

kent hovind dinosaurs

kent hovind dinosaurs are a topic of considerable interest in the creationist community and among those studying alternative views on paleontology. Kent Hovind is a well-known figure in young Earth creationism who challenges mainstream scientific interpretations of dinosaurs and their history. His teachings and lectures propose that dinosaurs lived alongside humans and were created by God during the six days of creation as described in the Bible. This article explores Kent Hovind's views on dinosaurs, the arguments he presents, and how his interpretations contrast with conventional paleontological science. It also examines the impact of Hovind's theories on the broader debate about the origin and extinction of dinosaurs. Readers will gain a comprehensive understanding of Kent Hovind dinosaurs within the context of creationist beliefs and scientific discourse.

Kent Hovind's Background and Creationist Views

Kent Hovind is a prominent creationist known for his advocacy of young Earth creationism, which asserts that the Earth and all life were created by God in six literal 24-hour days approximately 6,000 to 10,000 years ago. His background includes a doctoral degree in Christian education, and he founded the Creation Science Evangelism ministry to promote his views. Hovind's work focuses on challenging evolutionary theory and promoting biblical literalism, especially regarding the origins of life, geology, and fossils. His teachings often include detailed critiques of mainstream science, presenting an alternative framework that aligns with a literal interpretation of the Bible.

Hovind's Interpretation of Dinosaurs

Kent Hovind's interpretation of dinosaurs is rooted in his young Earth creationist beliefs. He argues that dinosaurs were created by God on the sixth day of creation alongside other land animals and humans. According to Hovind, dinosaurs coexisted with humans and were part of the original creation, not creatures that lived millions of years ago. He also suggests that many dinosaurs survived the biblical Flood described in the book of Genesis and that some may have been referenced in ancient texts and folklore. Hovind disputes the scientific dating methods used to determine the age of dinosaur fossils and challenges the evolutionary timeline that places dinosaurs' extinction 65 million

years ago.

Dinosaurs and the Biblical Timeline

Hovind places dinosaurs within the biblical timeline, arguing that the fossil record is misinterpreted due to assumptions based on evolutionary theory. He claims the global Flood, as described in Genesis, was responsible for the rapid burial and fossilization of dinosaurs and other creatures. This catastrophic event, he asserts, explains the fossil strata without requiring millions of years. Hovind's timeline compresses the history of dinosaurs to a few thousand years, consistent with a literal reading of the Bible.

Living Dinosaurs and Modern Creatures

Kent Hovind also promotes the idea that some modern animals, such as large reptiles like alligators and crocodiles, are descendants or relatives of dinosaurs, suggesting a continuity that defies conventional extinction narratives. Additionally, he points to reports of alleged living dinosaurs or dinosaur-like creatures as evidence that dinosaurs may still exist today, although these claims lack scientific verification.

Arguments Presented by Kent Hovind About Dinosaurs

Kent Hovind presents several key arguments to support his views on dinosaurs, challenging mainstream paleontology and evolutionary biology. His arguments often focus on perceived inconsistencies in scientific dating methods, the interpretation of fossil evidence, and the reliability of the evolutionary timeline.

- **Questioning Radiometric Dating:** Hovind argues that radiometric dating techniques are flawed and unreliable, leading to incorrect conclusions about the age of fossils and the Earth.
- **Fossils as Evidence of the Flood:** He claims that the fossil record is best explained by the biblical Flood, which rapidly buried organisms and created fossil layers.
- **Dinosaurs in Historical Records:** Hovind points to ancient myths, legends, and artwork that depict dragon-like creatures as evidence that humans and dinosaurs coexisted.
- **Soft Tissue in Dinosaur Fossils:** He cites discoveries of soft tissue in dinosaur bones as proof that these fossils are much younger than mainstream science suggests.
- **Misinterpretation of Geological Layers:** Hovind asserts that geological strata have been misread due to evolutionary bias, and the layers do not represent millions of years but rather rapid deposition events.

Scientific Perspectives on Dinosaur History

Mainstream science, based on extensive evidence from paleontology, geology, and radiometric dating, places dinosaurs' existence between approximately 230 and 65 million years ago, during the Mesozoic Era. Scientists agree that dinosaurs became extinct at the end of the Cretaceous Period, likely due to a combination of catastrophic events such as asteroid impact and volcanic activity. The fossil record is interpreted as a timeline of gradual biological evolution and extinction, supported by multiple independent dating methods.

