jane blasio education: Taken at Birth Jane Blasio, 2021-07-13 From the 1940s through the 1960s, young pregnant women entered the front door of a clinic in a small North Georgia town. Sometimes their babies exited out the back, sold to northern couples who were desperate to hold a newborn in their arms. But these weren't adoptions--they were transactions. And one unethical doctor was exploiting other people's tragedies. Jane Blasio was one of those babies. At six, she learned she was adopted. At fourteen, she first saw her birth certificate, which led her to begin piecing together details of her past. Jane undertook a decades-long personal investigation to not only discover her own origins but identify and reunite other victims of the Hicks Clinic human trafficking scheme. Along the way she became an expert in illicit adoptions, serving as an investigator and telling her story on every major news network. Taken at Birth is the remarkable account of her tireless quest for truth, justice, and resolution. Perfect for book clubs, as well as those interested in inspirational stories of adoption, human trafficking, and true crime.

jane blasio education: Handbook of Education Policy Research Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-08-15 The second edition of the Handbook of Education Policy Research--the largest volume published in AERA's history--addresses a variety of policy and contextual issues in early childhood, K-12, and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories, and analyses that have contributed powerfully to the

study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive, and the authors represent a diversity of racial/ethnic and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors, reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present, and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers, and practitioners.

jane blasio education: **Posthumanism and Educational Research** Nathan Snaza, John Weaver, 2014-09-25 Focusing on the interdependence between human, animal, and machine, posthumanism redefines the meaning of the human being previously assumed in knowledge production. This movement challenges some of the most foundational concepts in educational theory and has implications within educational research, curriculum design and pedagogical interactions. In this volume, a group of international contributors use posthumanist theory to present new modes of institutional collaboration and pedagogical practice. They position posthumanism as a comprehensive theoretical project with connections to philosophy, animal studies, environmentalism, feminism, biology, queer theory and cognition. Researchers and scholars in curriculum studies and philosophy of education will benefit from the new research agendas presented by posthumanism.

jane blasio education: South Bronx Battles Carolyn McLaughlin, 2019-05-21 Community activist Carolyn McLaughlin takes us on a journey of the South Bronx through the eyes of its community members. Facing burned-out neighborhoods of the 1970s, the community fought back. McLaughlin illustrates the spirit of the community in creating a vibrant, diverse culture and its decades-long commitment to develop nonprofit housing and social-services, and to advocate for better education, health care, and a healthier environment. For the South Bronx to remain a safe haven for poor families, maintaining affordable housing is the central—but most challenging—task. *South Bronx Battles* is the comeback story of a community that was once in crisis but now serves as a beacon for other cities to rebuild, while keeping their neighborhoods affordable.

jane blasio education: The Knowledge Gap Natalie Wexler, 2020-08-04 “Essential reading for teachers, education administrators, and policymakers alike.” —STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system—one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong—it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and

vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

jane blasio education: America's Urban History Lisa Krissoff Boehm, Steven H. Corey, 2023-07-26 In this second edition, America's Urban History now includes contemporary analysis of race, immigration, and cities under the Trump administration and has been fully updated with new scholarship on early urbanization, mass incarceration and cities, the Great Society, the diversification of the suburbs, and environmental justice. The United States is one of the most heavily urbanized places in the world, and its urban history is essential to understanding the fundamental narrative of American history. This book is an accessible overview of the history of American cities, including Indigenous settlements, colonial America, the American West, the postwar metropolis, and the present-day landscape of suburban sprawl and an urbanized population. It examines the ways in which urbanization is connected to divisions of society along the lines of race, class, and gender, but it also studies how cities have been sources of opportunity, hope, and success for individuals and the nation. Images, maps, tables, and a guide to further reading provide engaging accompaniment to illustrate key concepts and themes. Spanning centuries of America's urban past, this book's depth and insight make it an ideal text for students and scholars in urban studies and American history.

jane blasio education: Audience Transformations Nico Carpentier, Kim Christian Schröder, Lawrie Hallett, 2013-07-31 The concept of the audience is changing. In the twenty-first century there are novel configurations of user practices and technological capabilities that are altering the way we understand and trust media organizations and representations, how we participate in society, and how we construct our social relations. This book embeds these transformations in a societal, cultural, technological, ideological, economic and historical context, avoiding a naive privileging of technology as the main societal driving force, but also avoiding the media-centric reduction of society to the audiences that are situated within. Audience Transformations provides a platform for a nuanced and careful analysis of the main changes in European communicational practices, and their social, cultural and technological affordances.

jane blasio education: *The Emerging Child* Phyllis Brusiloff, Mary Jane Witenberg, 2015-08-06 The Hudsons Guild is a long established neighborhood house which offers social, educational, psychiatric, and psychological services to the residents of Chelsea, who are often socially, economically, and educationally, deprived. The many activities of the Hudson Guild Neighborhood House included a mental hygiene clinic also called the Counseling Service, and the operation of a day care center for the children of working mothers. Dr. David Wolitzky describes the program: In 1956 the staffs of these two independent services embarked on a cooperative continuing venture, the establishment and operation of the Therapeutic Nursery Group (TNG). The aim of the TNG is to provide emotionally and behaviorally disturbed pre-school children with a group play therapy experience under the leadership of a special nursery group-teacher-therapist. The basic rationale of this program is that the early detection and treatment of psychological disturbances serves as a constructive influence on the child's current and subsequent personal and social adaptation. The clinical evidence of the personnel involved in this program is that the TNG in providing a corrective emotional experience is an effective mode of intervention. This book presents the background, nature, techniques, and implications of the TNG program.

