The author asks why people do not forget their national identity. He suggests that in daily life nationalism is constantly flagged in the media through routine symbols and habits of language. Banal Nationalism is critical of orthodox theories in sociology, politics and social psychology for ignoring this core feature of national identity. Michael Billig argues forcefully that wi

haralambos sociology textbook: Sociology of Law as the Science of Norms Håkan Hydén, 2021-12-28 This book proposes the study of norms as a method of explaining human choice and behaviour by introducing a new scientific perspective. The science of norms may here be broadly understood as a social science which includes elements from both the behavioural and legal sciences. It is given that a science of norms is not normative in the sense of prescribing what is right or wrong in various situations. Compared with legal science, sociology of law has an interest in the operational side of legal rules and regulation. This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology. The underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs. Today the economy, via the market, and technology via digitization, generate stronger and more frequent expectations than the social system. By expanding the sociological understanding of norms, the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society. The book will be of interest to academics and researchers in the areas of sociology of law, legal theory, philosophy of law, sociology and social psychology.

haralambos sociology textbook: *The Political Durkheim* Matt Dawson, 2023-05-31 This book presents Durkheim as an important political sociologist, inspired by and advocating socialism. Through a series of studies, it argues that Durkheim's normative vision, which can be called libertarian socialism, shaped his sociological critique and search for alternatives. With attention to the value of this political sociology as a means of understanding our contemporary world, the author asks us to look again at Durkheim. While Durkheim's legacy has often emphasised the supposed conservative elements and stability advocated in his thought, we can point to a different legacy, one of a radical sociology. In dialogue with the decolonial critique, this volume also asks 'was Durkheim white?' and in doing so shows how, as a Jew, he experienced significant racialisation in his lifetime. A new reading and a vital image of a 'political Durkheim', *The Political Durkheim* will appeal to scholars and students with interests in Durkheim, social theory and political sociology.

haralambos sociology textbook: *Narrating and Teaching the Nation* Denise Bentravato, 2016-02-15 The book investigates the politics of education in pre- and post-genocide Rwanda, examining the actors, interests, and discourses that have historically influenced educational policy and practice and in particular the production and revision of history curricula and textbooks. This study combines a systematic historical and comparative analysis of curricula and textbooks in Rwanda, stakeholder interviews, classroom observations, and a large-scale investigation of pupils' understandings of the country's history. Written at a crucial time of transition in Rwanda, it illuminates the role of education as a powerful means of socialisation through which dominant discourses and related belief systems have been transmitted to the younger generations, thus moulding the nation. It outlines emergent challenges and possibilities, urging a move away from the use of history teaching to disseminate a conveniently selective official history towards practices that promote critical thinking and reflect the heterogeneity characteristic of Rwanda's post-genocide society.

haralambos sociology textbook: *Elite Discourse and Racism* Teun A. Van Dijk, 1993-03-02 This volume takes a critical approach to the study of prejudice and discrimination by focusing on the role of elites in the reproduction of racism. Van Dijk's main thesis is that racism in North America and Europe is primarily 'top down' and preformulated by the elites, and is not only - as the elites would have it - a 'popular' phenomenon. The book opens with a wide-ranging study of the ways parliamentarians in the Netherlands, Germany, France, the UK and the USA debate immigration, refugees and civil rights, subtly contributing to the negative image of minorities. It goes on to examine how managers of international corporations talk about affirmative action and minority employment. A chapter on racism in social science te

haralambos sociology textbook: *Playing the University Game* Helen E. Lees, 2022-08-11 Going to university is expensive. It's an investment of money. It is also a massive leap of faith by everyone connected to your choice. You hope it will be a good experience, but you aren't sure. You want it to be fair to you and worth the effort, but there are no guarantees. Going to university to study and get a degree or certificate of qualification is as political as it is personal. So beware and be ready! But worry not. You will spend your money wisely for a long-term return. Why? Because

there is a game to play, and by picking up this book, you intend to play to win. Playing the University Game shows you the rules of the game, strategies for success on your terms (not those of the university as institution and system) and, most importantly, how to enjoy yourself as a university student, reaping the long-term benefits both during your experience and afterwards. How to win the personal way using political-social knowledge shared with you from inside the university walls. Helen Lees draws on her research and lived experiences of self-care in education, combining this with the voices of established academics, who between them have a wide-ranging and deeply reflective understanding of the university and university student interactions. Helen takes you into the heart of the mechanisms of university life, revealing key moves you need to make to survive and thrive in the game. She shares with you which actions and attitudes matter to win, why winning matters, how you can win without joining a dog-eat-dog competition. Helen empowers you to see why university education is about you and your flourishing, not the graduation prize but nevertheless happily also all about the graduation prize, which really matters. She skills you with the knowledge you need to avoid stress, to enjoy yourself and get true value for money from the educational product you have chosen.