Radiometric Dating and Fossil Evidence

Radiometric dating, which measures the decay of radioactive isotopes in rocks and fossils, consistently shows that dinosaur fossils are millions of years old. These methods have been cross-verified with different isotopes and geological data to provide reliable age estimates. The stratification of rock layers and fossil distribution supports a long evolutionary history.

Extinction Theories

Scientific consensus holds that a mass extinction event, triggered by an asteroid impact near the Yucatan Peninsula and other environmental factors, ended the reign of non-avian dinosaurs. This extinction allowed mammals and eventually humans to evolve. The evidence includes iridium layers, shocked quartz, and the Chicxulub crater.

Impact of Kent Hovind's Dinosaur Teachings

Kent Hovind's teachings on dinosaurs have had a significant impact within creationist circles, influencing how some communities view the history of life on Earth. His lectures, videos, and written materials have contributed to debates on science education and the teaching of evolution in schools. Hovind's approach promotes skepticism towards established scientific methods and encourages alternative interpretations based on biblical literalism.

- Promotion of creation science and young Earth views
- Influence on homeschooling and religious education curricula
- Contribution to the ongoing debate between creationism and evolution
- Controversy in scientific and educational communities

Common Criticisms and Controversies

Kent Hovind's views on dinosaurs and young Earth creationism have been widely criticized by

scientists, educators, and skeptics. Critics argue that his interpretations lack empirical support and often misrepresent or misunderstand scientific data. Many point out that his rejection of radiometric dating and evolutionary biology contradicts extensive evidence. Furthermore, Hovind's legal and financial controversies have sometimes overshadowed his scientific claims, affecting his credibility in broader discussions.

Scientific Critiques

Experts emphasize that Hovind's claims do not align with established scientific methodology and peer-reviewed research. The consensus in the scientific community is that the evidence for an ancient Earth and the evolutionary history of dinosaurs is robust and reproducible.

Educational and Legal Issues

Hovind's promotion of creationism in public education has raised legal questions regarding the separation of church and state. His ministry has faced scrutiny over his qualifications and the accuracy of his scientific assertions. These controversies have fueled debate over the role of religious beliefs in science education.

Frequently Asked Questions

Who is Kent Hovind?

Kent Hovind is a Christian fundamentalist evangelist known for promoting young Earth creationism and disputing mainstream scientific views on evolution and the age of the Earth.

What is Kent Hovind's position on dinosaurs?

Kent Hovind argues that dinosaurs lived alongside humans and that they were created by God during the creation week, rejecting the mainstream scientific consensus that dinosaurs lived millions of years ago.

Does Kent Hovind believe dinosaurs existed millions of years ago?

No, Kent Hovind rejects the idea that dinosaurs lived millions of years ago, claiming that they existed only a few thousand years ago based on a literal interpretation of the Bible.

How does Kent Hovind explain dinosaur fossils?

Kent Hovind claims that dinosaur fossils were formed rapidly during the biblical Flood described in the story of Noah, rather than over millions of years through natural processes.

What is the 'dinosaur controversy' according to Kent Hovind?

Kent Hovind describes the dinosaur controversy as a conflict between mainstream science, which supports evolution and an ancient Earth, and his creationist views that dinosaurs coexisted with humans and were created recently.

Has Kent Hovind created educational materials about dinosaurs?

Yes, Kent Hovind has produced videos, lectures, and seminars promoting his young Earth creationist views on dinosaurs and other scientific topics.

What scientific criticisms are made against Kent Hovind's dinosaur claims?

Scientists criticize Kent Hovind's claims for lacking empirical evidence, misinterpreting scientific data, and ignoring extensive fossil records and radiometric dating that support dinosaurs living millions of years ago.

Are Kent Hovind's views on dinosaurs accepted by the scientific community?

No, Kent Hovind's views are not accepted by the scientific community, which overwhelmingly supports the evidence for evolution and the ancient age of dinosaurs.

Where can I find more information about Kent Hovind's views on dinosaurs?

More information on Kent Hovind's views can be found on his official website, his video lectures, and creationist organizations that promote young Earth creationism.

Additional Resources

1. Dinosaurs and the Bible: Exploring Kent Hovind's Creationist Views

This book delves into Kent Hovind's interpretation of dinosaurs within a biblical framework. It explores his arguments for a young Earth and how he reconciles dinosaur fossils with the Genesis creation account. Readers will gain insight into the creationist perspective on paleontology and the challenges it poses to mainstream science.

