john famularo news: *Baseball's Pivotal Era, 1945-1951* William Marshall, 2021-11-21 With personal interviews of players and owners and with over two decades of research in newspapers and archives, Bill Marshall tells of the players, the pennant races, and the officials who shaped one of the most memorable eras in sports and American history. At the end of World War II, soldiers returning from overseas hungered to resume their love affair with baseball. Spectators still identified with players, whose salaries and off-season employment as postmen, plumbers, farmers, and insurance salesmen resembled their own. It was a time when kids played baseball on sandlots and in pastures, fans followed the game on the radio, and tickets were affordable. The outstanding play of Joe DiMaggio, Stan Musial, Ted Williams, Bob Feller, Don Newcombe, Warren Spahn, and many others dominated the field. But perhaps no performance was more important than that of Jackie Robinson, whose entrance into the game broke the color barrier, won him the respect of millions of Americans, and helped set the stage for the civil rights movement. *Baseball's Pivotal Era, 1945-1951* also records the attempt to organize the Pittsburgh Pirates and the Mexican League's success in luring players south of the border that led to a series of lawsuits that almost undermined baseball's reserve clause and antitrust exemption. The result was spring training pay, uniform contracts, minimum salary levels, player representation, and a pension plan—the very issues that would divide players and owners almost fifty years later. During these years, the game was led by A.B. Happy Chandler, a hand-shaking, speech-making, singing Kentucky politician. Most owners thought he would be easily manipulated, unlike baseball's first commissioner, the autocratic Judge Kennesaw Mountain Landis. Instead, Chandler's style led one owner to complain that he was the player's commissioner, the fan's commissioner, the press and radio commissioner, everybody's commissioner but the men who pay him.

john famularo news: Restoring Heritage Grains Eli Rogosa, 2016 Including recipes for baking with Einkorn Wheat is the most widely grown crop on our planet, yet industrial breeders have transformed this ancient staff of life into a commodity of yield and profit--witness the increase in gluten intolerance and 'wheat belly'. Modern wheat depends on synthetic fertilizer and herbicides

that damage our health, land, water, and environment. Fortunately, heritage 'landrace' wheats that evolved over millennia in the organic fields of traditional farms do not need bio-chemical intervention to yield bountifully, are gluten-safe, have rich flavor and high nutrition. Yet the robust, majestic wheats that nourished our ancestors are on the verge of extinction. In *Restoring Heritage Grains*, author Eli Rogosa of the Heritage Grain Conservancy, invites readers to restore forgotten wheats such as delicious gluten-safe einkorn that nourished the first Neolithic farmers, emmer--the grain of ancient Israel, Egypt, and Rome that is perfect for pasta and flatbreads, rare durum that are drought-tolerant and high in protein, and many more little known wheat species, each of which have a lineage intertwined with the human species and that taste better than any modern wheat. *Restoring Heritage Grains* combines the history of grain growing and society, in-depth practical advice on landrace wheat husbandry, wheat folk traditions and mythology, and guidelines for the Neolithic diet with traditional recipes for rustic bread, pastry and beer. Discover the ancient grains that may be one of the best solutions to hunger today, and provide resilience for our future.

john famularo news: Pharma Gerald Posner, 2020-03-10 Award-winning journalist and New York Times bestselling author Gerald Posner reveals the heroes and villains of the trillion-dollar-a-year pharmaceutical industry and delivers “a withering and encyclopedic indictment of a drug industry that often seems to prioritize profits over patients” (*The New York Times Book Review*). Pharmaceutical breakthroughs such as antibiotics and vaccines rank among some of the greatest advancements in human history. Yet exorbitant prices for life-saving drugs, safety recalls affecting tens of millions of Americans, and soaring rates of addiction and overdose on prescription opioids have caused many to lose faith in drug companies. Now, Americans are demanding a national reckoning with a monolithic industry. “Gerald’s dogged reporting, sets Pharma apart from all books on this subject” (*The Washington Standard*) as we are introduced to brilliant scientists, incorruptible government regulators, and brave whistleblowers facing off against company executives often blinded by greed. A business that profits from treating ills can create far deadlier problems than it cures. Addictive products are part of the industry’s DNA, from the days when corner drugstores sold morphine, heroin, and cocaine, to the past two decades of dangerously overprescribed opioids. Pharma also uncovers the real story of the Sacklers, the family that became one of America’s wealthiest from the success of OxyContin, their blockbuster narcotic painkiller at the center of the opioid crisis. Relying on thousands of pages of government and corporate archives, dozens of hours of interviews with insiders, and previously classified FBI files, Posner exposes the secrets of the Sacklers’ rise to power—revelations that have long been buried under a byzantine web of interlocking companies with ever-changing names and hidden owners. The unexpected twists and turns of the Sackler family saga are told against the startling chronicle of a powerful industry that sits at the intersection of public health and profits. “Explosively, even addictively, readable” (*Booklist*, starred review), Pharma reveals how and why American drug companies have put earnings ahead of patients.
