**perry a sook political stance: North Korea and Myanmar** Andray Abrahamian, 2018-02-20  
North Korea and Myanmar (Burma) are Asia's most mysterious, tragic stories. For decades they were infamous as the region's most militarized and repressed societies, self-isolated and under sanctions by the international community while, from Singapore to Japan, the rest of Asia saw historic wealth creation and growing middle class security. For Burma, the threat was internal: insurgent factions clashed with the government and each other. For North Korea, it was external: a hostile superpower--the United States--and a far more successful rival state--South Korea--occupying half of the Korean peninsula. Over time, Myanmar defeated its enemies, giving it space to explore a

form of democratization and openness that has led to reintegration into international society. Meanwhile, North Korea's regime believes its nuclear arsenal--the primary reason for their pariah status--is vital to survival.

**perry a sook political stance:** *North Korea* Young Whan Kihl, Hong Nack Kim, 2006 Featuring contributions by some of the leading experts in Korean studies, this book examines the political content of Kim Jong-Il's regime maintenance, including both the domestic strategy for regime survival and North Korea's foreign relations with South Korea, Russia, China, Japan, and the United States. It considers how and why the Democratic People's Republic of Korea (DPRK) became a hermit kingdom in the name of Juche (self-reliance) ideology, and the potential for the barriers of isolationism to endure. This up-to-date analysis of the DPRK's domestic and external policy linkages also includes a discussion of the ongoing North Korean nuclear standoff in the region.

**perry a sook political stance:** *North Korea and the Global Nuclear Order* Edward Howell, 2023-04-26 For a state that has gained a global reputation as a violator of international norms, not least through its unwavering pursuit of nuclear weapons, North Korea's determination to become a nuclear-armed state is puzzling. If nuclear weapons beget security, insecurity, and other costs for the state, how might we understand this pursuit, and the delinquent behaviour that has arisen from it? In *North Korea and the Global Nuclear Order*, Edward Howell offers an answer to this question, focusing on North Korea's quest for status in the international system and developing the theoretical framework of 'strategic delinquency'. Featuring previously unpublished and new interviews with international negotiators with North Korea, and drawing upon new academic literature, Howell proffers an original theoretical framework to apply to the North Korean case. Covering a time period from the 1990s to the present-day, and using unprecedentedly rich empirical evidence, he makes the overarching argument that North Korea has strategically deployed behaviour that breaks international norms in order to reap benefits. In so doing, this book posits how over time, North Korea has learnt that despite the low status and opprobrium that might ensue, bad behaviour can pay.

**perry a sook political stance:** *Barbershops, Bibles, and BET* Melissa Harris-Perry, 2010-06-14 What is the best way to understand black political ideology? Just listen to the everyday talk that emerges in public spaces, suggests Melissa Harris-Lacewell. And listen this author has--to black college students talking about the Million Man March and welfare, to Southern, black Baptists discussing homosexuality in the church, to black men in a barbershop early on a Saturday morning, to the voices of hip-hop music and Black Entertainment Television. Using statistical, experimental, and ethnographic methods *Barbershops, Bibles, and B.E.T* offers a new perspective on the way public opinion and ideologies are formed at the grassroots level. The book makes an important contribution to our understanding of black politics by shifting the focus from the influence of national elites in opinion formation to the influence of local elites and people in daily interaction with each other. Arguing that African Americans use community dialogue to jointly develop understandings of their collective political interests, Harris-Lacewell identifies four political ideologies that constitute the framework of contemporary black political thought: Black Nationalism, Black Feminism, Black Conservatism and Liberal Integrationism. These ideologies, the book posits, help African Americans to understand persistent social and economic inequality, to identify the significance of race in that inequality, and to devise strategies for overcoming it.

**perry a took political stance:** Discipline and Development Diane E. Davis, 2004-03-22 Perhaps the most commonly held assumption in the field of development is that middle classes are the bounty of economic modernization and growth. As countries gradually transcend their agrarian past and become urbanized and industrialized, so the logic goes, middle classes emerge and gain in number, complexity, cultural influence, social prominence, and political authority. Yet this is only half the story. Middle classes shape industrial and economic development, they are not merely its product; the particular ways in which middle classes shape themselves - and the ways historical conditions shape them - influence development trajectories in multiple ways. This is the story of South Korea's and Taiwan's economic successes and Argentina's and Mexico's relative 'failures' through an examination of their rural middle classes and disciplinary capacities. Can disciplining continue in a context where globalization squeezes middle classes and frees capitalists from the state and social contracts in which they have been embedded?
