interpreter of maladies analysis: Cosmo-Modernism and Theater in India Aparna Bhargava Dharwadker, 2025-08-05 Urban theater took shape in postindependence India as a large and complex field produced in more than sixteen major languages, including Bengali, Marathi, Hindi, Gujarati, and Kannada. The cosmopolitan engagement of leading playwrights with modernist and postcolonial literary movements around the world created distinctly new aesthetic and political approaches to Indian myth, history, and sociocultural experience, which had become the most prominent subjects in modern Indian drama. Yet even as critics and scholars of global modernism have increasingly turned their attention beyond North America and Europe, they continue to focus on dominant world languages at the expense of multilingual cultures such as India's. Despite their originality and significance, modernist works written in Indian languages other than English remain neglected. In *Cosmo-Modernism and Theater in India*, Aparna Bhargava Dharwadker develops a new framework for understanding non-Anglophone Indian modernisms by recovering crucial theoretical concepts and using them to analyze the writing, staging, and reception of major plays in multiple languages. She argues that the output of prominent mid- to late-twentieth-century playwrights such as Dharamvir Bharati, Mohan Rakesh, Badal Sircar, Vijay Tendulkar, Girish Karnad, and Habib Tanvir registers a decisive rupture from nineteenth-century forms of colonial modernity. In representing the ancient Indian past, the postcolonial urban present, and the rich repertoire of

precolonial performance traditions, these authors' works became highly inventive expressions of modernist classicism, realism, and traditionalism. Dharwadker shows how a decommercialized performance economy and the incessant activity of translation further enhanced modernist production, and she connects Indian modernisms to regional, national, and transnational networks. Offering bold new insights into the theory and practice of modernist drama, this book delivers a radical remapping of global modernisms.

interpreter of maladies analysis: The Transnational in Literary Studies Kai Wiegandt, 2020-07-06 This volume clarifies the meanings and applications of the concept of the transnational and identifies areas in which the concept can be particularly useful. The division of the volume into three parts reflects areas which seem particularly amenable to analysis through a transnational lens. The chapters in Part 1 present case studies in which the concept replaces or complements traditionally dominant concepts in literary studies. These chapters demonstrate, for example, why some dramatic texts and performances can better be described as transnational than as postcolonial, and how the transnational underlies and complements concepts such as world literature. Part 2 assesses the advantages and limitations of writing literary history with a transnational focus. These chapters illustrate how such a perspective loosens the epistemic stranglehold of national historiographies, but they also argue that the transnational and national agendas of literary historiography are frequently entangled. The chapters in Part 3 identify transnational genres such as the transnational historical novel, transnational migrant fiction and translinguistic theatre, and analyse the specific poetics and politics of these genres.
