jane blasio news: Taken at Birth Jane Blasio, 2021-07-13 From the 1940s through the 1960s, young pregnant women entered the front door of a clinic in a small North Georgia town. Sometimes their babies exited out the back, sold to northern couples who were desperate to hold a newborn in their arms. But these weren't adoptions--they were transactions. And one unethical doctor was exploiting other people's tragedies. Jane Blasio was one of those babies. At six, she learned she was adopted. At fourteen, she first saw her birth certificate, which led her to begin piecing together details of her past. Jane undertook a decades-long personal investigation to not only discover her own origins but identify and reunite other victims of the Hicks Clinic human trafficking scheme. Along the way she became an expert in illicit adoptions, serving as an investigator and telling her story on every major news network. Taken at Birth is the remarkable account of her tireless quest for truth, justice, and resolution. Perfect for book clubs, as well as those interested in inspirational stories of adoption, human trafficking, and true crime.

jane blasio news: Somebody Told Me Rick Bragg, 2001-08-28 With his bestselling All Over but the Shoutin', Rick Bragg gave us memorable stories of his own childhood. Here he offers the best of his work as a Pulitzer-Prize winning journalist writing the remarkable stories of others. For twenty years, Bragg has focused his efforts on the common man. So while some of these stories are about people whose names we know—such as Susan Smith, the South Carolina mother who drowned her two sons—most are people whose names we've never heard, people who have survived tornadoes and swamps, racism and bombs. In incisive, unadorned prose that is nonetheless strikingly beautiful, these pieces rise above journalism to become literature and show the triumph of the human spirit.

jane blasio news: More Than Our Pain Beth Hinderliter, Steve Peraza, 2021-04-01 Confronted by a crisis in black American leadership, state-sanctioned violence against black communities, and colorblind laws that trap black Americans in a racial caste system, Black Lives Matter activists and the artists inspired by them have devised new forms of political and cultural resistance. More Than Our Pain explores how affect and emotion can drive collective political and cultural action in the face of a new nadir in race relations in the United States. This foregrounding of affect and emotion marks a clear break from civil rights-era activists, who were often trained to counter false narratives about protesters as thugs and criminals by presenting themselves as impeccably groomed and disciplined young black Americans. In contrast, the Black Lives Matter movement in the early twenty-first century makes no qualms about rejecting the politics of respectability. Affect and emotion has moved from the margin to the center of this new human rights movement, and by examining righteous rage, black joy, as well as grief and fatigue among other emotions, the contributors celebrate the vitality of black life while documenting those who have harmed it. They also criticize the ways in which journalism has commercialized and sold black affect during coverage of the Black Lives Matter movement and point to strategies and modes-of-being needed to overcome the fatigue surrounding conversations of race and racism in the United States.

jane blasio news: Homes for Living Jonathan Tarleton, 2025-02-11 A tale of 2 NYC affordable housing co-ops' struggle over privatization, public goods, and the future of American housing The American Dream of homeownership is becoming an American Delusion. As renters seek an escape from record-breaking rent hikes, first-time buyers find that skyrocketing interest rates and historically low inventory leave them with scant options for an affordable place to live. With home valued more than ever as a commodity, even social housing programs meant to insulate families from cut-throat markets are under threat—sometimes by residents themselves. In Homes for Living, urban planner and oral historian Jonathan Tarleton introduces readers to 2 social housing co-ops in Brooklyn and Manhattan. Longtime residents of St. James Towers and Southbridge Towers lock horns over whether to maintain the rules that have kept their homes affordable for decades or to cash out at great personal profit, thereby denying future generations the same opportunity to build thriving communities rooted in mutual care. With a deft hand for mapping personal histories atop the greater housing crisis, Tarleton explores housing as a public good, movements for tenant rights and Indigenous sovereignty, and questions of race and class to lay bare competing visions of what ownership means, what homes are for, and what neighbors owe each other.

jane blasio news: Political Exercise Lawrence D. Brown, 2022-03-08 The public health benefits of giving city dwellers increased opportunities to lead physically active lifestyles are well known to urban planners, public health scholars, and government officials. Moreover, increases in “active living,” such as walking and cycling, help the environment, support local businesses, and reduce traffic congestion, among other advantages. But despite wide agreement that active living is both achievable and valuable, best practices are not easy to implement. In Political Exercise, Lawrence D. Brown presents five case studies of cities that have promoted active living with varying success through a range of approaches. He shows how and why the transformation of a call for public intervention into projects, programs, and policies is inescapably political. Brown argues that in order to implement policies that support active living, their proponents must give communities a sense of ownership of recommended changes in the built environment, filter the public health agenda through a range of public and private organizations, and secure committed political champions. At the intersection of public health and urban planning, Political Exercise offers a framework for scholars, policy makers, and reformers to more productively address both the rationales behind active living and the political strategies that spur change.

jane blasio news: American Pravda James O'Keefe, 2018-01-16 The one real difference between the American press and the Soviet state newspaper Pravda was that the Russian people knew they were being lied to. To expose the lies our media tell us today, controversial journalist James O'Keefe created Project Veritas, an independent news organization whose reporters go where traditional journalists dare not. In American Pravda, the reader is invited to go undercover with these intrepid journalists as they infiltrate political campaigns, unmask dishonest officials and expose voter fraud. A rollicking adventure story on one level, the book also serves as a treatise on modern media, arguing that establishment journalists have a vested interest in keeping the powerful comfortable and the people misinformed.

