microeconomics dirk mateer 4th edition: *What Can Behavioral Economics Teach Us about Teaching Economics?* Supriya Sarnikar, 2015-11-19 Sarnikar cites evidence of frequent misconceptions of economics amongst students, graduates, and even some economists, and argues that behavioral economists are uniquely qualified to investigate causes of poor learning in economics. She conducts a review of the economics education literature to identify gaps in current research efforts and suggests a two-pronged approach to fill the gaps: an engineering approach to the adoption of innovative teaching methods and a new research program to enhance economists' understanding of how learning occurs. To facilitate research into learning processes, Sarnikar provides an overview of selected learning theories from psychology, as well as new data on hidden misconceptions amongst beginning students of economics. She argues that if they ask the right questions, economists of all persuasions are likely to find surprising lessons in the answers of beginning students of economics.

Anderson, 2013-12-27 Adapted by Paul Krugman and Robin Wells from their bestselling microeconomics textbook, Microeconomics in Modules is the only text for the principles of microeconomics course organized in the supremely accessible, highly effective modular format. Instead of chapters of standard length, the book covers the fundamentals of microeconomics in 45 brief (4-10 page) modules divided into 14 sections. Microeconomics in Modules offers the best of what makes Krugman/Wells a classroom favorite (story-telling approach, engaging writing, fascinating examples and cases), in a format students and instructors will love. Extensive educational research shows that students absorb more from shorter reading assignments than longer ones. And with coverage in self-contained modules, instructors can assign specific topics without asking students to read entire chapters.
