the political process mods: Playing Utopia Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, 2019-11-07 Media narratives inform our ideas of the future – and Games are currently making a significant contribution to this medial reservoir. On the one hand, Games demonstrate a particular propensity for fantastic and futuristic scenarios. On the other hand, they often serve as an experimental field for the latest media technologies. However, while dystopias are part of the standard gaming repertoire, Games feature utopias much less frequently. Why? This anthology examines playful utopias from two perspectives. It investigates utopias in digital Games as well as utopias of the digital game; that is, the role of ludic elements in scenarios of the future.

the political process mods: Quadrophenia and Mod(ern) Culture Pamela Thurschwell, 2017-11-07 This collection explores the centrality of The Who's classic album, and Franc Roddam's cult classic film of adolescent life, Quadrophenia to the recent cultural history of Britain, to British subcultural studies, and to a continuing fascination with Mod style and culture. The interdisciplinary chapters collected here set the album and film amongst critical contexts including gender and sexuality studies, class analysis, and the film and album's urban geographies, seeing Quadrophenia as a transatlantic phenomenon and as a perennial adolescent story. Contributors view Quadrophenia through a variety of lenses, including the Who's history and reception, the 1970s English political and social landscape, the adolescent novel of development (the bildungsroman), the perception of the film through the eyes of Mods and Mod revivalists, 1970s socialist politics, punk, glam, sharp suits, scooters and the Brighton train, arguing for the continuing richness of Quadrophenia's depiction of the adolescent dilemma. The volume includes new interviews with Franc Roddam, director of Quadrophenia, and the photographer Ethan Russell, who took the photos for the album's famous photo booklet.

the political process mods: Voices of 1968 Salar Mohandesi, Bjarke Skærlund Risager, Laurence Cox, 2018-10-20 The year 1968 witnessed one of the great upheavals of the twentieth century, as social movements shook every continent. Across the Global North, people rebelled against post-war conformity and patriarchy, authoritarian education and factory work, imperialism and the Cold War. They took over workplaces and universities, created their own media, art and humour, and imagined another world. The legacy of 1968 lives on in many of today's struggles, yet it is often misunderstood and caricatured. *Voices of 1968* is a vivid collection of original texts from the movements of the long 1968. We hear these struggles in their own words, showing their creativity and diversity. We see feminism, black power, anti-war activism, armed struggle, indigenous movements, ecology, dissidence, counter-culture, trade unionism, radical education, lesbian and gay struggles, and more take the stage. Chapters cover France, Czechoslovakia, Northern Ireland, Britain, the USA, Canada, Italy, West Germany, Denmark, Mexico, Yugoslavia and Japan. Introductory essays frame the rich material - posters, speeches, manifestos, flyers, underground documents, images and more - to help readers explore the era's revolutionary voices and ideas and understand their enduring impact on society, culture and politics today.

the political process mods: Introducing Criminology Clive Coleman, Clive Norris, 2013-06-17 Criminology, or the study of crime, has developed rapidly as a subject in recent years, while crime and the problem of how to respond to it have become major concerns for society as a whole. This book provides a succinct, highly readable - and much needed - introduction to criminology for those who want to learn more, whether they are already studying the subject, thinking of doing so, or just interested to discover what criminology is about. *Introducing Criminology* begins by asking basic questions: what is crime? what is criminology?, before examining the ways in which crime has been studied, and looking at the main approaches and schools of thought within criminology and how these have been developed. The authors focus particularly upon attempts to understand and explain crime by the disciplines of psychology and sociology, and consider also the impact of feminist and postmodern thought on the development of the subject. In the second part of the book the authors take three very different topics to illustrate themes raised in the first half of the book, exploring the particular issues raised by each topic, and showing how criminologists have gone about their work.

