the political process real life mod: The Democratic Public Sphere Christina Fiig, Jorn Loftager, Jan Lohmann Stephensen, Henrik Kaare Nielsen, Mads P. Sørensen, Thomas Olesen, 2016-08-01 Even in well-established democratic societies, the political system currently faces a crisis of civic engagement and participation. Increasingly, this lack of engagement and the accompanying erosion of institutional legitimacy result in antidemocratic, populist currents gaining ground. It is an important challenge for both the humanities and the social sciences to analyse this crisis and discuss possible answers that may contribute to strengthening the position of the democratic public sphere in the political process, thus emphasising the crucial role of civic engagement and participation in renewing democracy. The articles in this volume seek the sources for such democratic innovations in a variety of existing, less formalised practices and experiences in public space: in citizens' forums and other concrete arenas for democratic debate and participation in the media in general, including social media and other digital platforms; in social movements; and in artistic interventions in the

public sphere. The volume presents selected and edited papers and keynote lectures from the international research conference The Democratic Public Sphere - Current Challenges and Prospects, which was held at Aarhus University on November 5-7, 2015. It includes contributions by keynote speakers Mark E. Warren, Nick Couldry, Donatella della Porta, and Stephen Duncombe.

the political process real life mod: *Democracy in an Age of Corporate Colonization* Stanley A. Deetz, 1992-02-21 According to Deetz, our obsolete understanding of communication processes and power relations prevents us from seeing the corporate domination of public decision making. For most people issues of democracy, representation, freedom of speech, and censorship pertain to the State and its relationship to individuals and groups, and are linked to occasional political processes rather than everyday life decisions. This work reclaims the politics of personal identity and experience within the work environment as a first step to a democratic form of public decision-making appropriate to the modern context.

the political process real life mod: Vietnam's Political Process Casey Lucius, 2009-06-02 In a system that is known for its covert political style, Vietnam’s decision making process is often described as either consensus-based or simply confusing and inexplicable. This book provides an approach to understanding political decision making in Vietnam by recognizing enduring values that are derived from State-controlled education and official historical narratives. The nation’s official historical narrative has led to the development of protected values that are called upon during political decision making. In order to secure these values, such as regime stability, national independence, and social order, officials must act within accepted rules of appropriate political behavior. The book shows that through State-run education, mandatory defense training, and membership in mass organizations, Vietnamese citizens are taught social and political ethics, and their identity is moulded in concert with this process. Using textbooks and education to understand the underlying values within Vietnam’s society is used as the contextual framework for two case studies - the problem of landmines and the on-going threat of avian influenza - which examine how authorities frame problems, negotiate, and deal with potential crises. This book will be of great interest of academics and students within Asian studies, but also for policy makers involved with the country and those doing business in Vietnam, including non-governmental organizations, private businesses and charitable groups.

the political process real life mod: The New Middle Class and Democracy in Global Perspective R. Glassman, 1997-06-03 High technology capitalism utilizes computers, robots, and global information networks. It has engendered new classes - technocrats, bureaucrats, service and office workers - who will impact the structure and values of society. The question most central for us is that of the survival of democracy on this new base. Will the New Middle Class become the carrying class for a modern form of democracy utilizing the sophisticated communications technology, or will democracy decline under the weight of the managerial and technocratic strata essential to the functioning of the modern economic and political institutions?

the political process real life mod: *Nordic Paths to Modernity* Jóhann Páll Árnason, Björn Wittrock, 2012 Within the growing attention to the diverse forms and trajectories of modern societies, the Nordic countries are now widely seen as a distinctive and instructive case. While discussions have centred on the 'Nordic model' of the welfare state and its record of adaptation to the changing global environment of the late twentieth century, this volume's focus goes beyond these themes. The guiding principle here is that a long-term historical-sociological perspective is needed to make sense of the Nordic paths to modernity; of their significant but not complete convergence in patterns, which for some time were perceived as aspects of a model to be emulated in other settings; and of the specific features that still set the five countries in question (Denmark, Sweden, Norway, Finland and Iceland) apart from one another. The contributors explore

transformative processes, above all the change from an absolutistmilitary state to a democratic one with its welfarist phase, as well as the crucial experiences that will have significant implications on future developments.

the political process real life mod: Integrated Environmental Modelling to Solve Real World Problems A.T. Riddick, H. Kessler, J.R.A. Giles, 2017-01-10 The discipline of Integrated Environmental Modelling (IEM) has developed in order to solve complex environmental problems, for example understanding the impacts of climate change on the physical environment. IEM provides methods to fuse or link models together, this in turn requires facilities to make models discoverable and also to make the outputs of modelling easily visualized. The vision and challenges for IEM going forward are summarized by leading proponents. Several case studies describe the application of model fusion to a range of real-world problems including integrating groundwater and recharge models within the UK Environment Agency, and the development of 'catastrophe' models to predict better the impact of natural hazards. Communicating modelling results to end users who are often not specialist modellers is also an emerging area of research addressed within the volume. Also included are papers that highlight current developments of the technology platforms underpinning model fusion.

Popkewitz, Jennifer Diaz, Christopher Kirchgasler, 2017-01-20 Bringing together the sociology of knowledge, cultural studies, and post-foundational and historical approaches, this book asks what schooling does, and what are its limits and dangers. The focus is on how the systems of reason that govern schooling embody historically generated rules and standards about what is talked about, thought, and acted on; about the nature of children; about the practices and paradoxes of

educational reform. These systems of reason are examined to consider issues of power, the political, and social exclusion. The transnational perspectives interrelate historical and ethnographic studies of the modern school to explore how curriculum is translated through social and cognitive psychologies that make up the subjects of schooling, and how educational sciences act to order and divide what is deemed possible to think and do. The central argument is that taken-for-granted notions of educational change and research paradoxically produce differences that simultaneously include and exclude.

the political process real life mod: Democracy in Modern Iran Ali Mirsepassi, 2010-05-01 New perspectives on Iran's relationship to democracy Can Islamic societies embrace democracy? In Democracy in Modern Iran, Ali Mirsepassi maintains that it is possible, demonstrating that Islam is not inherently hostile to the idea of democracy. Rather, he provides new perspective on how such a political and social transformation could take place, arguing that the key to understanding the integration of Islam and democracy lies in concrete social institutions rather than pre-conceived ideas, the every day experiences rather than abstract theories. Mirsepassi, an Iranian native, provides a rare inside look into the country, offering a deep understanding of how Islamic countries like Iran and Iraq can and will embrace democracy. Democracy in Modern Iran challenges readers to think about Islam and democracy critically and in a far more nuanced way than is done in black-and-white dichotomies of Islam vs. Democracy, or Iran vs. the West. This essential volume contributes important insights to current discussions, creating a more complex conception of modernity in the Eastern world and, with it, Mirsepassi offers to a broad Western audience a more accurate, less clichéd vision of Iran’s political reality.
