kristen archives: Archives and Emotions Ilaria Scaglia, Valeria Vanesio, 2024-11-14 Archives and Emotions argues, at its most fundamental level, that emotions matter and have always mattered to both the people whose histories are documented by archives and to those working with the documents these contain. This is the first study to put archivists and historians-scholars and

practitioners from different settings, geographical provenance, and stages of career-in conversation with one another to examine the interplay of a broad range of emotions and archives, traditional and digital, from the eighteenth to the twenty-first centuries across national and disciplinary borders. Drawing on methodologies from the history of emotions and critical archival studies, this book provides an original analysis of two interconnected themes through a selected number of case studies: the emotional dynamics affecting the construction and management of archives; and the emotions and their effects on the people engaging with them, such as archivists, researchers, and a broad range of communities. Its main message is that critically investigating the history and mechanics of emotions-including their suppression and exclusion-also being conscious of their effects on people and societies is essential to understanding how archives came to hold deep civic and ethical implications for both present and future. This study thus establishes a solid base for future scholarship and interdisciplinary collaborations and challenges academic and non-academic readers to think, work, and train new generations differently, fully aware that past and present choices have-and might again-hurt, inspire, empower, or silence.

kristen archives: *Community Archives, Community Spaces* Jeannette Bastian, Andrew Flinn, 2019-12-19 This book traces the trajectory of the community archives movement, expanding the definition of community archives to include sites such as historical societies, social movement organisations and community centres. It also explores new definitions of what community archives might encompass, particularly in relation to disciplines outside the archives. Over ten years have passed since the first volume of *Community Archives*, and inspired by continued research as well as by the formal recognition of community archives in the UK, the community archives movement has become an important area of research, recognition and appreciation by archivists, archival scholars and others worldwide. Increasingly the subject of papers and conferences, community archives are now seen as being in the vanguard of social concerns, markers of community-based activism, a participatory approach exemplifying the on-going evolution of 'professional' archival (and heritage) practice and integral to the ability of people to articulate and assert their identity. *Community Archives, Community Spaces* reflects the latest research and includes practical case studies on the challenges of building and sustaining community archives. This new book will appeal to practitioners, researchers, and academics in the archives and records community as well as to historians and other scholars concerned with community building and social issues.

kristen archives: *The Toxic Museum* Helene Tello, 2023-12-29 The *Toxic Museum* examines the use of pesticides in German museum collections at the end of the 19th and early 20th centuries. It reconstructs the research of substances against harmful insects in museum collections within the historical context of the formation of nation-states, colonialism, a strengthening chemical industry, the First World War, and the resulting broad-based hygiene movement through the lens of the Ethnologisches Museum (Ethnological Museum) in Berlin. Because of their persistence, the consequences of the use of pesticides in museum collections are now unmistakable and well documented in many places. Numerous objects are highly contaminated and are only accessible under difficult conditions regarding occupational health and safety. This creates obstacles for conservation and scientific processing, as well as for mediation in the context of exhibitions and external loans. The most precarious and difficult situations arise when contaminated museum objects are repatriated to their countries of origin. This monograph examines contemporary challenges in the 21st century museum landscape and contextualises the history of pesticide use at the turn of the 20th century. *The Toxic Museum* will be of great interest to students and scholars working in conservation, museology, monument preservation, art and cultural studies, ethnology, history, and economics.

kristen archives: *The SAGE Encyclopedia of Communication Research Methods* Mike Allen, 2017-01-15 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general,

until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

Stone, Jaime Cantrell, 2015-11-20 The first book to focus on the experience of LGBT archival research. *Out of the Closet, Into the Archives* takes readers inside the experience of how it feels to do queer archival research and queer research in the archive. The archive, much like the closet, exposes various levels of public and privateness—recognition, awareness, refusal, impulse, disclosure, framing, silence, cultural intelligibility—each mediated and determined through subjective insider/outsider ways of knowing. The contributors draw on their experiences conducting research in disciplines such as sociology, African American studies, English, communications, performance studies, anthropology, and women's and gender studies. These essays challenge scholars to engage with their affective experience of being in the archive, illuminating how the space of the archive requires a different kind of deeply personal, embodied research.

