Blankson, 2023-07-12 This two-part volume examines current pedagogical modules, research directions and other emerging issues in public relations and communication management in Africa. In comparison to its Western and Asian counterparts, the literature on public relations management in Africa is limited, and much of it is examined through the lenses of Western philosophies and pedagogies that do not generally resonate with Africa's socioeconomic, political, and cultural contexts. This book aims to change that. Through analyzing the organizational dynamic, Volume 1 brings together contributors from across Africa to provide valuable insights into how public relations contributes to organizational effectiveness on the continent. public relations training: *The 21st Century Media (r)evolution* Jim Macnamara, 2010 The emergence of 'new media' and social media is widely discussed in contemporary society. However, media and public communication are mostly analyzed within particular theoretical frameworks and within specific disciplinary fields. Such approaches have created polarized views on media and communication, and fail to create an understanding of the interdependencies between these fields. This book expertly synthesizes competing theories and disciplinary viewpoints, integrates scholarly and cutting edge research, and examines international data from fast-growing markets including China, to provide a comprehensive, holistic view of the twenty-first century (r)evolution in media and public communication. The book identifies how the changes are located in practices rather than technologies and that these practices are emergent in highly significant ways. Engaging and accessible, the book is essential reading for media scholars and communication professionals, and a valuable text for courses in media studies, journalism, advertising, public relations, and organisational and political communication.

public relations training: *The Public Relations Practitioner's Playbook* M. Larry Litwin, 2009 The Public Relations Practitioner's Playbook is how-to and hands-on. Explanations, examples and anecdotes are in a language that should appeal to experienced practitioners, college students and organization volunteers who assist with public relations and publicity. The PR Practitioner's Playbook - an anatomy of the public relations profession - relies on my experience as a reporter, editor, public relations counselor, and strategic advisor and evaluator. It demonstrates that successful writers practice their craft with poise and eloquence. It is an extension of the author's classroom, which many students call, Litwin's laboratory for practical knowledge. As former KYW Newsradio colleague Kim Glovas observed, Larry's voice is the voice of this book. Among those considered mentors - and contributors to this book - are Nick George, former managing editor at ABC Radio News, ABC sportscaster Howard Cosell, KYW Newsradio anchor Bill Bransome, print journalist extraordinaire Everett S. Landers and legendary broadcast journalist Edward R. Murrow. They spent countless hours helping the author hone his skills and encouraging me to be an open, honest, thorough and valid (relevant) communicator. They stressed tangible tools, and such attributes as knowledge, loyalty, judgment, trust, credibility, ethics and integrity. The Public Relations Practitioner's Playbook serves as a basic or supplemental text in introduction to public relations and graduate overview courses. It offers a refreshing, down-to-earth approach to which many students are just not accustomed. Strategic advisors refer to it as a potpourri of proven public relations techniques. The companion CD-Rom contains, among its many tactics, three PowerPoints(r) that summarize the 17 chapter

public relations training: Public Relations in Hyper-globalization Takashi Inoue, 2018-04-09 Achieving your goals quickly and efficiently is both more difficult and more important in today's hyper-globalized world. A new environment is being created by disruptive technology, radical new business models, digital communications, and a highly integrated global supply chain. It is a world in which a reality TV host and businessman became President of the United States, in which terrorists use social media to recruit members and to broadcast executions, in which the very existence of the nation state is in question, where everyone can communicate globally 24 hours a day at no cost, and in which a leader is much more likely to be at the center of a crisis. Today, successful global leaders will be those that have a working knowledge of strategic public relations as described in this book. For current and future leaders of business and government it is essential to understand the forces creating this very challenging new environment and to acquire a new skill set. This book provides the needed understanding and teaches you the skill of public relations as multi-stakeholder relationship management. It shows how to achieve your goals and objectives when others fail by building win-win outcomes with current and future employees, investors, suppliers, distributors, customers, governments and all the other stakeholders.
