harrison 22 edition: English Church Polyphony Roger Bowers, 2024-10-28 The theme of the essays in this volume is the identification of the resources which between c.1320 and 1642 the English church saw fit to provide for the performance of the music of its liturgy. Individual essays describe the music and the choirs of Canterbury and Lincoln Cathedrals, Winchester Cathedral Priory and the private chapel of Cardinal Wolsey, while the personnel of the chapels of Edward III, the Black Prince and John of Gaunt emerge from study of the texts of compositions of the 14th century. From the alignment of contemporary musical and archival sources there arises a web of conclusions relating to the size of ensemble, vocal scoring and sounding pitch envisaged by its composers for English church polyphony of the period c.1320-1559. These essays thus encompass the two most profound of the revolutions to which the music of the English church was subject at this period: the inauguration and widespread adoption of choral polyphony in the years c.1455-85 and the liturgical and doctrinal Reformation of 1547 to 1563.

harrison 22 edition: Social Ethics in the Making Gary Dorrien, 2009-03-25 In the early 1880s, proponents of what came to be called "the social gospel" founded what is now known as social ethics. This ambitious and magisterial book describes the tradition of social ethics: one that began with the distinctly modern idea that Christianity has a social-ethical mission to transform the structures of society in the direction of social justice. Charts the story of social ethics - the idea that Christianity has a social-ethical mission to transform society - from its roots in the nineteenth century through to the present day. Discusses and analyzes how different traditions of social ethics evolved in the realms of the academy, church, and general public. Looks at the wide variety of individuals who have been prominent exponents of social ethics from academics and self-styled "public intellectuals" through to pastors and activists. Set to become the definitive reference guide to the history and development of social ethics. Recipient of a CHOICE Outstanding Academic Title for 2009 award.

harrison 22 edition: Becoming a Woman of Letters Linda Peterson, 2021-06-08 During the nineteenth century, women authors for the first time achieved professional status, secure income, and public fame. How did these women enter the literary profession; meet the demands of editors, publishers, booksellers, and reviewers; and achieve distinction as women of letters? *Becoming a Woman of Letters* examines the various ways women writers negotiated the market realities of authorship, and looks at the myths and models women writers constructed to elevate their place in the profession. Drawing from letters, contracts, and other archival material, Linda Peterson details the careers of various women authors from the Victorian period. Some, like Harriet Martineau, adopted the practices of their male counterparts and wrote for periodicals before producing a best seller; others, like Mary Howitt and Alice Meynell, began in literary partnerships with their husbands and pursued independent careers later in life; and yet others, like Charlotte Brontë, and her successors Charlotte Riddell and Mary Cholmondeley, wrote from obscure parsonages or isolated villages, hoping an acclaimed novel might spark a meteoric rise to fame. Peterson considers these women authors' successes and failures--the critical esteem that led to financial rewards and

lasting reputations, as well as the initial successes undermined by publishing trends and pressures. Exploring the burgeoning print culture and the rise of new genres available to Victorian women authors, this book provides a comprehensive account of the flowering of literary professionalism in the nineteenth century.

harrison 22 edition: *Kings, Usurpers, and Concubines in the 'Chronicles of the Kings of Man and the Isles'* R. Andrew McDonald, 2019-09-26 This Palgrave Pivot explores the representation of sea kings, sinners, and saints in the mid-thirteenth century Chronicles of the Kings of Man and the Isles, the single most important text for the history of the kingdoms of Man and the Isles, c.1066-1300. The focus of the Chronicles on the power struggles, plots and intrigues within the ruling dynasties of Man and the Isles offers an impressive array of heroes and villains. The depiction of the activities of heroic sea kings like Godred Crovan, tyrannical usurpers like Harald son of Godred Don, and their concubines and wives, as well as local heroes like Saint Maughold, raises important questions concerning the dynamic interactions of power, gender and historical writing in the medieval Kingdoms of Man and the Isles, and provide new insights into the significance of the text that is our most important source of information on these 'Forgotten Kingdoms' of the medieval British Isles.

harrison 22 edition: **The Sea Kings** R. Andrew McDonald, 2020-05-28 The archipelagic kingdoms of Man and the Isles that flourished from the last quarter of the eleventh century down to the middle of the thirteenth century represent two forgotten kingdoms of the medieval British Isles. They were ruled by powerful individuals, with unquestionably regnal status, who interacted in a variety of ways with rulers of surrounding lands and who left their footprint on a wide range of written documents and upon the very landscapes and seascapes of the islands they ruled. Yet British history has tended to overlook these Late Norse maritime empires, which thrived for two centuries on the Atlantic frontiers of Britain. This book represents the first ever overview of both Manx and Hebridean dynasties that dominated Man and the Isles from the late eleventh to the mid-thirteenth

centuries. Coverage is broad and is not restricted to politics and warfare. An introductory chapter examines the maritime context of the kingdoms in light of recent work in the field of maritime history, while subsequent chronological and narrative chapters trace the history of the kingdoms from their origins through their maturity to their demise in the thirteenth century. Separate chapters examine the economy and society, church and religion, power and architecture.
