mike adams natural news: The “Nonsense” Papers James W. Astrada, 2021-08-02 Over the past two years a pandemic has gripped the planet in fear with lockdowns, restrictions, and a transition into a unknown future with transhumanism at its helm. While the flow of information has been heavily censored and controlled by a new fact checker system, humanity seemingly is only getting one side of the story. The SARS-Cov2 has been manipulated by the mass media keeping people locked in their homes afraid to go out. Controversial theories including this virus being imaginary and that the virus was engineered to control the world population are at the helm of the argument. Part one of the third installment of the series questions the state of humanity's future and the fate of our very race with our environmental habits, vaccines and their supposed purpose, what it means to be human and our beliefs. Has humanity reached its zenith? With the 2030 agenda pushed by the United Nations and their praise for what some are calling the scamdemic/plandemic as a means of starting over, is humanity to begin what most are calling the Great Reset? Is the next stage in our evolution dominated by RFID implanted chips, vaccine passports with the promise of returning to a normal life, and a biotechnology? The horizon in humanity's future seems mysterious and hidden.

mike adams natural news: *Invisible Eugenics* Mark M. Rich, Wealthy eugenicist-psychopaths have launched a covert eugenics program to reduce the population. They are attacking citizens with chemical weapons disguised as medicine, which slowly inflict many devastating medical conditions. The victims suffer a reduced lifespan and are removed from the breeding pool. They have established complete control of the public schools which have been transformed into eugenic laboratories. These laboratories are used to identify and destroy any positive values that might foster individual development and to identify those to be attacked. The teachers and doctors are on the frontline working together to identify the resisters who are attacked for life with chemical weapons under the guise of medical treatment. There is a highly coordinated worldwide coverup of the deaths and injuries caused by these weapons. This population control agenda can be traced back to the late 1800s, when they vowed to eliminate certain bloodlines to purify the human race.

mike adams natural news: Cow Killing And Beef Export Dr. Sahadeva Das, 2018-01-01 We are trying to fool nature, forgetting that nature can not be fooled. mike adams natural news: God Abby Eagle, 2015-11-18 In 1984 I took Sannyas with Osho, a contemporary mystic, and soon after was introduced to NLP and Hypnotherapy. Osho gave me a breadth and depth of knowledge about religion, and an experience of meditation that I would never have been able to find through normal channels. Most importantly, Osho taught me not to rely upon borrowed knowledge but to make your own existential inquiry into truth - to challenge everything for the ultimate Truth - and Neuro Linguistic Programming (NLP) and Hypnosis gave me the tools to do just that. I have attempted to present to the reader a new way of understanding faith healing, placebo, mind-body healing, conscious mind, unconscious mind, ego, religion, spirituality, channelling, angels, god, devil, heaven, hell, near death experiences, spiritual experiences and enlightenment - from the framework of NLP, hypnosis, meditation and the science of flow states. The book was written over a period of eight years which gave me time to continually update the notes until it takes the form that you see it now. It explores the concept that we are the meaning maker - that we are the one who give meaning to events that occur in the world; we are the one who gives meaning to the experiences that we have, and to the experiences that others have - meaning is not inherent in the event - we create the meaning - we are the meaning maker. Sometimes that meaning serves us, sometimes it does not. Sometimes that meaning serves us but does not serve

others. The book explores the process of giving prestige, of adulation and worship. Of how we may be too quick to create fiction and fantasy based upon ideas that we hold in mind. Of how we may be looking in the wrong direction to find God. However, this book is not a book about God – it is a book based upon my own existential experience. I wrote the book, in part because it maps out my own personal inquiry into truth – and because I want to help wake people up to themselves such that they might realise their true potential – whether you call that Self Realisation, Enlightenment or Self Actualisation. “The unconscious mind is like a silent partner, that is always present, knows your every thought and your every desire, has the power to affect both body and mind at the core of your being, and is always ready to help you, as long as you should just communicate in the right way. Hmm... sounds much like God.” Abby Eagle

mike adams natural news: Covid-19 Janice M. Barlow, 2021-06-21 COVID-19: An America Changed looks back at the virus that transformed the world. Janice M. Barlow zeroes in on the day-to-day impact the virus has had on society, including debates about our response to the pandemic. She argues that some of the sticking points are old issues with new names, while others are new—especially for most of us who have never lived through a pandemic. Drawing on interviews of ill individuals, as well as data from news reports, the author paints a detailed picture of how mandates were enforced, testing was conducted, and information (and misinformation) was circulated. She also shares her own experience of getting sick in early 2020 and not being sure of its cause. For weeks, she was exhausted and miserable. While God is not the focus of this monograph, it poses an important question that should be top of mind: Where will your heart be when you meet God on the other side?

mike adams natural news: The Vaccine Crime Report Dr. Kamalpreet Singh, 2022-09-03 Dr. Kamalpreet Singh spent countless hours on vaccine research. He studied thousands of research papers, read hundreds of books, interviewed dozens of medical doctors, and watched many vaccine documentaries that are now censored. After extensive research, he came to a conclusion that all the current vaccines are ineffective, unsafe and may lead to serious health complications like autism, development disorders, asthma, allergies, diabetes type-1, and even death. The Vaccine Crime Report gives you access to the findings of credible scientific studies published in prestigious medical journals that refute the claim that vaccines are safe and effective. The information in this book is extremely important for every person especially parents who wish to make an informed decision about their child's health.