2. The Hovind Debate: Dinosaurs, Evolution, and Creationism

Focusing on Kent Hovind's public debates, this book reviews his key points regarding dinosaurs and evolution. It includes transcripts and analyses of debates where Hovind challenges evolutionary timelines. The book provides a balanced view of creationist claims and scientific counterarguments.

3. Dinosaurs in the Garden of Eden: Kent Hovind's Teachings on Prehistoric Life

This volume examines how Kent Hovind incorporates dinosaurs into the biblical story of creation. It discusses his claims about dinosaurs living alongside humans and the implications for understanding

Earth's history. The book also addresses common questions about dinosaur extinction from a creationist standpoint.

4. *Kent Hovind's Dinosaur Dilemma: Science vs. Scripture*

A critical look at the scientific evidence for dinosaurs and how Kent Hovind interprets these findings through a literal reading of the Bible. This book explores the tension between fossil records and Hovind's creationist teachings. It aims to provide clarity on both sides of the dinosaur debate.

5. *Dinosaurs, Flood, and Faith: Kent Hovind's Perspective on Earth's Past*

This book explores Kent Hovind's views on the global flood and its effects on dinosaur fossils. It presents his arguments that many dinosaur remains were buried during the biblical flood event. The narrative connects geological phenomena with scripture as explained by Hovind.

6. *Uncovering Kent Hovind's Dinosaur Arguments: A Creationist Approach*

An in-depth analysis of Kent Hovind's main claims about dinosaurs and their place in Earth's history. The book reviews his use of scientific data, biblical texts, and interpretations to support creationism. It serves as a resource for understanding creationist dinosaur theories.

7. *Dinosaurs Through the Lens of Kent Hovind: A Young Earth Viewpoint*

This book presents a comprehensive overview of Kent Hovind's young Earth creationist views related to dinosaurs. It covers topics such as dinosaur biology, extinction, and coexistence with humans, based on Hovind's teachings. The book also discusses the implications of a young Earth for paleontology.

8. *Kent Hovind and the Dinosaur Controversy: Challenging Evolution*

Highlighting the controversies ignited by Kent Hovind's claims, this book examines his role in the creationism vs. evolution debate regarding dinosaurs. It provides context on how his teachings have influenced public opinion and education. Readers will find discussions on scientific critique and creationist responses.

9. *Dinosaurs, Creation, and Kent Hovind's Ministry*

This book explores how Kent Hovind incorporates dinosaurs into his broader ministry and educational outreach. It discusses his use of dinosaur-related topics to promote creationism and challenge evolutionary science. The book offers insight into the impact of his work on the creationist movement.

kent hovind dinosaurs: Fire-Breathing Dinosaurs? The Hilarious History of Creationist Pseudoscience at Its Silliest Philip J. Senter, 2019-03-14 A dinosaur book like no other, this irreverent chronicle of science and pseudoscience takes the reader on a journey through numerous bizarre ideas about ancient reptiles. Were dragon legends inspired by human encounters with fire-breathing dinosaurs? Do the Bible and other ancient works of literature and art depict

dinosaurs? Astoundingly, those and other strange notions have infiltrated grade-school science textbooks. This exposé unmasks the errors that underlie such notions and reveals the science that flattens them, while treating readers to explanations of rocket fuel, nuclear power plants, the electric eel's shocking capabilities, and how the young-Earth creationist position contradicts the very scripture that it strives to uphold. Finding humor in absurdity, the book shows fans of science, religious studies, folklore, and fire that young-Earth creationist dinosaur pseudoscience is deeply comic once one gets to know it properly.

kent hovind dinosaurs: [The Real Story of Dinosaurs and Dragons](#) Philip J. Senter, 2025-02-11 Are there dinosaurs in the Bible? Are dragon legends based on human encounters with fire-breathing dinosaurs? A vast and ever-growing body of literature proclaims that the answer to both these questions is yes. The Real Story of Dinosaurs takes readers on a madcap journey through science, folklore, and anti-evolution propaganda to explore the origin and evolution of these ideas and how we know they're wrong. The journey begins with the origin of the dragon in ancient myth and continues through the astounding fossil discoveries of more recent times. Dr. Senter examines a plethora of bizarre claims about dinosaurs and uses knowledge from modern scholarship to set the record straight. He also explores proposed mechanisms for fire-breathing in dinosaurs and tries them in a court of science. Along the way, readers are treated to explanations of rocket fuel, nuclear power plants, carnival fire-eating, the electric eel's shocking capabilities, and what's up a crocodile's nose. Written in a playful spirit of discovery, The Real Story of Dinosaurs entertains as it promotes evidence-based reasoning and illustrates the differences between science and anti-evolution hype.

