks that together represent 40 percent of global GDP. China has taken a lead in building the new Silk Roads across Asia, but it will not lead it alone. Rather, Asia is rapidly returning to the centuries-old patterns of commerce, conflict, and cultural exchange that thrived long before European colonialism and American dominance. Asians will determine their own future—and as they collectively assert their interests around the world, they will determine ours as well. There is no more important region of the world for us to better understand than Asia – and thus we cannot afford to keep getting Asia so wrong. Asia’s complexity has led to common misdiagnoses: Western thinking on Asia conflates the entire region with China, predicts imminent World War III around every corner, and regularly forecasts debt-driven collapse for the region’s major economies. But in reality, the region is experiencing a confident new wave of growth led by younger societies from India to the Philippines, nationalist leaders have put aside territorial disputes in favor of integration, and today’s infrastructure investments are the platform for the next generation of digital innovation. If the nineteenth century featured the Europeanization of the world, and the twentieth century its Americanization, then the twenty-first century is the time of Asianization. From investment portfolios and trade wars to Hollywood movies and university admissions, no aspect of life is immune from Asianization. With America’s tech sector dependent on Asian talent and politicians praising Asia’s glittering cities and efficient governments, Asia is permanently in our nation’s consciousness. We know this will be the Asian century. Now we finally have an accurate picture of what it will look like.

future of america secret: Histories of the Future Susan Harding, Daniel Rosenberg, 2005-07-21 An anthropologically based interdisciplinary collection on sites and projections of imagined futures from conspiracy theorists to technological dystopias.

future of america secret: Stealing America's Future William Steiner, 2010-04 Stealing America's Future makes a comparison of today's America to late 19th Century Europe using two rare books, *The Conventional Lies of our Civilization* by Nordau, describing Europe's elitist leadership, and *The Soviets at Work* by Lenin, outlining the Russian Revolution as it took place. Not a part of the discussion of history, both provide frightening detail about the nuances of the geopolitics of Europe, circa 1900, that relate to today's America. Using heartwarming family stories, humorous anecdotes, incisive criticism, and cold factual analysis, it describes how progressive liberalism, with its attempts at social engineering and excessive permissiveness, has brought social and economic disaster to America. David Letterman relating to Sarah Palin I fear he sees her as more man than he will ever be and more woman than he will ever get. Bill Maher relating to Michelle Obama ...my only conclusion about Maher is that he is just another angry little bully who is fearful of powerful women... Is it time to separate the North American Continent into a federation of smaller component nations better reflecting the economics and ethos of these individual component nations, yet having our common defense as the only connection or do we need to get back to the Constitution our founders gave to us? Raised in a poor farm family in Pawnee County, Nebraska, Dr. Steiner had the ethics of hard work and family values as his primary guide post to succeed. Working his way through college and graduating from the University of Nebraska in 1973, he located his dental practice in an economically impacted area of Omaha, Nebraska where he also worked in a public health clinic, developing insights with regard to what motivates people. He is a pilot and an accomplished martial artist, attaining several black belts. He was featured in a Sun-Up Interview by the Omaha World Herald's, Robert McMorris, and was also featured in an interview by William Rush in the League of Human Dignity paper, where Sensei Steiner outlined his martial arts training strategies for handicapped persons. He was called by Charles Kuralt to panel a discussion of the Gulf Crisis for CBS News before the Gulf War.

future of america secret: Immigration In America's Future David Heer, 2018-03-05 Immigration policy is one of the most contentious issues facing the United States today. The bitter national debate over California's Proposition 187, the influx of Cuban refugees into Miami, and the

continuous, often illegal, crossings over the Mexican border into Texas and California are just a few of the episodes that have created a furor on local, state, and federal levels. In this timely and informative book, David Heer invites readers to examine the data and the trends of immigration to the United States and, ultimately, make up their own minds about what our national immigration policy ought to be. He demonstrates how social science findings, together with a conscious recognition of our individual values, are necessary for the formation of a balanced policy for immigration. Some of the nation's collective values that may be affected by U.S. immigration policy are the standard of living in this country, the preservation of existing American culture, ethnic and class conflict, and the power of the United States in international affairs. Heer examines the impact of these values on immigration policy and traces the history of U.S. immigration and immigration law and patterns of immigration to the United States. Finally, he offers proposals for change to existing immigration policy.

He reinterprets many well-known archaeological and astronomical finds, such as the Ohio Serpent Mound, America's Stonehenge in New Hampshire, and the Crespi Collection in Ecuador. He reveals Celtic, Hebrew, Roman, early Christian, Templar, Egyptian, Chinese, and Japanese influences in famous stones and ruins, reconstructing the record of what really happened on the American continents prior to Columbus. He also looks at Hindu influences in Mesoamerica and sacred sexuality encoded in archaeological sites. Expanding upon the work of well-known diffusionists such as Barry Fell and Gunnar Thompson, the author documents the travels and settlements of trans-Atlantic and trans-Pacific explorers, miners, and settlers who made it to the Americas and left their marks for us to discover.