the political process mods: Being Dragonborn Mike Piero, Marc A. Ouellette, 2021-07-09 The Elder Scrolls V: Skyrim is one of the bestselling and most influential video games of the past decade. From the return of world-threatening dragons to an ongoing civil war, the province of Skyrim is rich with adventure, lore, magic, history, and stunning vistas. Beyond its visual spectacle alone, Skyrim is an exemplary gameworld that reproduces out-of-game realities, controversies, and histories for its players. *Being Dragonborn*, then, comes to signify a host of ethical and ideological choices for the player, both inside and outside the gameworld. These essays show how playing Skyrim, in many ways, is akin to playing 21st century America with its various crises, conflicts, divisions, and inequalities. Topics covered include racial inequality and white supremacy, gender construction and misogyny, the politics of modding, rhetorics of gameplay, and narrative features.

the political process mods: Youth and Political Participation , 2007-01-01 Learning about politics and life as a citizen is part of the transition to adulthood. During this stage young people in most Western democracies are introduced to political processes and issues, as well as a range of political activities including voting and participation in social movements. But young people make this transition differently. The articles in this Book explore a range of ways that young people participate politically and also discuss those who are not 'active citizens'. The collection arose from a meeting of Australian experts in Youth Studies who came together to discuss and debate issues related to youth political participation. Collectively it provides a compendium of our current state of

knowledge about this topic. While specific attention is directed to young people's introduction to enrolment and voting, discussions include broader questions such as "what does it mean to be political?", and "what role do various social institutions play in the political learning process?" Articles include discussions of the legal requirements in Australia regarding enrolment and voting, whether there is such a thing as a "youth vote", and the social psychological dimensions of youth confidence in voting. Topics related to the role of the family, the school, the media and the internet are included. Other important issues, such as gender differences, youth disenchantment, and disadvantaged youth receive much needed attention.

the political process mods: *Who Guards the Guardians and How* Thomas C. Bruneau, Scott D. Tollefson, 2009-06-03 The continued spread of democracy into the twenty-first century has seen two-thirds of the almost two hundred independent countries of the world adopting this model. In these newer democracies, one of the biggest challenges has been to establish the proper balance between the civilian and military sectors. A fundamental question of power must be addressed—who guards the guardians and how? In this volume of essays, contributors associated with the Center for Civil-Military Relations in Monterey, California, offer firsthand observations about civil-military relations in a broad range of regions including Latin America, Africa, Asia, and Eastern Europe. Despite diversity among the consolidating democracies of the world, their civil-military problems and solutions are similar—soldiers and statesmen must achieve a deeper understanding of one another, and be motivated to interact in a mutually beneficial way. The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the use of force within a society, while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors. Although these essays address a wide variety of institutions and situations, they each stress a necessity for balance between democratic civilian control and military effectiveness.

the political process mods: *The Routledge Companion to Popular Music History and Heritage* Sarah Baker, Catherine Strong, Lauren Istvandy, Zelmari Cantillon, 2018-05-16 The Routledge Companion to Popular Music History and Heritage examines the social, cultural, political and economic value of popular music as history and heritage. Taking a cross-disciplinary approach, the volume explores the relationship between popular music and the past, and how interpretations of the changing nature of the past in post-industrial societies play out in the field of popular music. In-depth chapters cover key themes around historiography, heritage, memory and institutions, alongside case studies from around the world, including the UK, Australia, South Africa and India, exploring popular music's connection to culture both past and present. Wide-ranging in scope, the book is an excellent introduction for students and scholars working in musicology, ethnomusicology, popular music studies, critical heritage studies, cultural studies, memory studies and other related fields.

the political process mods: *Rockin' the Borders* Björn Horgby, Fredrik Nilsson, 2010-04-16 Rock music challenges hegemonic orders based on class, gender, nation, ethnicity/race or generation. This volume investigates how rock has played an integral part in the formation of identities and life-styles since the 1950's. Rock music is used as a wide concept, including different genres, e.g. rock 'n' roll, pop, punk, hip hop and blues. Unlike most other books on rock music, this volume focuses on how rock music becomes a part of everyday life and the formation of identities in a variety of European states such as England, Finland, Sweden and Wales, the USA, and also states that used to be on the other side of the Iron Curtain—such as GDR and Czechoslovakia. Thus, it includes a comparative perspective based on temporal as well as spatial aspects that further deepen the understanding of how rock music and society are intertwined. *Rockin' the Borders* is an

interdisciplinary volume; the authors represent a variety of backgrounds: History, Ethnology, Folklore, Sociology and Sociology of Music, thus presenting us with an interesting mix of theoretical perspectives and methods.