kent hovind dinosaurs: *Dinosaurs by the Decades* Randy Moore, 2014-07-23 Providing an appealing chronology of all things dinosaur, this book covers these ancient creatures' roles and surprising importance in science, religion, and society at large. This exhaustive, up-to-date book contains more than 2,000 entries about dinosaurs and dinosaur-related topics. It provides not only detailed information about their discovery, underlying science, and recent technologies and theories but also encompasses all of the facets of dinosaurs in society—for example, their use in consumer marketing and promotion, popularization of dinosaurs in the media, as proof for both evolutionists and creationists to substantiate their claims about life's origins, and as cultural artifacts. Organized chronologically, the book offers an informative and entertaining timeline of how dinosaurs have appeared in science, religion, and society since they were discovered in the 1800s, covering everything from dinosaur museum displays to how dinosaurs served advocates of young-Earth creationism. This fascinating work enables a broad appreciation for the surprising significance of dinosaurs in many aspects of our daily lives and modern society.

kent hovind dinosaurs: Behold Now Behemoth: Dinosaurs All over the Bible! Glenn L. Wilson, 2011-10-10 Have dinosaurs always lived with man? The Bible clearly shows the answer is yes! God created these great creatures and gave man dominion over them. Esau domesticated them. Nehemiah rode them. Ancient armies appear to have fought from them or along side them. People used them for labor and even ate them! Behemoth, Tanniy, Yownah, Chamowr the pages of the Bible in its original languages finally reveals the truth about dinosaurs and man in some incredibly wonderful ways! The lying doctrines of evolution claiming billions of years and man never saw a dinosaur are shown to be what they are lies designed to deceive men into believing the Bible is not true. Men today see the bones of these creatures in museums and wonder, If the Bible is true, why are there no dinosaurs found in its pages?. After many centuries of the Bible existing in English, God gets the glory for His second-most magnificent creation next to man: the great dinosaurs!

kent hovind dinosaurs: Abominable Science! Daniel Loxton, Donald R. Prothero, 2013-08-06 "A sharp analysis of the quest for unreal critters—cryptids, as they are called—and the people who pursue them . . . entertaining and thoroughly documented." —The Wall Street Journal Throughout our history, humans have been captivated by mythic beasts and legendary creatures. Tales of Bigfoot, the Yeti, and the Loch Ness monster are part of our collective experience. Now comes a book from two dedicated investigators that explores and elucidates the fascinating world of

cryptozoology. Daniel Loxton and Donald R. Prothero have written an entertaining, educational, and definitive text on cryptids, presenting the arguments both for and against their existence and systematically challenging the pseudoscience that perpetuates their myths. After examining the nature of science and pseudoscience and their relation to cryptozoology, Loxton and Prothero take on Bigfoot; the Yeti, or Abominable Snowman, and its cross-cultural incarnations; the Loch Ness monster and its highly publicized sightings; the evolution of the Great Sea Serpent; and Mokele Mbembe, or the Congo dinosaur. They conclude with an analysis of the psychology behind the persistent belief in paranormal phenomena, identifying the major players in cryptozoology, discussing the character of its subculture, and considering the challenge it poses to clear and critical thinking in our increasingly complex world. "As valuable for its analysis of the hunted as it is for the light it shines on the still-hopeful hunters." —Publishers Weekly "Highly recommended for readers looking for scientific but accessible evaluations of the existence of five notable cryptids that have captured our imaginations." —Library Journal (starred review)

kent hovind dinosaurs: Foundational Falsehoods of Creationism Aron Ra, 2016-10-01 Religious fundamentalists and biblical literalists present any number of arguments that attempt to disprove evolution. Those with a sympathetic ear often fail to critically examine these creationist claims, leading to an ill-informed public and, perhaps more troubling, ill-advised public policy. As Aron Ra makes clear, however, every single argument deployed by creationists in their attacks on evolution is founded on fundamental scientific, religious, and historical falsehoods—all of them. Among their most popular claims is that evolution is a religion, that there are no transitional species, that there are no beneficial mutations, and that supposedly sacred scripture is the infallible word of God. Yet, as the evidence and data plainly show, each of these claims is demonstrably and unequivocally false. There is simply no truth to creationism whatsoever, and the entire enterprise rests on a foundation of falsehoods. This book explains and exposes the worst of these lies, and should be read by all who honestly care about following the evidence no matter where it might lead in pursuit of the truth.

