john w cresswell 2023: *Expanding Approaches to Thematic Analysis* Jennifer R. Wolgemuth, Kelly W. Guyotte, Stephanie Anne Shelton, 2024-08-01 Expanding Approaches to Thematic Analysis: Creative Engagements with Qualitative Data springboards readers into a world where generating themes from qualitative data is a creative, experimental, and wondrous process! While no one ever said it had to be, thematic analysis is invariably described as a step-by-step process that involves coding. Yet qualitative data analysis is more than a technical procedure—it invokes imagination and inspiration—intuitional engagements that are as vital to the data analysis process as they are difficult to describe. This edited book begins with two premises: (1) there is more than one way to theme data, and (2) qualitative researchers do not have to code to get to themes. Each chapter introduces readers to a different approach to thematic analysis, explores that approach's theoretical and disciplinary roots, and illustrates how that approach can be used to generate themes. Approaches include annotating, memoing, storying, writing, composing poems, artmaking, meditating, and more, expanding conceptualizations of what themes and thematic analysis can be. The book also includes 'methodologies in action': helpful examples of creative theming from doctoral students and early career scholars. This book is as much a provocation for engaging thematic

analysis beyond/without/in addition to coding as it is a resource for anyone interested in the rationale, justification, and examples for doing so. As such, it is a source of inspiration for any qualitative student, researcher, and scholar who wishes to expand their repertoire of approaches to thematic analysis.

john w cresswell 2023: Re-Search Methods in Social Work Kimberly A. Calderwood, Dr. Marina Morgenshtern, Dr. Kathleen E. Absolon (Minogizhigokwe), 2024-04-30 Written from a critical theory, de-colonizing, and transformative lens, Re-Search Methods in Social Work: Linking Ways of Knowing to Knowledge Creation brings together in one space an introduction to four worldviews that inform what we call knowledge gathering, knowledge construction, knowledge co-creation, or re-search (depending on the worldview). This text presents a broad range of methods that are commonly used to inform social work practice across Turtle Island/Kanata/Canada, including the steps from inception to knowledge mobilization that are typically followed to acquire knowledge across Indigenous, (post)positivist, interpretivist, and transformative worldviews. This engaging text features reader-friendly language; integrated authorship that spans the four worldviews; discussions of various challenges, strengths, and limitations in bringing together multiple ways of knowing and associated methods; chapter learning outcomes; and discussion questions. john w creswell 2023: Qualitative Research in Malaysia Su Li Chong, 2025-03-11 This edited volume is a systematic collection of research initiatives in the qualitative research paradigm. It showcases how researchers in Malaysia, who are often expected to acquiesce to mainstream ways of designing, conducting and disseminating research, rise above methodological hegemony to carve out a different but meaningful path in order to represent the voice of the voiceless. In this book, accounts of paradigmatic shifts, applications of philosophical rigour and attention to values-laden inquiry demonstrate how qualitative research can be successfully conducted and reported, revealing insights which profoundly re-shape research design and address ethical sensitivities in social research. The conclusions drawn from the chapters form the rallying cry of qualitative researchers who acknowledge that it is their responsibility to enlighten those who are gatekeepers to the national research agenda, about the strength and legitimacy of the qualitative research paradigm. From a global standpoint, this book functions as a foil to show how in a context not systematically underpinned by critical dialogues of Western philosophy nor the ideology of research paradigms, significant considerations positioned within Eastern concepts of knowledge production can still thrive. The integration of both Eastern and Western perspectives at the crossroads of Asian-based qualitative research offers important lessons that are useful for supervisory, teaching and learning purposes. This volume will be relevant to qualitative research methodology educators and researchers from across the Sciences and Humanities as well as practitioners in any industry that involves human thought and behaviour.

Van Ryzin, 2014-03-24 The Second Edition of *Research Methods in Practice: Strategies for Description and Causation* sets an entirely new standard for presenting and learning research methods. The perspective gained from this text makes it a truly necessary tool for such applied disciplines as public affairs and administration, public policy, psychology, urban affairs, education, sociology, social work, business, public health, political science, economics, communications and criminal justice. Imbued with a deep commitment to make social and policy research methods accessible and meaningful, the Second Edition of *Research Methods in Practice: Strategies for Description and Causation* compels and inspires students to truly grasp the logic—and limits—of the latest research appearing in academic journals, government reports, and the media. Authors Dahlia K. Remler and Gregg G. Van Ryzin cover the most pertinent issues and methods, emphasizing the critical interpretation and practical application of research findings. Both causation and description—and the distinction between them—are emphasized and maintained thematically throughout the text. Concepts are taught through in-depth examples, such as "Fighting Malaria in Kenya," "The U.S. Poverty Measure," "The Fallout from Hurricane Katrina," "Family Dinners and Teenage Substance Abuse," and "The Effect of Poverty on Mental Health." The realistic trade-offs, uncertainties, habits,

and excitement of the research experience come through on every page. "This is the best text available for teaching students the fundamentals of research design and statistics, and for introducing them to the difficulties inherent in evaluation research and causal inference." —Dave E. Marcotte, University of Maryland, Baltimore County