the political process mods: Fashion, Popular Culture and Political Economy Nirupama Singh Dar, 2025-03-21 This book delves into the intricate interplay of political, economic, and philosophic forces that have shaped popular culture, fashion, social movements and societies. Exploring the developments of the twentieth century and the transition into the new millennium, this work traces the causality between culture, fashion, philosophical discourses, and political economy. It analyzes political-economic and philosophical factors to demonstrate how fashion emerges as a pivotal force that guides and shapes post-modern democratic societies and market economies. The volume weaves together insights from sociology, cultural studies, feminist studies, fashion history, cinematography, media, the entertainment industry and social policy research. It examines how postmodern societies, shaped by post-structuralist critique and neo-liberal ideologies, navigates the complexities of democracy and market economies, evolving from deeply entrenched systems of colonialism and feudalism to achieve modernization and massive technological progress and reach a social reality of postmodernist paradigms. Topical and lucid, this invigorating work shows how fashion leads to social engineering. It will be of interest to scholars and researchers of fashion studies, popular culture, cultural studies, sociology, gender studies, political economy and political studies. This book also provides valuable perspectives for policymakers, film critics, women's rights groups, social policy researchers, film censor boards and journalists.

the political process mods: Social Movements and Protest Politics Greg Martin, 2023-12-22 This fully revised and updated edition of *Social Movements and Protest Politics* provides interdisciplinary perspectives on the sociology of protest movements. It considers major theories and concepts, which are presented in a clear, accessible, and engaging format. The second edition contains new chapters on methods and ethics of social movement research, and legal mobilisation, protest policing and criminal justice activism, including calls to abolish or defund police made at protests during the COVID-19 pandemic. This edition introduces readers to the concept of the 'post-protest society' wherein the right to protest is whittled away to near vanishing point, and authorities have considerable legal recourse to ban protests and render the tactics of protest movements ineffective. The book also looks at recent developments and novel social movements, including Black Lives Matter, Extinction Rebellion, Gilets Jaunes, #MeToo, and Hong Kong's Umbrella Movement, as well as the rise of contemporary forms of populism in democratic societies. The book presents specific chapters outlining the early origins of social movement studies and more recent theoretical and conceptual developments. It considers key ideas from resource mobilisation theory, the political process model, and new social movement approaches. It provides extensive commentary on the role of culture in social protest (including visual images, emotions, storytelling, music, and sport), religious movements, geography and struggles over space, media and movements, and global activism. Historical and contemporary case studies and examples from a variety of countries are provided throughout, including the American civil rights movement, Greenpeace, Pussy Riot, Indigenous peoples' movements, liberation theology, Indignados, Occupy, Tea Party, and Arab Spring. Each chapter also contains illustrations and boxed case studies to demonstrate the issues under discussion. *Social Movements and Protest Politics* will be an indispensable resource for undergraduate and postgraduate students in the social sciences and humanities wanting to be introduced to or extend their knowledge of the field. The book will also prove useful to university teachers and academic researchers, activists, and practitioners interested in the study of social, cultural, and political protest.

the political process mods: Military and Society in 21st Century Europe Jürgen Kuhlmann, Jean Callaghan, 2000 After the Cold War came to an end, European countries in both East and West faced the common question of how their military organizations and those of their neighbors would

respond to shifts in international relations affecting their economies, their perception of globalized threats, and cross-national security management. It is undisputed, for example, that in well-developed democratic societies, the challenge to the legitimacy of the military in society, the decreasing subjective apprehension of threat, and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards. This volume seeks, by empirically measuring social indicators, to assess the current state of civil-military relations in a number of countries in Eastern Europe (Bulgaria, Czech Republic, Hungary, Romania, Russia) as well as the state of relations in several of their Western European counterparts (France, Germany, Italy, the Netherlands). The country studies describe and analyze the differing positions of the military in their specific national settings.
