walkthrough la noire: *Narratives Crossing Boundaries* Joachim Friedmann, 2023-10-02 As the dominant narrative forms in the age of media convergence, films and games call for a transmedial perspective in narratology. Games allow a participatory reception of the story, bringing the transgression of the ontological boundary between the narrated world and the world of the recipient into focus. These diverse transgressions – medial and ontological – are the subject of this transdisciplinary compendium, which covers the subject in an interdisciplinary way from various perspectives: game studies and media studies, but also sociology and psychology, to take into account the great influence of storytelling on social discourses and human behavior.

walkthrough la noire: *Storyplaying* Sebastian Domsch, 2013-08-28 Incontestably, Future Narratives are most conspicuous in video games: they combine narrative with the major element of all games: agency. The persons who perceive these narratives are not simply readers or spectators

but active agents with a range of choices at their disposal that will influence the very narrative they are experiencing: they are players. The narratives thus created are realizations of the multiple possibilities contained in the present of any given gameplay situation. Surveying the latest trends in the field, the volume discusses the complex relationship of narrative and gameplay.
