teachers curriculum institute online courses: *Shifting to Online Learning Through Faculty Collaborative Support* Crawford, Caroline M., 2021-06-18 As a result of the COVID-19 pandemic, most schools had to suddenly shift from traditional face-to-face courses to blended, synchronous, and asynchronous instructional environments. The impact upon the immediacy of remote learning was overwhelming to many faculty, instructional facilitators, teachers, and trainers. Many faculty and trainers have experience with the analysis, design, development, implementation, and evaluation of online and blended learning environments, while many faculty and trainers also do not have this knowledge nor experience. As such, the collegial workspace has developed into a collaborative work environment wherein the faculty are helping faculty, partially because the instructional designer staff and learning advisors are overwhelmed with the number of course projects that must be moved from traditional face-to-face course environments into an online environment within a short period of time. The faculty are helping each other make this move, offering course design and development support and also instructional tips and tricks that will support successful blended and online experiences that enhance learning outcomes. *Shifting to Online Learning Through Faculty Collaborative Support* focuses on supporting and enhancing blended and distance learning course design and development, successful tips for course design and teaching, techniques for online learning, and embracing collegial mentorship and facilitative support for course and faculty success. This book highlights the strength of collegial bonds while discussing tools, methods, procedural efforts, styles of engagement, learning theories, assessment efforts, and even social learning engagement implementations in online learning. It provides information and lessons and embraces a long-term approach towards understanding institutional impact and collegial support. teachers curriculum institute online courses: *Collaboration and the Future of Education* Gordon Andrews, Wilson J. Warren, James Cousins, 2015-10-08 Current educational reforms have given rise to various types of educational Taylorism, which encourage the creation of efficiency models in pursuit of a unified way to teach. In history education curricula, this has been introduced through scripted textbook-based programs such as Teacher Curriculum Institute's History Alive! and completely online curricula. They include the jargon of authentic methods, such as primary sources, cooperative learning, differentiated instruction, and access to technology; yet the craft of teaching is removed, and an experience that should be marked by discovery and reflection is replaced with comparatively empty processes. This volume provides systematic models and examples of ways that history teachers can compete with and effectively halt this transformation. The alternatives the authors present are based on collaborative models that address the art of teaching for pre-service and practicing secondary history teachers as well as collegiate history educators. Relying on original research, and a maturing body of secondary literature on historical thinking, this book illuminates how collaboration can create real historical learning.