mike adams natural news: Screening Sandy Hook Deanna Spingola, 2015-02-03 Most parents would never consider dispensing deadly addictive street drugs to their children but if a trusted physician writes a prescription for an FDA-approved schedule 2 medication for their two-year old based on some questionable mental health screening, those unwary parents do not question or object. Despite side effect warnings, regularly revealed during TV ads, parents frequently fail to take those warnings seriously, perhaps presuming that the side effects are happenstance or rarely occur. Over the decades, because organized psychiatry, represented by the American Psychiatric Association (APA), convened numerous consensus panels that designed hundreds of non-biologically-based disorders for its Diagnostic and Statistical Manual of Mental Disorders (DSM) especially suitable for the pill-for-every-ill pharmaceutical industry that conceivably already had many profitable solutions for the disorders, in the pre-production process. The consequences have been disastrous with no discernable end in sight some people taking prescription drugs or withdrawing from them have perpetrated school, mall and public shootings. That is in addition to thousands of suicides that the public never hears about, unless the victim is a well-known public figure like Robin Williams. Just the military-related suicide rate is 8,000 per year untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the VA. The government is big pharma's largest customer. In addition to the homicides and suicides, irreversible brain damage results from drug remedies to temporary problems that might have been easily resolved through compassionate interaction and talk therapy. Despite the claims that drugs were not a factor in the Sandy Hook mass murders, certain circumstances provide a different

picture. Adam Lanza, always a unique individual, changed from being a geeky, weird kid to being a mass murderer, not of people his own age, but of beautiful, vulnerable children feeling secure in their classrooms in a sleepy bedroom community in Connecticut.

mike adams natural news: Global Data Shock Robert Mandel, 2019-04-09 Intelligence and security communities have access to an overwhelming amount of information. More data is better in an information-hungry world, but too much data paralyzes individual and institutional abilities to process and use information effectively. Robert Mandel calls this phenomenon global data shock. He investigates how information overload affects strategic ambiguity, deception, and surprise, as well as the larger consequences for international security. This book provides not only an accessible framework for understanding global data shock and its consequences, but also a strategy to prepare for and respond to information overload. Global Data Shock explores how information overload facilitates deception, eroding international trust and cooperation in the post-Cold War era. A sweeping array of case studies illustrates the role of data shock in shaping global events from the 1990 Iraqi attack on Kuwait to Brexit. When strategists try to use an overabundance of data to their advantage, Mandel reveals, it often results in unanticipated and undesirable consequences. Too much information can lead to foreign intelligence failures, security policy incoherence, mass public frustrations, curtailment of democratic freedoms, and even international political anarchy. Global Data Shock addresses the pressing need for improved management of information and its strategic deployment.

mike adams natural news: The Death of Truth Steven Brill, 2024-06-04 How did we become a world where facts—shared truths—have lost their power to hold us together as a community, as a country, globally? How have we allowed the proliferation of alternative facts, hoaxes, even conspiracy theories, to destroy our trust in institutions, leaders, and legitimate experts? Best-selling journalist Steven Brill documents the forces and people, from Silicon Valley to Madison Avenue to Moscow to Washington, that have created and exploited this world of chaos and division—and offers practical solutions for what we can do about it. A precise description of the punishment cell we have built around our minds and the first few steps back towards light and air. —Timothy Snyder, Author of *On Tyranny* and Professor of History, Yale University “A seminal, ground-breaking, documented and honest examination of two of the central dilemmas of our time—what is truth and where to find it.” —Bob Woodward, associate editor at The Washington Post As the cofounder of NewsGuard, a company that tracks online misinformation, Steven Brill has observed the rise of fake news from a front-row seat. In *The Death of Truth*, with startling, often terrifying clarity, he explains how we got here—and how we can get back to a world where truth matters. None of this—conspiracy theories embraced, expertise ridiculed, empirical evidence ignored—has happened by accident. Brill takes us inside the decisions made by executives in Silicon Valley to code the algorithms embedded in their social media platforms to maximize profits by pushing divisive content. He unravels the ingenious creation of automated advertising buying systems that reward that click-baiting content and penalize reliable news publishers, and describes how the use of these ad-financed, misinformation platforms by politicians, hucksters, and conspiracy theorists deceives ordinary citizens. He documents how the most powerful adversaries of America have used American-made social media and advertising tools against us with massive disinformation campaigns—and how, with the development of generative artificial intelligence, everything could get exponentially worse unless we act. The stakes are high for all of us, including Brill himself, whose company's role in exposing Russian disinformation operations resulted in a Russian agent targeting him and his family. Crucially, Brill lays out a series of provocative but realistic prescriptions for what we can do now to reverse course—proposals certain to stir debate and even action that could curb the power of big tech to profit from division and chaos, tamp down polarization, and restore the trust necessary to bring us together.

