heresy financial platform: Zachariah Chandler (Illustrations) Detroit Post, Tribune, 2015-11-12 It is stated elsewhere that this work is written By The Detroit Post and Tribune. Unusual as this form of announcement is on the title-pages of books, there certainly may be an authorial as well as an editorial impersonality; in this case the phrase succinctly expresses the fact, namely, that the volume represents the joint labors of the staff of The Post and Tribune, alike in the collection and the treatment of its material. While its preparation has been almost wholly a matter of original research, such use as was necessary has been made of historical data contained in The Centennial History of Bedford, N. H., published in 1851, in Horace Greeley's American Conflict, and in Henry Wilson's History of the Rise and Fall of the Slave Power. Needed information has been furnished by those intimately connected with Mr. Chandler, but the work has not been submitted to their revision, and they are not responsible for the form of the narrative, nor for the personal estimate it embodies. This book presents a sketch of the life and the public services of a remarkable man. It has been written from the standpoint of political sympathy, and with the hope of deepening the wholesome influences so powerfully exerted upon public sentiment in his lifetime by Zachariah Chandler. The

aim has been to make it accurate in statement, and to see that its chapters should fairly draw, in outline at least, the picture of the career of a genuine leader of men.

heresy financial platform: The Louisiana Populist Movement, 1881-1900 Donna A. Barnes, 2011-05-18 The Populist movement of the late nineteenth century represents one of the largest third-party challenges in American history. Throughout the South widespread drops in crop prices led to agrarian revolt, which contributed to the movement's popularity. Yet, in the largely rural state of Louisiana, despite the political group's focus on empowering distressed farmers, this challenge proved far less successful. In Donna A. Barnes's *The Louisiana Populist Movement* the question of ineffectuality makes an intriguing political case study of the Pelican State and Populism. Emerging in the 1890s as the political wing of the Southern Farmers' Alliance, the Populists, or People's Party, garnered the support of millions of rural southerners. But the affiliated Louisiana party struggled to spread beyond a limited number of parishes in the northern and central part of the state. According to Barnes, the movement's relatively poor mobilization record provides an excellent opportunity to explore factors that impede social growth. Most scholars, she contends, often focus on the emergence and rise of successful political organizations and overlook the valuable observations to be found within less successful movements, such as Louisiana Populism. In her evaluation, Barnes points to racial division as the factor that undermined the Populist cause in Louisiana. The Democratic Party saw the agenda of the Populist movement as a threat to white supremacy and thus, when paired with the 1898 state constitution that disfranchised poor rural whites and most blacks, predestined the People's Party to poor public reception. Based on an array of archival research, Barnes's study offers the definitive source for the history of the Louisiana Populist Movement as well as a multidimensional theoretical analysis of the factors behind the movement's failure.

heresy financial platform: Dubious Victory Robert D. Sawrey, 2021-12-14 To the victors belong the spoils is a time-honored cliché. When in 1865 northern armies defeated the greatest challenge ever posed to the Union, issues of spoils and peace terms dominated public debate. But precisely what did the victorious North want from the Reconstruction process? Historians generally have shown far less interest in northern goals than in what terms southerners were willing to accept. Robert Sawrey now seeks to redress the balance by examining the post-Civil War attitudes of a representative northern state, Ohio. Sawrey's probing study explores precisely what the key issues were for politically active Ohioans and what they sought in a Reconstruction policy. Through extensive research in contemporary newspapers, manuscripts, legislative debates, and diaries, he offers the most complete picture ever presented of northern attitudes on the two crucial issues of Reconstruction—the terms of readmission and the fate of the former slaves. Ohioans' struggle to find an equation for restoring a Union that now included nearly four million free blacks was complicated, he finds, by their prejudices and their belief in white superiority. Because they regarded the planter conspiracy as a primary cause of the war, they sought to assure future peace through control of the planters—a position that compelled them to advocate basic rights for ex-slaves. At the same time,

they continued to support white supremacy throughout the nation. To reconcile these contradictory positions was a daunting task. Yet by 1870, Sawrey finds, most politically involved Ohioans believed Reconstruction had secured their basic goals. Dubious Victory offers a fresh approach to understanding the limits of what was achievable during Reconstruction. It also explains why the achievements of the period now seem to have been so limited.
