Tres aspectes conceptuals guien la investigació. En primer lloc, les dones del sud poden treballar des de i en contra dels discursos de gènere de la seua societat a través de les pràctiques culinàries. En segon lloc, a través de l'amistat femenina, les dones poden transgredir el seu lloc prescrit pel patriarcat. En tercer lloc, per a infondre la construcció de gènere les dones han de desafiar la protecció patriarcal i desobeir les regles de confinament de la feminitat en l'espai domèstic. Així, aquest volum qüestiona els efectes materials dels mites meridionals sobre les construccions i les negociacions de la condició de dona meridional contra les normes blanques, masculines i heterosexistes de la cultura del sud.

the bean trees analysis: Making home Maria Holmgren Troy, Elizabeth Kella, Helena Wahlstrom, 2016-05-16 Making home explores the figure of the orphan child in a broad selection of contemporary US novels by popular and critically acclaimed authors Barbara Kingsolver, Linda Hogan, Leslie Marmon Silko, Marilynne Robinson, Michael Cunningham, Jonathan Safran Foer, John Irving, Kaye Gibbons, Octavia Butler, Jewelle Gomez and Toni Morrison. The orphan child is a continuous presence in US literature, not only in children's books and nineteenth-century texts, but also in a variety of genres of contemporary fiction for adults. Making home examines the meanings of this figure in the contexts of American literary history, social history and ideologies of family, race and nation. It argues that contemporary orphan characters function as links to literary history and

national mythologies, even as they may also serve to critique the limits of literary history, as well as the limits of familial and national belonging.

the bean trees analysis: New Visions of Community in Contemporary American Fiction Magali Cornier Michael, 2008-04 In this engaging, optimistic close reading of five late twentieth-century novels by American women, Magali Cornier Michael illuminates the ways in which their authors engage with ideas of communal activism, common commitment, and social transformation. The fictions she examines imagine coalition building as a means of moving toward new forms of nonhierarchical justice; for ethnic cultures that, as a result of racist attitudes, have not been assimilated, power with each other rather than power over each other is a collective goal. Michael argues that much contemporary American fiction by women offers models of care and nurturing that move away from the private sphere toward the public and political. Specifically, texts by women from such racially marked ethnic groups as African American, Asian American, Native American, and Mexican American draw from the rich systems of thought, histories, and experiences of these hybrid cultures and thus offer feminist and ethical revisions of traditional concepts of community, coalition, subjectivity, and agency. Focusing on Amy Tan's *The Joy Luck Club*, Barbara Kingsolver's *The Bean Trees* and *Pigs in Heaven*, Ana Castillo's *So Far from God*, and Toni Morrison's *Paradise*, Michael shows that each writer emphasizes the positive, liberating effects of kinship and community. These hybrid versions of community, which draw from other-than-dominant culturally specific ideas and histories, have something to offer Americans as the United States moves into an increasingly diverse twenty-first century. Michael provides a rich lens through which to view both contemporary fiction and contemporary life.