mike adams natural news: *The Coming Tyranny* David A. Herrera, 2021-06-30 *The Coming Tyranny: How Socialism Will Lead to Civil War in America* is a step-by-step prediction of how socialism in America will develop by nefarious and corrupt Democrats whose concerns are not the interests and well-being of the American people, but are concerns about redistributing wealth, attaining power, control, and enriching themselves. After the 2020 suspected fraudulent election, Democrats practically control the Federal government. Their Utopian socialist dream consists of taking substantial wealth from the rich through oppressive taxes and redistributing this wealth for government assistance to illegal migrants, for black reparations, to bail out poorly managed Democrat states disguised as COVID-19 relief, for infrastructure, for green energy, for government-run healthcare, for COVID-19 vaccines, to support the UN, the Paris Peace Accord climate deal, the World Health Organization, and for Palestinian aid. The Chinese-born COVID-19 pandemic has enabled the worse election fraud in US history to occur, in a concerted effort to steal the 2020 election by election computer fraud, ballot counters, state elected officials in key states, mail carriers, and election officials. Incredulously, key state supreme courts and the US Supreme Court, all refused to listen to any evidence or witnesses available in the worst election fraud in US history. Examples of Democrat socialist presidential candidates and their leftist views are presented to show how far left socialists want to take America. Examples are given as to how corrupt leaders, such as Obama, Hillary Clinton, and Joe Biden, not only tried to rig the 2016 election, but sought to influence the election of Benjamin Netanyahu, forced Pope Benedict to resign and be replaced by a liberal Pope, and how the Obama Administration and others, were involved with the Vatican and Pope Francis to try to align abortion and homosexuality morality in Catholic doctrine with leftist political morality to be gaslighted as acceptable moral behavior in the US by Hillary Clinton and Tim Kaine in preparation for the 2016 election. The Biden Administration signed a slew of executive orders and tax policies that mandated culture change and triggered oppression of Americans. Step-by-step predictions are made how Democrats will change election laws so that they will always remain in power. Socialist policies are predicted to cause economic chaos, failure, and instability. Many Americans will lose their jobs and suffer. Crime, poverty, and homelessness will increase. Police departments and the military will be politicized to support and enforce tyrannical laws passed by the socialist Federal US government to deprive Americans of their freedoms. Conservatives will

react, as tyranny and oppression intensify. A secession of states will likely occur, leading to a 2nd American Civil War. Unfortunately, the war will not fare well for freedom-loving Americans for reasons stated. Only a miracle from God can save the USA. Leftist policies and reconstruction efforts will further weaken the US. As Muslim immigrants grow exponentially in the US and Muslim population centers in states increase over time, this book predicts that a 3rd Civil War will occur between Muslims and non-Muslims. In the end, the old US will become divided into Muslim and non-Muslim countries, never to return to the greatest country on earth that it was.

mike adams natural news: Making Health Public Charles L. Briggs, Daniel C. Hallin, 2024-08-13 This book examines the relationship between media and medicine. Drawing on insights from anthropology, linguistics, and media studies, it considers the fundamental role of news coverage in constructing wider cultural understandings of health and disease. The authors advance the notion of 'biomediatization' and demonstrate how health knowledge is co-produced through connections between dispersed sites of knowledge making and through multiple forms of expertise. The chapters offer an innovative combination of media content analysis and ethnographic data on the production and circulation of health news, drawing on work with journalists, clinicians, health officials, medical researchers, marketers, and audiences. New to this edition are new case studies, in particular about the COVID-19 pandemic. The first case study looks at pharmaceutical and biotech news, and how journalists portray the flow of information across the boundaries between science and business. The next two case studies examine pandemic news, beginning with the 2009 H1N1 "swine flu" pandemic and continuing to the COVID-19 pandemic. The final case study examines the treatment of race and racism in health news, looking at the ways it interacts with cultural constructions of health citizenship, and the forces that have produced a shift from deracialization of health news to a much stronger focus on race and racism in contemporary health news. This book is ideal for undergraduate students and scholars across the social sciences, health sciences, cultural studies, and journalism.

mike adams natural news: Risk Criticism Molly Wallace, 2016-05-10 Risk Criticism is a study of literary and cultural responses to global environmental risk in an age of unfolding ecological catastrophe. In 2015, the Bulletin of the Atomic Scientists reset its iconic Doomsday Clock to three minutes to midnight, as close to the apocalypse as it has been since 1953. What pushed its hands was not just the threat of nuclear weapons, but also other global environmental risks that the Bulletin judged to have risen to the scale of the nuclear, including climate change and innovations in the life sciences. If we may once have believed that the end of days would come in a blaze of nuclear firestorm, we now suspect that the apocalypse may be much slower, creeping in as chemical toxins, climate change, or nano-technologies run amok. Taking inspiration from the questions raised by the Bulletin's synecdochical "nuclear," Risk Criticism aims to generate a hybrid form of critical practice that brings "nuclear criticism" into conversation with ecocriticism. Through readings of novels, films, theater, poetry, visual art, websites, news reports, and essays, Risk Criticism tracks the diverse ways in which environmental risks are understood and represented today.
