sailor 360 curriculum: *The Bayeux Tapestry* John F. Szabo, Nicholas E. Kuefler, 2015-06-18 Commanding its own museum and over 200 years of examination, observation and scholarship, the monumental embroidery, known popularly as the Bayeux Tapestry and documenting William the Conqueror's invasion of England in October 1066, is perhaps the most important surviving artifact of the Middle Ages. This magnificent textile, both celebrated and panned, is both enigmatic artwork and confounding historical record. With over 1780 entries, Szabo and Kuefler offer the largest and most heavily annotated bibliography on the Tapestry ever written. Notably, the Bayeux Tapestry has produced some of the most compelling questions of the medieval period: Who commissioned it and for what purpose? What was the intended venue for its display? Who was the designer and who executed the enormous task of its manufacture? How does it inform our understanding of eleventh-century life? And who was the mysterious Aelfgyva, depicted in the Tapestry's main register? This book is an effort to capture and describe the scholarship that attempts to answer these questions. But the bibliography also reflects the popularity of the Tapestry in literature covering a surprisingly broad array of subjects. The inclusion of this material will assist future scholars who may study references to the work in contemporary non-fiction and popular works as well as use of the Bayeux Tapestry as a primary and secondary source in the classroom. The

monographs, articles and other works cited in this bibliography reflect dozens of research areas. Major themes are: the Tapestry as a source of information for eleventh-century material culture, its role in telling the story of the Battle of Hastings and events leading up to the invasion, patronage of the Tapestry, biographical detail on known historical figures in the Tapestry, arms and armor, medieval warfare strategy and techniques, opus anglicanum (the Anglo-Saxon needlework tradition), preservation and display of the artifact, the Tapestry's place in medieval art, the embroidery's depiction of medieval and Romanesque architecture, and the life of the Bayeux Tapestry itself.

sailor 360 curriculum: *A Sailor's Odyssey* Andrew Cunningham, 2022-04-12 Admiral Andrew Cunningham, best remembered for his courageous leadership in the Mediterranean in the Second World War, is often rated as our finest naval commander after Nelson, and indeed a bust of the Admiral was unveiled in Trafalgar Square close by his predecessor in 1967 by the Duke of Edinburgh. It was during the dark days of 1940-41, after the surrender of France and Italy's entry into the War and when Britain was fighting single-handed, that Cunningham held the Eastern Mediterranean with a fleet greatly inferior to the Italian; his lack of ships and aircraft was more than made up for by his bold and vigorous command. Taranto, Matapan, Crete, North Africa - these are the critical battles and regions with which he is so closely associated. A Sailor's Odyssey is the stirring autobiography of this great fighting seaman from his boyhood in Dublin and his early career in the Navy and his service in the First World War, through his commands in the inter-war years, to the great sea battles in the Mediterranean, and then his elevation to First Sea Lord in 1943 and his subsequent responsibility for the operational policy of the Royal Navy during the later stages of the War. He attended the conferences at Casablanca, Teheran, Quebec and Yalta, and gives revealing glimpses of Churchill, Roosevelt and Stalin. His was, truly, a remarkable career. This is a beautifully written and absorbing naval memoir, and it made a significant contribution to the history of the Royal Navy in the Second World War when it was first published in 1951; this new paperback edition, with an introduction by his great nephew Admiral Jock Slater, will fascinate and delight a new generation of readers and bring into focus again a great British fighting admiral.
