modern history interactive textbook: The Literary and Legal Genealogy of Native American Dispossession George Pappas, 2017-07-14 The Literary and Legal Genealogy of Native American Dispossession offers a unique interpretation of how literary and public discourses influenced three U.S. Supreme Court Rulings written by Chief Justice John Marshall with respect to Native Americans. These cases, Johnson v. M'Intosh (1823), Cherokee Nation v. Georgia (1831) and Worcester v. Georgia (1832), collectively known as the Marshall Trilogy, have formed the legal basis for the dispossession of indigenous populations throughout the Commonwealth. The Trilogy cases are usually approached as 'pure' legal judgments. This book maintains, however, that it was the literary and public discourses from the early sixteenth through to the early nineteenth centuries that established a discursive tradition which, in part, transformed the American Indians from owners to 'mere occupants' of their land. Exploring the literary genesis of Marshall's judgments, George

Pappas draws on the work of Michel Foucault, Edward Said and Homi Bhabha, to analyse how these formative U.S. Supreme Court rulings blurred the distinction between literature and law.

modern history interactive textbook: The Role of English Teaching in Modern Japan Mieko Yamada, 2014-09-25 *The Role of English Teaching in Modern Japan* examines the complex nature of Japan's promotion of English as a Foreign Language (EFL). In globalized societies where people with different native languages communicate through English, multicultural and multilingual interactions are widely created. This book takes the opportunity to look at Japan and examines how these multiple realities have affected its English language teaching within the domestic context. The myth of Japan's racial and ethnic homogeneity may hinder many Japanese in recognizing realities of its own minority groups such as Ainu, Zainichi Koreans, and Brazilian Japanese, who are in the same EFL classrooms. Acknowledging a variety of English uses and users in Japan, this book emphasizes the influence of Japan's recent domestic diversity on its EFL curriculum and urges that such changes should be addressed. It suggests new directions for incorporating multicultural perspectives in order to develop English language education in Japan and other Asian contexts where English is often taught as a foreign language. modern history interactive textbook: Introduction to New and Alternative Religions in America William M. Ashcraft, Eugene V. Gallagher, 2006-10-30 Most new or alternative religious are gravely misunderstood by members of the religious mainstream. Labeled cults or sects, groups and their members are often ridiculed or otherwise disregarded as weird and potentially dangerous by the populace at large. Despite their efforts at educating the general public, the various anti- and counter-cult activists have in fact promoted much more mis-understanding than accurate understanding of the religious lives of some of their fellow citizens. Consequently, they have helped to create a very hostile environment for anyone whose religious practices do not fit within a so-called mainstream. This set rectifies the situation by presenting accurate, comprehensive, authoritative and accessible accounts of various new and alternative religious movements that have been and are active in American society, and it addresses ways of understanding new and alternative religions within a broader context. Determining what actually constitutes a new or alternative religion is a subject of constant debate. Questions arise as to a new faith's legitimacy, beliefs, methods of conversion, and other facets of a religious movement's viability and place in a given culture. How a religion gains recognition by the mainstream, which often labels such new movements as cults, is fraught with difficulty, tension, and fear. Here, experts delineate the boundaries and examine the various groups, beliefs, movements, and other issues related to new faiths and alternative beliefs. Readers will come away with a fuller understanding of the religious landscape in America today. Volume 1: History and Controversies discusses the foundations of new and alternative religions in the United States and addresses the controversies that surround them. This volume helps readers better understand what makes a new or alternative belief system a religion and the issues involved. Volume 2: Jewish and Christian Traditions explores the various new religions that have grown out of these two Abrahamic faiths. Groups such as the Shakers, the People's Temple, the Branch Davidians, Jehovah's Witnesses and others are examined. Volume 3: Metaphysical, New Age, and Neopagan Movements looks at Shamanism, Spiritualism, Wicca, and Paganism, among other movements, as they have developed and grown in the U.S. These faiths have found new and devoted followers yet are often misunderstood. Volume 4: Asian Traditions focuses on those new and alternative religions that have been inspired by Asian religious traditions. From Baha'i to Soka Gakkai, from Adidam to the Vedanta Society, contributors look at a full range of groups practicing and worshiping in the U.S. today. Volume 5: African Diaspora Traditions and Other American Innovations examines the various traditions linked to the African diaspora such as Rastafarianism, Santeria, and the Nation of Islam, alongside traditions that are truly American incarnations like Scientology, UFO religions, and Heaven's Gate. Some of the new and alternative religions covered in these pages include: ; Shamanism ; Wicca ; Black Israelites ; Santeria ; Scientology ; Elan Vital ; Hare Krishna ; Soka Gakkai ; and many more

modern history interactive textbook: The Historian's Toolbox Robert C. Williams, 2011-12-21 Written in an engaging and entertaining style, this widely-used how-to guide introduces readers to the theory, craft, and methods of history and provides a series of tools to help them research and understand the past. Part I is a stimulating, philosophical introduction to the key elements of history--evidence, narrative, and judgment--that explores how the study and concepts of history have evolved over the centuries. Part II guides readers through the workshop of history.

