the show called billions: *TrumpNation* Timothy L. O'Brien, 2015-10-20 The extensively researched biography that goes beyond the hype to “separate Trump the reality from Trump the reality show” (USA Today). Now with a new introduction by the author, this entertaining look inside the world of Donald Trump is chock full of rip-roaring anecdotes, jaw-dropping quotes, and rigorous research into the business deals, political antics, curious relationships, and complex background of the forty-fifth US president. Granted unprecedented access, Timothy L. O'Brien traveled across the country and up and down the East Coast with Trump on his private jet, wheeled around Palm Beach with him in his Ferrari, and spent hours interviewing him in his home, in his office, and on the golf course. He met with the entrepreneur's closest friends and most aggressive rivals, while compiling a treasure trove of Trumpisms from the Donald himself: Trump on the public's enduring fascination with Trump: “There is something crazy, hot, a phenomenon out there about me, but I'm not sure I can define it and I'm not sure I want to.” Trump on naysayers: “You can go ahead and speak to guys who have four-hundred-pound wives at home who are jealous of me, but the guys who really know me know I'm a great builder.” Trump on the art of self-promotion: “You might as well tell people how great you are, because no one else is going to.” Ultimately, when O'Brien's research revealed that Trump's business record and annual spot on the Forbes 400 list of richest Americans might be more fantasy than reality, he—like so many others who have dared to tangle with the former host of *The Apprentice*—found himself in a courtroom. In a new introduction, O'Brien reflects on the recent wave of TrumpMania and updates readers on what it's like to depose one of the world's most litigious businessmen—and win.

the show called billions: Highest Stage Of The Development Of Capitalism In The United States And Its Effects On The American Family, Volume III, Book II, 1960 To 1980 Lionel D. Lyles, 2024-04-08 For 10,000 years before any European immigrants arrived on the North American Continent, Native American Indians engaged in a communal lifestyle. From 1600 to 1791, American Colonists established a thriving home production economy, and having ownership of their tools, or means of production, they produced everything they needed to survive. They were self-reliant, and the American Colonists sold their excess goods to merchants, who resold them for a profit. By 1791, the merchants were able to start the first textile factories as a result, which brought an abrupt end to the home production economy, and the beginning of American Capitalism. Former independent colonists were now forced into the textile factory, and the first wage contract appeared in America. The wage contract also set in motion a contradiction between the capitalist owners of the means of production and the new American Working Class. The wage contract allowed the owners of working class labor, and the instruments of production, to evolve into an American Ruling Class, and the producers of all commodities and wealth became the American Working Class People wage-workers class. Because of their divergent interests, the two classes formed a class contradiction, and the latter became known as the capitalist American Ruling Class Opposite and the American Working Class Opposite (People) wage-workers. This development occurred mainly in the northern factory economy, while in the South, uncompensated African Slave Labor was dominant, which was owned by an American Slaveholding Class. By 1860, the contradiction between the capitalist American Ruling Class Opposite owner of the wage labor system came into a head-on contradiction with uncompensated African Slave Labor, and a bloody Civil War was fought to determine which type of means of production would prevail and dominate during the 20th Century? The South was defeated,

and the wage contract system became nationalized. Therefore, throughout the twentieth Century, including the beginning of the new Millennium, the capitalist American Ruling Class Opposite expropriated the labor's product of the American Working Class Opposite (People) wage-workers, which resulted in this class accumulation of multiple-billions of dollars of Surplus-Value, and simultaneously this loss translated into the American Working Class Opposite (People) wage-workers' increasing alienation, estrangement, loss self-identity, self-expression, and freedom.
