world history textbook for sale: *The Material of World History* Tina Mai Chen, David S.

Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism, with the following guiding question in mind: given developments in the field of historical materialism concerned with the intersection of race, gender, labour, and class, why is it that within the field of World History, historical materialism has been marginalized, precisely as World History orients toward transnational socio-cultural phenomenon, micro-studies, or global histories of networks? Answering this question requires thinking, in an inter-related manner, about both the development of World History as a discipline, and the place of economic determinism in historical materialism. This book takes the position that historical materialism (as applied to the field of World History) needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism. At the same time, World History needs to be more self-critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural, social, and intellectual dimensions of global processes.

world history textbook for sale: Textbooks on Israel-Palestine Seyed Hadi Borhani, 2022-01-27 How is the Israel/Palestine question narrated in Western academia? What ideas dominate the key textbooks on the subject and what is presented as 'truth'? This book answers these critical questions. It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine. But academic support of Israel in the West has been a neglected issue, with Western academic knowledge being regarded as impartial and objective. This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel/Palestine question. Rather, knowledge has been biased, misleading, and dogmatic and Western college students are subscribing to 'factual histories' based on theories at best, if not

fiction. The book is the first empirical investigation able to document this partial reporting of history. Seyed Hadi Borhani examines the most popular college-level textbooks used to teach the history of the Israel/Palestine in Western universities, combining 'textbook analysis' (to determine how the dominant academic texts report the question) and a 'context analysis' (to identify who 'manufactures' the dominant knowledge). The book provides a historical map of how the Israel-Palestine conflict is understood in the West. The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much-needed intervention into the state of affairs in Western academia.
