**the end of everything review:** *Judicializing Everything?* Mark S. Harding, 2022-02-22 Nearly every common law jurisdiction in the world has adopted a charter or bill of rights. Yet adopting a new rights document creates, rather than resolves, many fundamental constitutional questions. Should constitutional rights be relevant in private disputes? Does every political question need a constitutional or judicial answer? Should courts and legislatures equally participate in addressing the scope of which issues are to be considered constitutional? *Judicializing Everything?* illustrates how debates surrounding these persistent judicial questions are best understood as part of an ongoing clash between distinct forms of constitutionalism on and off the bench. Mark S. Harding canvasses the perennial debates within the field of constitutional studies and provides novel ways of understanding key disagreements between judges and scholars alike. Despite important formal differences between rights documents in Canada, New Zealand, and the United Kingdom, *Judicializing Everything?* shows that there are also considerable similarities in the kinds of cases, arguments, and legal outcomes in the three countries. As political life becomes increasingly constitutionalized and judicialized, this important book sheds light on the persistence of debates over bills of rights and their interpretation.

Attempting a theory of everything from the social physics perspective provides us with the advantage of utilizing the knowledge already gained from the field of physics on certain matters, such as the properties of the forces of nature, while the field of sociology provides us with great insights into the role and actions of human behavior. This book uses social physics to address major questions of human life. These questions include: what is the fate of humanity and, specifically, what role will artificial intelligence (AI) play? Is there an afterlife and if yes, what are the possible scenarios of an afterlife? What is the fate of the planet Earth, and what is the fate of our universe?
