sand land walkthrough: *The Seventh at St. Andrews* Scott Gummer, 2007-10-04 An acclaimed Scottish golf course architect who had to go to America to make his name lands the most coveted commission in all of golf: to design the first new course in almost a century for the town of St. Andrews, the game's ancestral home. David McLay Kidd became a wunderkind golf course architect before he was thirty years old, thanks to his universally lauded design at Bandon Dunes on the Oregon coast. When the town of St. Andrews announced in 2001 that a new championship course was in the works—the town's first since 1914—Kidd fought off all comers and earned the right to make golf history. Author Scott Gummer was there to chronicle the days in the dirt and the nights in the pubs, the politics and histrionics, all with exclusive access to David Kidd, his team, and the St. Andrews Links Trust. Unfolding in arresting you-are-there scenes, *The Seventh at St. Andrews* follows the young master at work as Kidd, with his sharp tongue, leads his accomplices in transforming a plot of flat, uninspiring farmland—smack in the middle of which sits the town's sewage plant—into a rollicking golfing adventure and the most anticipated golf course opening in a generation. Murphy's Law seems to govern the process, however, as everything that can go wrong seemingly does: from epic wooly weather, to cattle grazing on the site, to vociferous opposition

among the townsfolk, to bureaucrats so stuck in their ways they cannot be budged even with one of Kidd's bulldozers. The story chronicles the decade-long journey from the first notion of a seventh course to its official opening. Kidd & Co. exceed everyone's expectations by building a magnificent throwback course that looks to have been shaped by the wind and rain and nature rather than modern machinery. The Seventh at St. Andrews brings the underappreciated art of golf course design to life, and along the way profiles an unforgettable cast of characters that includes Kidd's jovial father, a golf legend in his own right; Kidd's taciturn right-hand man; and the roustabout Scottish shaper, the Da Vinci in a 'dozer who is the heart of Kidd's crew.

sand land walkthrough: The Story of Prosecco Superiore Susan H. Gordon, 2024-02-15 Why is Prosecco so popular? In the United States, Prosecco is now a household word. Throughout the world, Prosecco bottles sell at twice the rate of Champagne's, even during a pandemic. Although the comparison with Champagne, the great sparkling wine of northern France often erroneously used as synonym of sparkling wine, is a common one, it is not immediately obvious why it should be. This story of Prosecco Superiore — sparkling Prosecco grown in two small hilly historic zones of the ancient Venetian Republic's interior lands — shows them as uniquely Italian sparkling wines, tracing them to those hills at the second half of the 19th century, time of uprisings that would oust Napoleon's France and the Habsburgs' Austria and lead to the creation of an Italian nation. Among the many who fought to make an Italy was a pharmaceutical student born four decades after the fall of Venice: local chemist, follower of ardent Italian insurgent Giuseppe Mazzini, Garibaldian soldier, winemaker, writer, inventor, cheerful and optimistic if informal politician Antonio Carpenè, founder of the oldest Prosecco winery and who created these wines' prototype a century before materials such as stainless steel would finally exist to make them possible. To tell the science and history of the making of Prosecco Superiore, its roots in Italian languages and cultures and in the lives and sounds of those hills of the Veneto's upper Marca Trevigiana long celebrated as sites of the top Prosecco vineyards, this book is written in a style that leads readers to unfamiliar places so that they might move richly and daringly through 150 years of Prosecco's landscape. The story moves through Carpenè's days and follows his work into the mid-20th century as modern Prosecco began its rise, then into the 21st as farmers and scientists work Prosecco Superiore's culture of hills and ingenuity into new blends of complexity, technology, and artisanship. Built on intensive and, as appropriate to wine, wide-ranging research, this story is both an imaginative and personal telling of the histories, methods, and places of Prosecco Superiore and a reader's guide to wonder and wandering, acts well suited to both the enjoyment and the effects of Italy's most important sparkling wines.

sand land walkthrough: Regional Cultures, Economies, and Creativity Ariella Luyn, Eduardo Fuente, 2019-11-26 Drawing on Australian and comparative case studies, this volume reconceptualises non-metropolitan creative economies through the 'qualities of place'. This book examines the agricultural and gastronomic cultures surrounding 'native' foods, coastal sculpture festivals, universities and regional communities, wine in regional Australia and Canada, the creative systems of the Hunter Valley, musicians in 'outback' settings, Fab Labs as alternatives to clusters, cinema and the cultivation of 'authentic' landscapes, and tensions between the 'representational' and 'non-representational' in the cultural economies of the Blue Mountains. What emerges is a picture of rural and regional places as more than the 'other' of metropolitan creative cities. Place itself is shown to embody affordances, unique institutional structures and the invisible threads that 'hold communities together'. If, in the wake of the publication of Florida's Rise of the Creative Class, creative industries models tended to emphasize 'big cities' and the spatial-cum-cultural imaginaries of the 'Global North', recent research and policy discourses – especially, in the Australian context – have paid greater attention to 'small cities', rural and remote creativity. This collection will be of interest to scholars, students and practitioners in creative industries, urban and regional studies, sociology, geography and cultural planning.

sand land walkthrough: *Nancy Holt* Alena J. Williams, Pamela M. Lee, 2015-07-21 Newly available in paperback, this landmark volume is the definitive study of the work of visionary American artist Nancy Holt (1938–2014). Since the late 1960s, Holt's wide-ranging production has included Land art—particularly the monumental Sun Tunnels (1973–76)—as well as significant projects in sculpture, installation, photography, film, and video. A comprehensive representation of Holt's working process in both word and image, Alena J. Williams's momentous publication illuminates the artist's interest in physical space and reveals how the geographic variety and boundlessness of the American landscape afforded her numerous opportunities to develop large-scale projects beyond the confines of New York City's gallery walls. Contributions by a distinguished group of writers—including Pamela M. Lee, Lucy R. Lippard, Ines Schaber, and Matthew Coolidge—chart Holt's fascinating trajectory from her initial experiments with sound, light, and industrial materials to major site interventions and environmental sculpture. James Meyer's valuable interview with Holt and Julia Alderson's illustrated chronology expand our knowledge of this groundbreaking artist and the crucial contexts in which she worked. More than twenty original writings by the artist and a rare selection of her concrete poetry, documentary photographs, and preparatory drawings reveal Holt's revolutionary concepts of space, time, optics, and scale.