jane blasio news: Paper of Wreckage Susan Mulcahy, Frank DiGiacomo, 2024-10-08 A jaw-dropping and unputdownable oral history of the New York Post and the legendary tabloid's cultural impact from the 1970s to today as recounted by the men and women who witnessed it firsthand. By the 1970s, the country's oldest continuously published newspaper had fallen on hard

times, just like its nearly bankrupt hometown. When the New York Post was sold to a largely unknown Australian named Rupert Murdoch in 1976, staffers hoped it would be the start of a new golden age for the paper. Now, after the nearly fifty years Murdoch has owned the tabloid, American culture reflects what Murdoch first started in the 1970s: a celebrity-focused, noisy, one-sided media empire that reached its zenith with Fox News. Drawing on extensive interviews with key players and in-depth research, this eye-opening, wildly entertaining oral history shows us how we got to this point. It's a rollicking tale full of bad behavior, inflated egos, and a corporate culture that rewarded skirting the rules and breaking norms. But working there was never boring and now, you can discover the entire remarkable true story of America's favorite tabloid newspaper.

jane blasio news: The War on History Jarrett Stepman, 2019-10-01 The War on Our History Confederate memorials toppled . . . Columbus statues attacked with red paint. They started with slave-owning Confederate generals, but they're not stopping there. The vandals are only pretending to care about the character of particular American heroes. In reality, they hate what those heroes represent: the truths asserted in the Declaration of Independence and embodied in the Constitution. And they are bent on taking America down and replacing our free society with a socialist utopia. All that stands in their way is Americans' reverence for our history of freedom. Which is why that history simply has to go. Now, Jarrett Stepman, editor at The Daily Signal and host of Right Side of History, exposes the true aims of the war on our history: The war on America: World history is full of conquests and suffering indigenous peoples. Why target Christopher Columbus? What they really want to tear down is America. The war on Thanksgiving: World history is full of colonists. Why target the Pilgrims? What they really want to tear down is American freedom and prosperity. The war on the Founding: World history is full of slavery. Why target Thomas Jefferson? What they really want to tear down are the rights endowed by our Creator. The war on the common man: World history is full of victorious generals and populist politicians. Why target Andrew Jackson? What they really want to tear down is democracy. The war on the South: World history is full of civil strife. Why target Confederate heroes like Robert E. Lee? What they really want to tear down is respect for America's past and the reconciliation that renewed our Union. The war on patriotism: World history is full of national pride. Why target Teddy Roosevelt? What they really want to tear down is the idea of American greatness. The war on the American century: World history is full of bloody wars. What they really want to tear down is America's defeat of totalitarianism. If America is to survive this assault, we must rally to the defense of our illustrious history. The War on History is the battle plan.

jane blasio news: America's Urban History Lisa Krissoff Boehm, Steven H. Corey, 2023-07-26 In this second edition, America's Urban History now includes contemporary analysis of race, immigration, and cities under the Trump administration and has been fully updated with new scholarship on early urbanization, mass incarceration and cities, the Great Society, the diversification of the suburbs, and environmental justice. The United States is one of the most heavily urbanized places in the world, and its urban history is essential to understanding the fundamental narrative of American history. This book is an accessible overview of the history of American cities, including Indigenous settlements, colonial America, the American West, the postwar metropolis, and the present-day landscape of suburban sprawl and an urbanized population. It examines the ways in which urbanization is connected to divisions of society along the lines of race, class, and gender, but it also studies how cities have been sources of opportunity, hope, and success for individuals and the nation. Images, maps, tables, and a guide to further reading provide engaging accompaniment to illustrate key concepts and themes. Spanning centuries of America's urban past, this book's depth and insight make it an ideal text for students and scholars in urban studies and American history.

jane blasio news: *Migrants in the Digital Periphery* Matt Mahmoudi, 2025-02-04 As the fortification of Europe's borders and its hostile immigration terrain has taken shape, so too have the biometric and digital surveillance industries. And when US Immigration Customs Enforcement aggressively reinforced its program of raids, detention, and family separation, it was powered by Silicon Valley corporations. In cities of refuge, where communities on the move once lived in anonymity and proximity to familial and diaspora networks, the possibility for escape is diminishing. As cities rely increasingly on tech companies to develop digital urban infrastructures for accessing information, identification, services, and socioeconomic life at large, they also invite the border to encroach further on migrant communities, networks, and bodies. In this book, Matt Mahmoudi unveils how the unsettling convergence of Silicon Valley logics, austere and xenophobic migration management practices, and racial capitalism has allowed tech companies to close in on the final frontiers of fugitivity—and suggests how we might counteract their machines through our own refusal.

jane blasio news: *Force* Henry Petroski, 2022-09-20 An eminent engineer and historian tackles one of the most elemental aspects of life: how we experience and utilize physical force “Another gem from a master of technology writing.”—Kirkus Reviews *Force* explores how humans interact with the material world in the course of their everyday activities. This book for the general reader also considers the significance of force in shaping societies and cultures. Celebrated author Henry Petroski delves into the ongoing physical interaction between people and things that enables them to stay put or causes them to move. He explores the range of daily human experience whereby we feel the sensations of push and pull, resistance and assistance. The book is also about metaphorical force, which manifests itself as pressure and relief, achievement and defeat. Petroski draws from a variety of disciplines to make the case that force—represented especially by our sense of touch—is a unifying principle that pervades our lives. In the wake of a prolonged global pandemic that increasingly cautioned us about contact with the physical world, Petroski offers a new perspective on the importance of the sensation and power of touch.
