mary elizabeth harriman now: A New Kind of Monster Timothy Appleby, 2011-04-05 The horrific and astonishing true story of the double life of Russell Williams, who was at once a respected figure in the Canadian military and a ruthless sado-sexual serial criminal and murderer. A model officer and elite pilot, Colonel Russell Williams was trusted with flying international dignitaries including Queen Elizabeth, as well as commanding Canada's most important military airbase. Yet his dark and violent secret life included breaking into 82 homes of girls and women; thefts of vast amounts of lingerie (which he dressed in); two bizarre sexual assaults that left an uncomprehending Ontario village on a knife's-edge; and eventually, two rape-murders. In *A New Kind of Monster*, veteran *Globe and Mail* crime reporter Tim Appleby chronicles a true story that could have been lifted from the darkest pages of pulp fiction, one that offers fascinating--and troubling--insights on human psychopathology.

mary elizabeth harriman now: Both Sides of the Bullpen Robert S. McPherson, 2017-10-19 Between 1880 and 1940, Navajo and Ute families and westward-trending Anglos met in the "bullpens" of southwestern trading posts to barter for material goods. As the products of the livestock economy of Navajo culture were exchanged for the merchandise of an industrialized nation, a wealth of cultural knowledge also changed hands. In *Both Sides of the Bullpen*, Robert S. McPherson reveals the ways that Navajo tradition fundamentally reshaped and defined trading practices in the Four Corners area of southeastern Utah and southwestern Colorado. Drawing on oral histories of Native peoples and traders collected over thirty years of research, McPherson explores these interactions from both perspectives, as wool, blankets, and silver crossed the counter in exchange for flour, coffee, and hardware. To succeed, traders had to meet the needs and expectations of their customers, often interpreted through Navajo cultural standards. From the organization of the post building to gift giving, health care and burial services, and a credit system tailored to the Navajo calendar, every feature of the trading post served trader and customer alike. Over time, these posts evolved from ad hoc business ventures or profitable cooperative stores into institutions with a clearly defined set of expectations that followed Navajo traditional practices. Traders spent their days evaluating craft work, learning the financial circumstances of each Native family, following economic trends in the wool and livestock industry back east, and avoiding conflict. In detail and depth, the many voices woven throughout *Both Sides of the Bullpen* restore an underappreciated era to the history of the American Southwest. They show us that for American Indians and white traders alike in the Four Corners region during the late 1800s and early 1900s, barter was as much a cultural expression as it was an economic necessity.

mary elizabeth harriman now: John Muir's Last Journey John Muir, 2013-04-10 I am now writing up some notes, but when they will be ready for publication I do not know... It will be a long time before anything is arranged in book form. These words of John Muir, written in June 1912 to a friend, proved prophetic. The journals and notes to which the great naturalist and environmental figure was referring have languished, unpublished and virtually untouched, for nearly a century. Until now. Here edited and published for the first time, John Muir's travel journals from 1911-12, along with his associated correspondence, finally allow us to read in his own words the remarkable story of John Muir's last great journey. Leaving from Brooklyn, New York, in August 1911, John Muir, at the age of seventy-three and traveling alone, embarked on an eight-month, 40,000-mile voyage to South America and Africa. The 1911-12 journals and correspondence reproduced in this volume allow us to travel with him up the great Amazon, into the jungles of southern Brazil, to snowline in the Andes, through southern and central Africa to the headwaters of the Nile, and across six oceans and seas in order to reach the rare forests he had so long wished to study. Although this epic journey has received almost no attention from the many commentators on Muir's work, Muir himself considered it among the most important of his life and the fulfillment of a decades-long dream. John Muir's Last Journey provides a rare glimpse of a Muir whose interests as a naturalist, traveler, and conservationist extended well beyond the mountains of California. It also helps us to

see John Muir as a different kind of hero, one whose endurance and intellectual curiosity carried him into far fields of adventure even as he aged, and as a private person and family man with genuine affections, ambitions, and fears, not just an iconic representative of American wilderness. With an introduction that sets Muir's trip in the context of his life and work, along with chapter introductions and a wealth of explanatory notes, the book adds important dimensions to our appreciation of one of America's greatest environmentalists. John Muir's Last Journey is a must reading for students and scholars of environmental history, American literature, natural history, and related fields, as well as for naturalists and armchair travelers everywhere.