jane blasio education: *The Battle for Boston* Don Gillis, 2025-05-06 How Mayor Ray Flynn's leadership and a coalition of activists transformed Boston, challenging established powers and setting new precedents for urban governance The Battle for Boston captures the remarkable era under Mayor Ray Flynn, whose election in 1983 marked the beginning of a profound shift in the city's political and social landscape. Don Gillis, a Flynn senior advisor, chronicles the inspiring journey of a city that dared to challenge the entrenched power brokers—including developers, landlords, and banking industry leaders—through powerful grassroots campaigns. Gillis provides a vivid portrayal of the political dynamics and the coalition of community organizers, neighborhood leaders, and residents that played a pivotal role in rejecting the business-backed growth machine and the city's historically divisive racial politics. This book charts the strategic battles fought within the corridors of power and on the streets and highlights the substantial impact these movements had on the city's governance and power dynamics. In a historic turn, in 2021, Michelle Wu became the first woman, person of color, and Asian- American elected Mayor of Boston. Wu's victory on a similarly progressive platform as Flynn underscores the enduring relevance of his legacy, signaling a hopeful future for more inclusive and effectively governed cities. The Battle for Boston poses a critical inquiry: Can cities truly embrace progressivism and govern effectively in the twenty-first century? This qualitative narrative study is a testament to the possibility of such governance, driven by the indomitable spirit of those who strive for a fair and equitable society.

jane blasio education: *A Light Shines in Harlem* Mary Bounds, Wyatt Walker, 2014-09-01 This book tells the gripping inside story of the Sisulu-Walker Charter School of Harlem. It is a penetrating look at the real world of education reform—the hundreds of small decisions and big risks that go into making a school succeed. A hero of the civil rights movement, a Wall Street star, inner-city activists, educators, parents, and students all came together to create a groundbreaking school that, in its best years, far outperformed public schools in the neighborhoods in which most of

its children lived. At the same time the book looks at education reform through a broader lens, discussing recent research and issues facing the charter movement today. It answers two fundamental questions: What makes a school succeed or fail? And how can these lessons be applied to other schools to make them better? The result is not only an exciting narrative of how one school fought to succeed despite the odds, but also an illuminating glimpse into the future of American education. Mary C. Bounds, an award-winning journalist, has written for the New York Times, the Chicago Tribune, the Houston Chronicle, and other publications. She lives in Chappaqua, New York. Dr. Wyatt Tee Walker was chief of staff for Dr. Martin Luther King Jr., Virginia state director of the Congress of Racial Equality, and executive director of the Southern Christian Leadership Conference; he helped organize the 1963 March on Washington. For 37 years he served as senior pastor at Harlem's Canaan Baptist Church of Christ. He lives in Chester, Virginia.

jane blasio education: The Media in Italy Matthew Hibberd, 2007-12-16 The Italian media - the press, cinema, radio and television - is one of the largest and most controversial media industries in mainland Europe. In this introductory text Matthew Hibberd explores the key historical processes and events in the growth and development of Italy's main media and considers it in the context of the economic, political, socio-cultural and technological movements that have affected Italy. Featuring a timeline of key Italian events, the book begins with the Unification - or Risorgimento - of Italy in 1861, and charts the rise of Italy from a fragmented and rural-based society through to a leading industrialised and urbanised world power. It details Fascism's reliance on the exploitation of the mass media, analyses Italy's remarkable post-war recovery, the development of democratic institutions and the contribution that a pluralistic media has made to this. Finally, it examines Silvio Berlusconi's rise to high political office and questions whether the involvement of Italy's leading media mogul in politics has harmed Italy's international reputation. The Media in Italy addresses key themes that show how the Italian state and Italian media operate, such as: How governing parties and individuals have been able to assert influence over media intuitions Why there is a close relationship between political elites and media professionals The lack of consensus over key media reforms The importance of the Catholic Church in the development of the Italian media How a unique Italian media system has been shaped by issues of citizenship, democracy and nation-state The Media in Italy is key reading for students on media, journalism, politics, and modern language courses.

jane blasio education: Streetfight Janette Sadik-Khan, Seth Solomonow, 2017-03-07 Like a modern-day Jane Jacobs, Janette Sadik-Khan transformed New York City's streets to make room for pedestrians, cyclists, buses, and green spaces. Describing the battles she fought to enact change, Streetfight imparts wisdom and practical advice that other cities can follow to make their own streets safer and more vibrant. As New York City's transportation commissioner, Janette Sadik-Khan managed the seemingly impossible and transformed the streets of one of the world's greatest, toughest cities into dynamic spaces safe for pedestrians and cyclists. Her approach was dramatic and effective: Simply painting a part of the street to make it into a plaza or bus lane not only made the street safer, but it also lessened congestion and increased foot traffic, which improved the bottom line of businesses. Real-life experience confirmed that if you know how to read the street, you can make it function better by not totally reconstructing it but by reallocating the space that's already there. Breaking the street into its component parts, Streetfight demonstrates, with step-by-step visuals, how to rewrite the underlying "source code" of a street, with pointers on how to add protected bike paths, improve crosswalk space, and provide visual cues to reduce speeding. Achieving such a radical overhaul wasn't easy, and Streetfight pulls back the curtain on the battles Sadik-Khan won to make her approach work. She includes examples of how this new way to read the streets has already made its way around the world, from pocket parks in Mexico City and Los Angeles to more pedestrian-friendly streets in Auckland and Buenos Aires, and innovative bike-lane designs and plazas in Austin, Indianapolis, and San Francisco. Many are inspired by the changes taking place in New York City and are based on the same techniques. Streetfight deconstructs, reassembles, and reinvents the street, inviting readers to see it in ways they never imagined.
