spook slang: The Dynamic Lexicon of English Julia Landmann, 2023-05-08 The open access publication of this book has been published with the support of the Swiss National Science Foundation. This study investigates the interrelation between use, meaning and the mind as a central issue of contact-induced linguistic variation and change, using the influence of French, Spanish, German and Yiddish on English as case studies. It relies on innovative methodological approaches, including the use of an integrative, socio-cognitive model of the dynamic lexicon, to describe borrowing processes and their linguistic outcomes. The multitude of socio-cultural contexts relevant to the introduction of the various borrowings since the nineteenth century has been reconstructed. This implies the identification of borrowings reflecting connections of linguistic features and culturally embedded attitudes. Taking the effects of cognitive and social factors on conventionalization and entrenchment processes into account, this study makes an original contribution to existing research.