kent hovind dinosaurs: Jesusland Joelle Kidd, 2025-08-12 An empathetic, funny, and sharply critical collection of essays exploring the Christian pop culture of the 2000s and its influence on today's politically powerful evangelicalism "Braiding relentless curiosity, sharp argument, and wry comedy, Kidd offers a lucid critique of evangelicalism that is always attentive to, and respectful of, the mysteries of faith. This is cultural criticism at its finest. I'll read anything Kidd writes." —Tajja Isen, author of *Some of My Best Friends* In 1999, after three years of secular living in Eastern Europe, Joelle Kidd moved back to Canada and was enrolled in the strange world of an evangelical Christian school. Immediately, she found herself in a strange world of upbeat Christian pop music, purity education, and desperately trendy Bible redesigns, trying to make sense of this unfamiliar preteen cultural landscape. In *Jesusland*, Joelle writes about the Christian pop culture that she was suddenly immersed in, from perky girl bands to modest styling tips, and draws connections between this evangelical subculture and the mainstream, a tense yet reciprocal relationship that both disavows the secular while employing its media markers. But none of this was just about catchy songs; every abstinence quiz in a teen magazine was laying the foundation for what would become a conservative Christian movement that threatens women's healthcare, attacks queer and trans rights, and drives present-day political division. Through nine incisive, honest, and emotional essays, *Jesusland* exposes the pop cultural machinations of evangelicalism, while giving voice to aughts-era Christian children and teens who are now adults looking back at their time measuring the length of their skirts, and asking each other if their celebrity crush was Christian enough. With care and generosity, *Jesusland* shows us how the conservative evangelical movement became the global power it is today by exploring the pop culture that both reflected and shaped an entire generation of young people.

kent hovind dinosaurs: God's Cops James Estrada, Willie Newkirk Jr., 2013-09-20 First lets look at the Hoyle comparison: a typical Boeing 747-400 has about 6 million parts. The typical human genome is an organisms complete set of DNA. Genomes vary widely in size: the smallest known genome for a free-living organism (a bacterium) contains about 600,000 DNA base pairs, while human and mouse genomes have some 3 billion. Except for mature red blood cells, all human cells contain a complete genome. DNA in the human genome is arranged into 23 distinct chromosomes--physically separate molecules that range in length from about 50 million to 250 million base pairs (Unknown, 2011). Lets say despite the fact that people have three billion base pairs that are aligned perfectly and a 747 is only 6 million parts, but for purposes of this discussion lets say that we are only as complex as the 747. OK, here is the problem: first, a 747 was designed, without designers and builders there would be no 747. Remember the analogy I gave of removing the distributor cap from a car and throwing it at the engine and then expecting it to run? You and I have consciousness and we can build a 747. A 747 does not have consciousness and cant build a human. In fact, we are far more sophisticated than a 747 and we cant build a human from the ground up yet. Now detractors would say of course you can build a 747 because you have many more parts that comprise you that make you and you are an intelligent being. All true making me more complex than a 747 and thus more likely to have been designed than the 747, and we all know the 747 was designed. Not just designed by someone in a garage to get us by, engineered to stringent standards taking into account all the forces, stresses and elements it was going to encounter on Earth. Now remember: you are expected to believe that this thing (the 747) that was engineered and is less sophisticated than you are came about by engineering, but you who is realistically at least eight times more complex came about by random chance and mutation. Has anybody ever seen a Cessna randomly mutate into a 747? If we go around randomly killing Cessnas, will they mutate into F-18s so they can get away or fight back? You can argue faster Cessnas might survive more often than slower Cessnas but they are all still Cessnas. However, the faster Cessnas will only survive if they are piloted by people. Further, if we squeeze more and more people into the Cessna that still wont make it a 747. The Earth is covered over by 75% water. Why not 30%? Why not 100%? Because of the oceans we have are perfect amount of salt to produce the right amount of rainfall, otherwise Earth would either be a desert or a water world. The Earth is covered by salt water over the majority of its surface, water that is undrinkable to humans. Were it not for the formation of vast amounts of freshwater, we would not be here. Why is there any freshwater? Why isnt it all freshwater? The Earths composition allows for human life to survive in every location upon it naturally with the exception of Antarctica. Remember one thing from the first time you boiled water: salt water freezes at a lower temperature and boils at a lower temperature. This means salt water evaporates at a lower temperature. If the oceans were all fresh water there would be a lot less water vapor in the air and less rain. In order to have more water vapor in a world with freshwater oceans you would need more of it to be exposed to the sun, which means more of the planet would need to be water. It seems we have just the right balance of salt water and salinity of that salt water to make rain, and just the right balance of freshwater to survive. The Earth might well roll around on its axis but for a single large moon to stabilize its orbit and provide tidal changes. If the oceans had been bigger the tidal effect would have been greater and much of the life that relies on tides would not exist. The Earth has an atmosphere that protects us from radiation and keeps

