healing web story: **Ethnicity and the American Short Story** Julie Brown, 2013-05-13 How do different ethnic groups approach the short story form? Do different groups develop

culture-related themes? Do oral traditions within a particular culture shape the way in which written stories are told? Why does the community loom so large in ethnic stories? How do such traditional forms as African American slave narratives or the Chinese talk-story shape the modern short story? Which writers of color should be added to the canon? Why have some minority writers been ignored for such a long time? How does a person of color write for white publishers, editors, and readers? Each essay in this collection of original studies addresses these questions and other related concerns. It is common knowledge that most scholarly work on the short story has been on white writers: This collection is the first work to specifically focus on short story practice by ethnic minorities in America, ranging from African Americans to Native Americans, Chinese Americans to Hispanic Americans. The number of women writers discussed will be of particular interest to women studies and genre studies researchers, and the collections will be of vital interest to scholars working in American literature, narrative theory, and multicultural studies.

healing web story: Cancer Free: Your Guide to Gentle, Non-toxic Healing (Fifth Edition)

Bill Henderson, 2014-11-15 About the Book If you love your stricken one, this is your Bible. said Denzel Koh of Brisbane, Australia after he healed his daughter's cancer using the information in a previous edition of this book. A cancer diagnosis always causes fear. All of us have seen relatives and friends destroyed by conventional cancer treatment. Now, thanks to books like this one and the Internet, you can quickly learn what you need to know. You can heal the cancer using natural, non-toxic substances that work. What you need is a guide to cut through the overwhelming jungle of information. This book provides that guide. The information in it has been refined over twelve years using feedback from real cancer survivors about what worked for them. Bill Henderson, one of the authors, has counseled about 4,000 cancer patients by phone and video in 64 countries. At least 3,000 of them have recovered using his information. He is not a medical professional. He is a reporter furnishing you with information that consists of what he would do if he were you or your loved one. His coaching is available to you after you have read this book, if you need it. The co-author is Dr. Carlos Garcia, a formally trained M.D. who has broken out of that mold and trained himself to be a well-informed holistic physician. His Utopia Wellness clinic in Oldsmar, Florida regularly helps Stage IV cancer patients heal themselves. Bill Henderson has published 165 free newsletters on natural cancer treatment to 38,000 subscribers all over the world, starting in 1999. The information in these newsletters has now been incorporated into this, his third book. The book is up-to-date, specific and accurate. Bill and Dr. Garcia inform you of over 140 web sites and dozens of other books and newsletters you can use to expand your knowledge of natural cancer treatment. The self-treatments they recommend are harmless enough that you can start them immediately, without more research, if you like. They do not interfere with conventional cancer therapy, if that is your choice. In fact, they offset most of the side effects of that treatment. Cancer is not a disease, says Bill. It is a reaction to what your body has experienced. Reverse those causes and the cancer goes away. Continue what you did to reverse it and it stays away. Bill explains that there are four common characteristics of all cancers. These have been known since the 1920's: 1. Low oxygen uptake by the cells. 2. A weak immune system. 3. Toxins -- usually caused by diet and dental work. 4. Acidity -- again, usually caused by diet, as well as stress and dental work. Bill Henderson's and Dr. Garcia's recommended regimen tracks with the knowledge for which Otto Warburg, a famous German doctor and researcher, won a Nobel Prize in 1931. He described the cancer cell and stressed the need to reverse the above four characteristics of the cancer in order to heal it. None of these are addressed by conventional cancer treatment. Bill's mission to help cancer patients heal started with his experience with his former wife, Marjorie. Her ovarian cancer was treated with conventional cancer treatment from 1990 to 1994, when she died. Bill is convinced that the treatment killed her. He wants to help as many people as possible avoid her fate. Dr. Garcia's mission is to help cancer patients heal themselves starting in a controlled clinical environment and continuing at home. He has been doing this successfully for 15 years.

healing web story: Exploring Ecological Hermeneutics Norman C. Habel, Peter L. Trudinger, 2008 What has hermeneutics to do with ecology? What texts, if any, come to mind when you consider what the scriptures might say about environmental ethics? To help readers think critically and clearly about the Bible's relation to modern environmental issues, this volume expands the horizons of biblical interpretation to introduce ecological hermeneutics, moving beyond a simple discussion about Earth and its constituents as topics to a reading of the text from the perspective of Earth. In these groundbreaking essays, sixteen scholars seek ways to identify with Earth as they read and retrieve the role or voice of Earth, a voice previously unnoticed or suppressed within the biblical text and its interpretation. This study enriches eco-theology with eco-exegesis, a radical and timely dialogue between ecology and hermeneutics. healing web story: **Ethical and Social Issues in Professional Education** Celeste M. Brody, James Wallace, 1994-07-01 This book reflects and extends the great debates that schools, colleges, and universities are having in response to the profound moral conflicts and personal questions facing professionals today: What should we teach our students? What values should we communicate and nurture? What should be the role of the traditional liberal arts in professional education? How should schools and colleges respond to the demands of women and minorities for a more inclusive curriculum? The authors explore ongoing theoretical and practical considerations of graduate professional education through the ethical and social issues facing professionals in public service. Administrators, teachers, counselors, nurses, or lawyers are recognizing that they face similar questions about their personal and professional lives: Is it possible to sustain a set of fully human values as a practicing professional? As a member of a public organization, how does one deal with dilemmas involving conflicting priorities and ambiguous goals? The authors responses to these questions are presented as themes, describing connections between curriculum and pedagogy. They have designed an approach to ethical and social questions respectful of the contributions of adult learners and the need to provide diverse perspectives.
