Many also turn to psychiatrists to get relief from prescription medication. All these drugs, legal or illegal, have one thing in common: temporal and intermittent control of your feelings, emotions, and mind. A few years ago, while training as chaplain, we had a guest speaker who is a psychiatrist with more than thirty years' experience. She came to give a speech on emotional issues, and I raised my hand and asked her this fundamental question: what causes depression? Her response was, Cause is unknown. This response troubled me as I thought to myself, if the cause is unknown, then why are millions of people being medicated? This book seeks to answer a fundamental question: are emotional issues like loneliness, fear, anxiety, depression, and suicidal thoughts medical or spiritual issues? Your response to this question will determine where you go for help.

perspectives grade 10 workbook: *Cognitive Support for Learning* Piet A. M. Kommers, 2004 This book addresses the various aspects of computational support systems for learners nowadays. It highlights in particular those learning aspects that rely heavily upon one's imagination of knowledge and new ideas. The question is how learners may become more effective through the use of highly graphical computer systems that now conquer almost every desk. As an extrapolation of the constructionistic paradigm, learning is seen here as a process of conceptual design. Witnessing the prudent introduction of CADD software (Computer Aided Drafting and Design) it is obvious that users are generally scrupulous to accept the computer in the ideational stages of design. This book presents both existing conceptual techniques and those estimated to arrive in the few coming years.

perspectives grade 10 workbook: *Faith and Politics in South Asia* Astha Chadha,

2024-11-18 This book explores the role of faith and politics in shaping the international relations of South Asia. Adopting a neo-classical realist framework and a discourse-historical approach to analyze how religious actors construct their political identities and interests through the interpretation of sacred texts, or exegesis, the book makes several key contributions to the field of international relations. It introduces the concept of exegesis as a novel analytical tool to understand the role of religion in world politics. The book argues that exegesis is not only a theological exercise, but also a political one, as it shapes the worldviews, values, norms, and interests of religious actors. The author applies exegesis to three case studies of South Asia: the partition of India and Pakistan, the rise of Hindu nationalism in India, and the emergence of Islamic radicalism in Pakistan and resurging signs of the same in Bangladesh. The research then challenges the conventional assumptions of IR, such as the secularization thesis, the clash of civilizations, and the rational actor model, by showing how religious actors are not monolithic, homogeneous, or irrational, but rather diverse, heterogeneous, and strategic. The book offers a nuanced and comprehensive understanding of the role of religion in world politics, especially in the context of South Asia. Highlighting the diversity and complexity of the religious landscape in South Asia, which is home to various faiths, sects, movements, and ideologies, this book will be of interest to academics studying global politics, international relations, Asian Studies, and studies on religion and foreign policy.