kent hovind dinosaurs: The Scientific Case Against Scientific Creationism Jon P. Alston, 2003-09 Sociologist Jon P. Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution. He demonstrates how scientific creationists accept non-scientific statements that

contradict established scientific knowledge. Acceptance of anti-evolutionary knowledge also demands acceptance of a literal six-day creation and other statements contradicting scientific findings. Few persons have read so closely the writings of scientific creationists to illustrate how anti-scientific anti-evolutionists become when they criticize the fact of evolution. Creationists are forced to develop just-so stories to defend their literal interpretations of Biblical scripture. Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles.

kent hovind dinosaurs: Encyclopedia of Cryptozoology Michael Newton, 2016-10-05 On every continent and in every nation, animals unrecognized by modern science are reported on a daily basis. People passionately pursue these creatures--the name given to their field of study is cryptozoology. Coined in the 1950s, the term literally means the science of hidden animals. When the International Society of Cryptozoology (ISC) was formed in 1982, the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur (either now or in the past) as well as the unknown persistence of presumed extinct animals to the present time or to the recent past...what makes an animal of interest to cryptology is that it is unexpected. This reference work presents a flesh and blood view of cryptozoology. Here, 2,744 entries are listed, the majority of which each describe one specific creature or type of creature. Other entries cover 742 places where unnamed cryptids are said to appear; profiles of 77 groups and 112 individuals who have contributed to the field; descriptions of objects and events important to the subject; and essays on cryptotourism and hoaxes, for example. Appendices offer a timeline of zoological discoveries, annotated lists of movies and television series with cryptozoological themes, a list of crypto-fiction titles and a list of Internet websites devoted to cryptozoology.

D., 2014-09-06 In this book, we will discover the most accurate account of creation as taught from Scripture and verified by science. We will leave no stone unturned as we venture through the following fields of study: Stratigraphy, Meteorology, Obliquity, Dinosaurs, The Fossil Record, Star Light, Greek, Hebrew, Angelology, Creation, the Fall, History, and Theology. In this book, the Gap Theory Model of Creation will not only take the stand, but give answers to all the charges it has been accused of by the Young Earth Creation Science Movement (YECSM). Furthermore, the Gap Theory will provide a workable model that functions properly with both the Bible and Geology. See in this amazing book how the Bible reached out thousands of years ahead of the YECSM, Modern Science, and Geology providing Answers to the following questions: · Does Let, Made, Formed, and Create all mean the same thing? · Does Replenish in Genesis 1:27 mean "fill"? · Does Genesis 1:2 really describe an unformed and unfilled earth? · Were angels really created in the Six-Day Narrative? · Does the Bible really say that the material universe was created in the Six-Day Narrative? · Was Adam immortal before his fall? · Is there a workable model in Biblical Creation for Modern Geology? · Did the Geologic Column form in the Noahic Flood? · Is the YECSM from within or without Mainline Christianity? · Does our Creation Doctrine affect other doctrines? · Is Creation a part of God's qualitative attributes, or is it just limited to the Six-Day Narrative? · Is it logical or illogical to propagate an Appearance of Age Theory when defending a Young Earth? · Did the Bible writers teach an Old or Young Earth? · When was the Creation made subject to vanity? Pre- or Post- Fall? · Could the early Church have grasped modern-day interpretations of Creation? · Are the leaders of the YECSM qualified to represent Christianity to the world's intellectual communities? We've seen the Fundamentalist Church of Jesus Christ of Latter Day Saints in the news, the underage brides in pioneer dresses on a Texas ranch. But the FLDS is just one of many groups that have broken with mainstream Mormonism to follow those parts of Joseph Smith's doctrine disavowed by the LDS Church. Gaining unprecedented access to these communities, journalist

