the beautiful country in asia: *The Beautiful Country and the Middle Kingdom* John Pomfret, 2016-11-29 A remarkable history of the two-centuries-old relationship between the United States and China, from the Revolutionary War to the present day From the clipper ships that ventured to Canton hauling cargos of American ginseng to swap Chinese tea, to the US warships facing off against China's growing navy in the South China Sea, from the Yankee missionaries who brought Christianity and education to China, to the Chinese who built the American West, the United States and China have always been dramatically intertwined. For more than two centuries, American and Chinese statesmen, merchants, missionaries, and adventurers, men and women, have profoundly influenced the fate of these nations. While we tend to think of America's ties with China as starting in 1972 with the visit of President Richard Nixon to China, the patterns—rapturous enchantment followed by angry disillusionment—were set in motion hundreds of years earlier. Drawing on personal letters, diaries, memoirs, government documents, and contemporary news reports, John Pomfret reconstructs the surprising, tragic, and marvelous ways Americans and Chinese have engaged with one another through the centuries. A fascinating and thrilling account, *The Beautiful Country and the Middle Kingdom* is also an indispensable book for understanding the most important—and often the most perplexing—relationship between any two countries in the world.

In turn, the chapters discuss the relevance of each approach to the issue area addressed in the book. The volume offers coverage of the key issues under four thematic sections: - Theoretical Approaches to the Study of the International Relations of South Asia - Traditional and Emerging Security Issues in South Asia - The International Relations of South Asia - Cross-cutting Regional Issues Further, every effort has been made in the chapters to discuss the origins, evolution and future direction of each issue. the beautiful country in asia: *Language Planning in Primary Schools in Asia* Richard Baldauf, Robert Kaplan, Knonko Kamwangamalu, Pauline Bryant, 2013-09-13 In foreign language education, decisions must be taken on what languages to teach, who will teach them, in which schools (i.e. all, only urban, only rural), in which grades, the number of hours a week, and the cost involved. This book explores the answers to these questions across a number of Asian polities. It illustrates why some of the efforts undertaken are successful and why some are not, why – despite significant investments of time and resources – some students do not seem to acquire the languages being taught, and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties. It suggests some strategies various polities might attempt to achieve their stated language learning objectives. This book was originally published as a special issue of Current Issues in Language Planning.
