jordan math workbook: The Well-Trained Mind Susan Wise Bauer, Jessie Wise, 2024-04-02
The classic handbook on home schooling updated for a new generation of parents and students. Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educator Susan Wise Bauer outlines the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. A new optional Resource Recommendations Portal provides subscribers with curated lists of the best curricula for every grade level and learning style. Thousands of parents have already used the methods described in *The Well-Trained Mind* to create a truly superior education for children in their care. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.

jordan math workbook: Pieces of the Puzzle Morgan Bruce, 2016-01-11 For Alex and Carolyn, a simple swimming getaway after football trials turns into a parents' worst nightmare, when their younger son, nine-year-old Jordan, disappears. Within hours, they realise he's become the victim of some bizarre kidnapping plot, one without a ransom demand, just a strange note apologizing for the boy being taken. When Jordan is not quickly found, Alex and Carolyn's family begins to disintegrate. Most of the blame is placed on their twelve-year-old son, Joshua, who was supposed to be watching out for his younger brother. He now endures the brunt of his mother's anger. Almost a year later, the family is astounded when Jordan simply turns up at home to have breakfast, expecting everything to still be as it once was. However, amid all the mystery and rejoicing over his sudden and safe return, it appears the family will never return to normal. For a start, Jordan refuses to reveal where he's been the past year, apart from saying he was dying and was in a hospital, where he was "cured." Secondly, he talks of impossibilities, saying that he met his identical twin. He also begins to display surprising new abilities, including being able to play the piano and speak fluent French. The changes are so extreme that, as Alex and Carolyn try to put the mysterious Pieces of the Puzzle together, they come to suspect that the boy who returned is not really their son.
