i ready level 3: Reading Across International Boundaries Roger Openshaw, Janet Soler, 2007-06-01 Reading Across International Boundaries, edited by Roger Openshaw and Janet Soler, clearly demonstrates these broader characteristics of debates about the teaching of reading. It sets the educational issues firmly in the context of the social, cultural and political dynamics that inform and animate them and give them their meaning. It does so by setting out to understand their

historical and comparative dimensions. Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar. The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world. More than this, however, this collection takes us into the realm of international influences. It underlines how debates in this area are not simply national, but are international and global in their scale. Moreover this is the case not only in relation to the broad fabric of policy debate, but also in the everyday struggles of pupils, parents and teachers in schools, classrooms and homes. Such an agenda is unsettling and provocative. It has the potential to challenge received opinion, to hustle preconceptions. It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly. Most of all, it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed. This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field, but also a major resource when put to good use by policy makers and practitioners, as it should surely be.

i ready level 3: *New Perspectives on Intercultural Language Research and Teaching* Melina Porto, Michael Byram, 2016-06-10 Illustrated by an empirical study of English as a Foreign Language reading in Argentina, this book argues for a different approach to the theoretical rationales and methodological designs typically used to investigate cultural understanding in reading, in particular foreign language reading. It presents an alternative approach which is more authentic in its methods, more educational in its purposes, and more supportive of international understanding as an aim of language teaching in general and English language teaching in particular.

i ready level 3: Motivating Reading Comprehension Allan Wigfield, 2004-05-20 Concept Oriented Reading Instruction (CORI) is a unique, classroom-tested model of reading instruction that breaks new ground by explicitly showing how content knowledge, reading strategies, and motivational support all merge in successful reading instruction. A theoretical perspective (engagement in reading) frames the book and provides a backdrop for its linkage between hands-on science activities and reading comprehension. Currently funded by the Interagency Educational Research Initiative (IERI), this model has been extensively class tested and is receiving national attention that includes being featured on a PBS special on the teaching of reading. Key features of this outstanding new volume include: *Theoretical Focus--CORI's teaching framework revolves around the engagement perspective of reading: how engaged reading develops and the classroom contexts and motivational supports that promote it. *Content-Area Focus--Although science is the content area around which CORI has been developed, its basic framework is applicable to other content areas. *Focus on Strategy Instruction--CORI revolves around a specific set of reading strategies that the National Reading Panel (2000) found to be effective. In some current CORI classrooms collaborating teachers implement all aspects of CORI and in other classrooms teachers implement just the strategy instruction component. *Illustrative Vignettes and Cases--Throughout the book vignettes and mini-case studies convey a situated view of instructional practices for reading comprehension and engagement. A detailed case study of one teacher and of the reading progress of her students is featured in one chapter. This book is appropriate for graduate and advanced undergraduate students in education and psychology, for practicing teachers, and for researchers in reading comprehension and motivation.