Sanjiv Bhattacharya reveals a shadow country teeming with small town messiahs, dark secrets, and stories both heartbreaking and strange. Polygamy's dark side--incest, forced marriages, and physical abuse--is laid bare. But Bhattacharya also finds warmth in the fundamentalist diaspora and even finds himself taking an ideological stand for polygamy's legalization. More than just an expose of Mormon polygamy, *Secrets and Wives* is the personal journey of a foreign atheist and liberal, a stranger in a strange land who grapples with hard questions about marriage, monogamy, and the very nature of faith.

kent hovind dinosaurs: From Flood to Fallen Kingdoms Jarno Moilanen, 2025-05-13 From Flood to Fallen Kingdoms (FFFK) is the first truly authoritative, detailed and coherent, young-earth creationist overview of the post-flood history of the ancient Near East (and the land of Israel), for laypersons and scholars alike. It is a unique work which does not have serious rivals in the biblical-creationist book market. The lack of a good and comprehensive introductory book was the main reason why I started to write the book in the first place. I have made use of the best available scholarly literature, Christian as well as secular. The book contains a lot of my own research, but it is also in very good agreement with the archaeological articles written by A. J. M. Osgood (can be read at creation.com) and the books of David Down (Unwrapping the Pharaohs and Unveiling the Kings of Israel), for example. FFFK follows the absolute chronology of Floyd Nolen Jones' *The Chronology of the Old Testament*. As a Bible-faithful narrative introduction to the history and archaeology of the ancient Near East, From Flood to Fallen Kingdoms is far better than the existing apologetic works that come towards the genre of FFFK (Evidence for the Bible by Clive Anderson and Brian Edwards; Ancient Post-Flood History by Ken Johnson; The World's Story 1: The Ancients by Angela O'Dell, for example). From Flood to Fallen Kingdoms will strengthen the faith of numerous believing readers who take the Holy Scriptures seriously. They will also be surprised to see how well the first five post-flood centuries, from Ararat to Abraham, which until now have been in great darkness, can be elucidated through proper interpretation of biblical and archaeological evidence.

You see, what a person believes determines how they behave. So if we teach our kids that they supposedly came from an ape, then why are we surprised when they act like apes? Therefore, *A Special Creation* takes a look at not only the Scriptural facts, but the hardcore facts of science, reason, and logic to dispel this lie that we evolved from the goo, to the zoo, to me and you! *A Special Creation* clearly reveals that a Special God created us for a special purpose; to enjoy a special relationship with Him. But not only that, you will actually hear direct quotes from the evolutionists themselves saying that yes, we very well could have *A Special Creation*!

kent hovind dinosaurs: *Dancing with Jesus* Doug Curnayn, 2012-09 This book explores subjects like faith, works, politics, evolution, creation, racism, abortion, sexual, drug, and alcohol addiction, charismatic and traditional beliefs, miracles, why believe the Bible, does God exist, the carnal man, the Christian man, the rise of militant homosexuals, what was the Beginning, and does God send people to hell who don't have Jesus in their heart even if they never heard of Him? *Dancing*

with Jesus by Doug Curnayn will show you new ways of thinking that you may not have considered before. It just may cause you to realize that you're not a real Christian, but only a religious person who thinks you are one. It could show you the way to the salvation of your eternal soul. You owe it to yourself to check it out. Don't pretend your way to hell. Be sure of your salvation. It's the most important thing you will ever do. Even if you don't need this book, go ahead and buy it, and give it to someone who does need it.

kent hovind dinosaurs: *Calling Jacob: Commentary in Isaiah* Jonathan Malone, 2020-10-27
Commentary of Isaiah 30-35. Prophetic studies in the book of Isaiah reveal difficult times ahead for the Modern State of Israel. Welcome to the Apocalypse. Monstrously, the Beast looms over Jerusalem. Pouncing, he scatters the Jews. Defenders valiantly counterattack, but, alas, how desperate. The streets are in ruin. The Iron Kingdom has metastasized over the earth. All seems lost when, suddenly—What is that light approaching in the sky? The Tribulation Period, the Antichrist, the Salvation of the Jews, and the Second Coming are compelling topics, but author Jonathan Malone has more on his mind. He also fights a desperate battle, defending the Masorah from a gruesome horde in clerical collars and caps and gowns.