Unlocking the historian's toolbox, the chapters here describe the tricks of the trade, with concrete examples of how to do history. The tools include documents, primary and secondary sources, maps, arguments, bibliographies, chronologies, and many others. This section also covers professional ethics and controversial issues, such as plagiarism, historical hoaxes, and conspiracy theories. Part III addresses the relevance of the study of history in today's fast-paced world. The chapters here will resonate with a new generation of readers: on everyday history, oral history, material culture, public history, event analysis, and historical research on the Internet. This Part also includes two new chapters for this edition. GIS and CSI examines the use of geographic information systems and the science of forensics in discovering and seeing the patterns of the past. Too Much Information treats the issue of information overload, glut, fatigue, and anxiety, while giving the reader meaningful signals that can benefit the study and craft of history. modern history interactive textbook: 2050 A brief history of the future Royal Museums of Fine Arts of Belgium,, 2015-10-09 What if we could foretell the future through art? More than any other activity, art will help to convince us of the urgency. This is its greatness and will be its responsibility, as art lies at the forefront of boldness (Jacques Attali). The meeting of an essay, A Brief History of the Future by Jacques Attali, and the world of contemporary art on the occasion of the exhibition organized by the Royal Museums of Fine Arts of Belgium (11.09.2015 - 24.01.2016). This book explores the major social issues studied by Jacques Attali and points out how visual artists go beyond simple observation to take an active part in the debate and develop projects fired by a form of utopian creativity. Making museums the mirror of a world in change EXCERPT The first wave is the decline of the American empire, which is no longer omnipotent. It represents a declining share of global GDP and will even be overtaken by China, Europe and others, even if it long remains the world's leading military power. This decline will also correspond to a lack of the cutting-edge collaborative technologies that lead to new discoveries, in particular the information technologies, biotechnologies, and so on, which will change a lot of things. There will be changes in customs, but these will probably contribute to the permanent triumph of the United States' ideology as the dominant one in the world. The second wave is produced by the US gradually sharing its dominance with other powers. This process has already begun through the establishment of the G20. The joint government of the world is a response to the fragmentation that is taking place. No doubt we shall see conflicts between China and Japan, tension between Europe and the United States, times when the whole lot will be at loggerheads. We may well be experiencing the last period in history in which conflicts between great nations still take place. ABOUT JACQUES ATTALI Economist, writer, member of the Council of State, special adviser to François Mitterrand from 1981 to 1991, Jacques Attali was born in 1943 in Alger. Over his career he has published more than 50 books and written many articles on current events. He is also the editorial writer of L'Express.

modern history interactive textbook: Instructor's Edition for the Essential World History William J. Duiker, 2002

modern history interactive textbook: E-teaching History Joanna Wojdon, 2016-02-08 Incorporating Information and Communication Technology tools into the teaching and learning of history has become a common practice worldwide. It is no longer a question of if, but of how to introduce it in the classroom in order to make history education more effective and enjoyable. This book gathers the experiences and reflections of researchers from three continents, based on their own activities and on empirical studies. The contributions concentrate on videogames related to the past, history e-textbooks, and applications for mobile devices with historical content. Some texts deal explicitly with global phenomena, such as the "Assassin's Creed" or "Colonization" games, some present materials developed for the international market, such as a European e-textbook or mobile phone applications, while others concentrate on local experiences, such as a Chinese e-schoolbag, a Swiss tablet application, Polish and Estonian e-textbooks, or English teacher training. The book is a result, and a reinforcement, of the belief that history educators can benefit from the lessons learnt in

other places of the globalising world.

modern history interactive textbook: Digging Earth Catherine Bernard, 2024-02-09 Digging Earth: Extractivism and Resistance on Indigenous lands of the Americas is a collection of essays and artists' contributions that documents the practices of extractivism on indigenous lands of the American continent, and the opposition to the politics of land appropriation and exploitation, by indigenous movements, activists and artists. Authors and artists address the extractivism of neo-colonial operations, its impact on local and indigenous communities and their environment, while tracing back its practices to settler colonialism in the Americas, and the vision of the natural world as ready to plunder. In addition to the economic impact, some contributions look at extractivism from the point of view of the extraction of cultural knowledge and ontologies. Artists and authors highlight topics of indigenous sovereignty, land rights, environmental justice, the stewardship of the land, and the history of indigenous environmental practices. The diversity of the contributors' backgrounds brings fresh perspectives to the issues surrounding the practices of the extractive industries and the exploitation of indigenous lands and resources. Their reflections and analyses convey the urgency of rethinking our politics towards the earth and its resources, as we are warned of an approaching collective ecocide.
