strands answers 22 april: Possible Scenarios for Homochirality on Earth Michiya Fujiki, 2019-11-14 In 1978, Fred Hoyle proposed that interstellar comets carrying several viruses landed on Earth as part of the panspermia hypotheses. With respect to life, the origin of homochirality on Earth has been the greatest mystery because life cannot exist without molecular asymmetry. Many scientists have proposed several possible hypotheses to answer this long-standing L-D question. Previously, Martin Gardner raised the question about mirror symmetry and broken mirror symmetry in terms of the homochirality question in his monographs (1964 and 1990). Possible scenarios for the L-D issue can be categorized into (i) Earth and exoterrestrial origins, (ii) by-chance and necessity mechanisms, and (iii) mirror-symmetrical and non-mirror-symmetrical forces as physical and chemical origins. These scenarios should involve further great amplification mechanisms, enabling a pure L- or D-world.

strands answers 22 april: Determiner Sharing in German Luise Schwarzer, 2024-08-05 This monograph presents the first in-depth empirical and theoretical study of determiner sharing in German, addressing both its language-specific properties and its comparative syntax. Determiner sharing poses an interesting problem for syntactic theory as it seemingly relies on a parasitic relationship with another form of ellipsis, such as gapping. The first part provides an empirical basis by presenting three acceptability judgment studies for German. The results reveal the novel generalization that determiner sharing is not uniquely dependent on gapping, but can also occur in stripping contexts. The analysis that is developed in the second part shows that the apparent parasitism of determiner sharing can be derived by combining two independently available processes, namely a type of ellipsis like gapping, and a type of movement like split topicalization. The analysis thus avoids any construction-specific additions to the syntactic framework. The findings constitute an argument for approaches to ellipsis that posit an obligatory movement step and thereby contribute to an ongoing debate in the field.

strands answers 22 april: The Lonely Mind of God Sherman O'Brien, 2021-01-26 Current students of philosophy or armchair philosophers... Want the answer to the Primordial Existential Question: Why is there something rather than nothing? While history has produced no shortage of attempted answers, clearly none is the answer. Now comes the unique perspective of acosmism to provide a complete and plausible answer. After a lifetime of reflection, acosmist Sherman O'Brien offers this analysis of the issues and a thoughtful, reasoned answer to philosophy's most vexing question. The acosmic answer requires no faith whatsoever, either in supernatural or unexplained causes; in fact, it discourages it. Acosmism rejects both traditional religion and philosophically neglectful science. As a metaphysical system, it is based on an epistemological insight, with implications for immortality, determinism, ethics, and ultimate purpose. Reasoned wholly from the ground up, its conclusion is the very meaning of existence. The solution to the Omniscience Riddle becomes the key to understanding how the question is best stated and understood. This book represents one person's effort to make sense of what is true and what only seems to be so. Why is there something rather than nothing? What is your potential role in the entirety of experience? This foray into acosmism offers a path to the genuine understanding of both existence and reality. Note: the main text constitutes roughly two-thirds of the total pages, the remainder being mostly endnotes.

strands answers 22 april: The Routledge Handbook of Global Cultural Policy Victoria Durrer, Toby Miller, Dave O'Brien, 2017-09-22 Cultural policy intersects with political, economic, and socio-cultural dynamics at all levels of society, placing high and often contradictory expectations on the capabilities and capacities of the media, the fine, performing, and folk arts, and cultural

heritage. These expectations are articulated, mobilised and contested at – and across – a global scale. As a result, the study of cultural policy has firmly established itself as a field that cuts across a range of academic disciplines, including sociology, cultural and media studies, economics, anthropology, area studies, languages, geography, and law. This Routledge Handbook of Global Cultural Policy sets out to broaden the field's consideration to recognise the necessity for international and global perspectives. The book explores how cultural policy has become a global phenomenon. It brings together a diverse range of researchers whose work reveals how cultural policy expresses and realises common global concerns, dominant narratives, and geopolitical economic and social inequalities. The sections of the book address cultural policy's relation to core academic disciplines and core questions, of regulations, rights, development, practice, and global issues. With a cross-section of country-by-country case studies, this comprehensive volume is a map for academics and students seeking to become more globally orientated cultural policy scholars.
