high school american government textbook: Textbooks in American Society Philip G. Altbach, Gail P. Kelly, Hugh G. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks—from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

high school american government textbook: Congress And The Decline Of Public Trust Joseph Cooper, 2018-03-05 Since the late 1960s, trust in government has fallen precipitously. The nine essays composing this volume detail the present character of distrust, analyze its causes, assess the dangers it poses, and suggest remedies. The focus is on trust in the Congress. The contributors also examine patterns of trust in societal institutions and the presidency, especially in light of the Clinton impeachment controversy. Among the themes the book highlights are the impacts of present patterns of politics, the consequences of public misunderstanding of democratic politics, the significance of poll data, and the need for reform in campaign finance, media practices, and civic education.

high school american government textbook: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

Kidd, 2016-04-30 This book argues that the declining nature of traditional forms of civic participation over the last half century are the result of the evolution of larger institutional, social, and historical forces that have favored the self-interest motivation at the expense of civic duty
