john delony mental health resources: Building a Non-Anxious Life Dr. John Delony, 2023-10-03 Why are my anxiety alarms going off all the time? Why do I feel like I'm in an endless cycle of blame and anger and impatience? Why are the people I love most melting down around me? No one needs to be told that our lives are filled with more anxiety than ever before. We know it. Our bodies can feel it. The questions we really need to answer Why? and Is there anything we can do about it? Dr. John Delony decided to get to the root of the issue by mapping out a plan to understand where our anxiety is coming from and the actions we can take to change it (because he's been there too). Over the past twenty years, he's learned through research, personal experience, and walking alongside countless others that there are six daily choices people have to make to create a non-anxious life: Choosing Reality Choosing Connection Choosing Freedom Choosing Health and Healing Choosing Mindfulness Choosing Belief In this no-nonsense, straightforward approach to mental health, John will break down exactly what each choice means and how to start making it on a daily basis. Now, here's the truth: Those choices aren't easy, and anxiety isn't going to magically

disappear. But if you commit to building a non-anxious life, you'll be able to better respond to whatever life throws at you. You'll grow from hard challenges. You'll learn to find peace during chaos. And you will learn to be well.

john delony mental health resources: Own Your Past Change Your Future Dr. John Delony, 2022-04-19 Get on the path to being well. We're the most technologically advanced society in history, but we've never been more stressed, medicated, or lonely. We have 1,000 Facebook friends but no one to help us move our couch. The pace of life is making us exhausted. We're all carrying the weight of our trauma based on the stories we were told by others and the ones we tell ourselves—and those stories are like bricks in a backpack that keep us from being happy and healthy. In his new book, national bestselling author Dr. John Delony provides a clear, five-step path to being well. You'll learn how to: * Redefine what trauma is and how to identify it in your life. * Grieve and heal from past hurt and trauma. * Make friends as an adult—it's not easy, but it is necessary. * Change your thoughts—it's possible. * Assess and evaluate your actions—these can change too. You'll laugh. You'll cry. Your thoughts and actions will be challenged. And if you take the steps John outlines, you'll learn how to leave the past where it belongs and get on the path to healing.

john delony mental health resources: Redefining Anxiety Dr. John Delony, 2020-11-17 Anxiety is real—but it isn't the end of your story. Dr. John Delony knows what anxiety feels like. He's walked that dark road himself, but he found light and hope on the other side of it. Bringing together his own journey and two decades of counseling and research, he walks you through: The four biggest myths about anxiety and the life-changing truth Practical steps you can take today to start getting your life back Long-term strategies for healing to help you move forward John will show you that most of what you've heard about anxiety is wrong. Things like: If you have anxiety, you're broken and need to be fixed Anxiety is a disease that can only be cured with medicine Anxiety is caused by your genetics While mental health is complex, our culture has made anxiety into something it's not. For the majority of people who face anxiety, the truth is simpler than we think: anxiety is an alarm. It's a signal—nothing more and nothing less. Anxiety is simply our body's way of telling us something is wrong. If we stop and listen, we can calm the alarm and move forward into healing and hope.