The tracking of our personal information, activities, and medical data through our digital devices is an increasingly recognizable field in which the lines between caretaking and control have blurred. In this age of surveillance, mothers' behaviors and bodies are observed, made public, exposed, scrutinized, and policed like never before. *Supervision: On Motherhood and Surveillance* gathers together the work of fifty contributors from diverse disciplines that include the visual arts, legal scholarship, ethnic studies, sociology, gender studies, poetry, and activism to ask what the relationship is between how we watch and how we are watched, and how the attention that mothers pay to their children might foster a kind of counterattention to the many ways in which mothers are scrutinized. A groundbreaking collection, *Supervision* is a project about vision (and supervision), and all the ways in which vision intersects with surveillance and politics, through motherhood and personal history as well as through the histories and relations of the societies in which we live. kristen archives: *The Kinsey Institute* Judith A. Allen, Hallimeda E. Allinson, Andrew Clark-Huckstep, Brandon J. Hill, Stephanie A. Sanders, Liana Zhou, 2017-09-01 An in-depth history of Alfred Kinsey's groundbreaking Institute for Sex Research and the cultural awakening it inspired in America—"it has no rival" (Angus McLaren). While teaching a course on Marriage and Family at Indiana University, biologist Alfred Kinsey noticed a surprising dearth of scientific literature on human sexuality. He immediately began conducting his own research into this important yet neglected field of inquiry, and in 1947, founded the Institute for Sex Research as a firewall against those who opposed his work on moral grounds. His frank and dispassionate research shocked America with the hidden truths of our own sex lives, and his two groundbreaking reports —Sexual Behavior in the Human Male (1948) and Sexual Behavior in the Human Female (1953)—both became New York Times bestsellers. In *The Kinsey Institute: The First Seventy Years*, Judith A. Allen and her coauthors provide an in-depth history of Kinsey's groundbreaking work and explore how the Institute has continued to make an impact on our culture. Covering the early years of the Institute through the "Sexual Revolution," into the AIDS pandemic of the Reagan era, and on into the "internet hook-up" culture of today, the book illuminates the Institute's enduring importance to society.

kristen archives: The Boston Raphael Belinda Rathbone, 2014-10-01 The discovery of a previously unknown painting by an Italian Renaissance master, and how it went from media sensation to career-ending scandal. On the eve of its centennial celebrations in December 1969, the Boston Museum of Fine Arts announced the acquisition of an unknown and uncatalogued painting attributed to Raphael. Boston's coup made headlines around the world. Soon afterward, an Italian art sleuth began investigating the details of the painting's export from Italy, challenged the museum's right to ownership. Simultaneously, experts on both sides of the Atlantic lined up to debate the artwork's very authenticity. While these contests played themselves out on the international stage, the crisis deepened within the museum as its charismatic director, Perry T. Rathbone, faced the most challenging crossroads of his thirty-year career. The facts about the forces that converged on the museum, and how they led to Rathbone's resignation as director, is only now fully revealed in this compelling, behind-the-scenes story that reveals how the art world, media, and museums work. This is for anyone who relishes stories of the business of art. Praise for *The Boston Raphael* "Perhaps the most exciting book on the art world since Jonathan Harr's *The Lost Painting*." —The Boston Globe "In the compelling story of her father, Perry Rathbone, and the years when he was the elegant and revolutionary director of the Boston Museum of Fine Arts, Belinda Rathbone evokes our country's most glamorous years . . . kristen archives: Information Activism Cait McKinney, 2020-07-17 For decades, lesbian feminists across the United States and Canada have created information to build movements and survive in a world that doesn't want them. In Information Activism Cait McKinney traces how these women developed communication networks, databases, and digital archives that formed the foundation for their work. Often learning on the fly and using everything from index cards to computers, these activists brought people and their visions of justice together to organize, store, and provide access to information. Focusing on the transition from paper to digital-based archival techniques from the 1970s to the present, McKinney shows how media technologies animate the collective and unspectacular labor that sustains social movements, including their antiracist and trans-inclusive endeavors. By bringing sexuality studies to bear on media history, McKinney demonstrates how groups with precarious access to control over information create their own innovative and resourceful techniques for generating and sharing knowledge.
