ross leadership assessment answers: *Learning Targets* Connie M. Moss, Susan M. Brookhart, 2012-07-02 In *Learning Targets*, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call today's lesson—or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book - Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. - Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. - Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. - Shows how to use learning targets to guide summative assessment and grading. *Learning Targets* also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

ross leadership assessment answers: *Re-Awakening the Learner* Copper Stoll, Gene Giddings, 2012-05-31 Transformation of public education requires the reawakening of the sleeping giant in the room: the learners. Students, teachers, and principals must develop a learner-centric, standards-driven school. *Reawakening the Learner* is a guide to creating just such an environment. Continua describe the journey of teachers, teacher leaders, and principals in partnering with learners. Adult-driven routines must be replaced with learner-centric practices. All stakeholders must identify a common moral purpose, create a culture that supports change, and commit to the learner improvement cycle. Common moral purpose must be driven by beliefs and behaviors that support all learners to proficiency. School culture must be developed to be ready for change, have

enough trust in one another to doubt current practices, and develop collective efficacy. This new culture will support the components of the learner improvement cycle (assessment, evaluation, planning, and learning) by involving the learners during each step of the cycle. The authors call for national dialogue with educational experts to reinvent public education, where all students are given enough time and support to reach proficiency on the standards.
