who is abby walkthrough: Brotopia Emily Chang, 2019-03-05 Instant National Bestseller A PBS NewsHour-New York Times Book Club Pick Excellent. —San Francisco Chronicle Silicon Valley is a modern utopia where anyone can change the world. Unless you're a woman. It's time to break up the boys' club. Incisive, powerful, and a fierce rallying cry, Emily Chang shows us how to fix Silicon Valley's toxic culture--to bring down Brotopia, once and for all. Silicon Valley is not a fantasyland of unicorns, virtual reality rainbows, and 3D-printed lollipops for women in tech. Instead, it's a Brotopia, where men hold the cards and make the rules. While millions of dollars may seem to grow on trees in this land of innovation, tech's aggressive, misogynistic, work-at-all costs culture has shut women out of the greatest wealth creation in the history of the world. Brotopia reveals how Silicon Valley got so sexist despite its utopian ideals, why bro culture endures even as its companies claim the moral high ground, and how women are speaking out and fighting back. Drawing on her deep network of Silicon Valley insiders, Chang opens the boardroom doors of male-dominated venture capital firms like Kleiner Perkins, the subject of Ellen Pao's high-profile gender discrimination lawsuit, and Sequoia, where a partner once famously said they won't lower their standards just to hire women. Exposing the flawed logic in common excuses for why tech has long suffered the "pipeline" problem and invests in the delusion of meritocracy, Brotopia also shows

how bias coded into AI, internet troll culture, and the reliance on pattern recognition harms not just women in tech but us all, and at unprecedented scale.

who is abby walkthrough: *Locating Imagination in Popular Culture* Nicky van Es, Stijn Reijnders, Leonieke Bolderman, Abby Waysdorf, 2020-12-29 *Locating Imagination in Popular Culture* offers a multi-disciplinary account of the ways in which popular culture, tourism and notions of place intertwine in an environment characterized by ongoing processes of globalization, digitization and an increasingly ubiquitous nature of multi-media. Centred around the concept of imagination, the authors demonstrate how popular culture and media are becoming increasingly important in the ways in which places and localities are imagined, and how they also subsequently stimulate a desire to visit the actual places in which people's favourite stories are set. With examples drawn from around the globe, the book offers a unique study of the role of narratives conveyed through media in stimulating and reflecting desire in tourism. This book will have appeal in a wide variety of academic disciplines, ranging from media and cultural studies to fan- and tourism studies, cultural geography, literary studies and cultural sociology.

She finds the perfect New England Colonial with a magnificent English-style cottage garden. The only catch is that the house comes with the eighty-three year old owner, who will only sell the house if she can continue living in the guesthouse, rent free. At first, the arrangement seems simple enough, but nothing about the relationship between Dani and Clarissa Hamilton is simple because, long ago, the house became the most important part of Clarissa's life. Now that it is being turned into a business, she is not amused and finds ways to sabotage Dani's efforts to get The Maples up and running. The battle between the women is sometimes funny, sometimes painful. The wild card in the mix is Evan Murray, the landscape architect who is reworking the cottage garden. The threads of Clarissa's, Evan's, and Dani's lives become entangled as Evan and Clarissa come to terms with a past they didn't know they shared.

Ball, Kim Halskov, 2017-08-03 The scientific analysis of design thinking continues to burgeon and is of considerable interest to academic scholars and design practitioners across many disciplines. This research tradition has generated a growing corpus of studies concerning how designers think during the creation of innovative products, although less focus has been given to analysing how designers think when creating less tangible deliverables such as concepts and user-insights. *Analysing Design Thinking: Studies of Cross-Cultural Co-Creation* brings together 28 contributions from internationally-leading academics with a shared interest in design thinking who take a close look at professional designers working on a project that not only involves soft deliverables, but where a central role is played by co-creation across multiple, culturally diverse stakeholders. This collection of detailed, multi-method analyses gives a unique insight into how a Scandinavian design team tackled a specific design task within the automotive industry over a four-month design process. All papers draw upon a common, video-based dataset and report analyses that link together a diversity of academic disciplines including psychology, anthropology, linguistics, philosophy, architecture, management, engineering and design studies. The dataset affords multiple entry points into the analysis of design thinking, with the selected papers demonstrating the application of a wide range of analytic techniques that generate distinct yet complementary insights. Collectively these papers provide a coherent framework for analysing and interpreting design thinking 'in vivo' through video-based field studies.

who is abby walkthrough: The Ghost Lab Matthew Hongoltz-Hetling, 2025-05-20 A surprising and compelling journey into the business of paranormal investigation, and the state of scientific literacy in America. In 2010, a sleepy small-town business plaza in rural New Hampshire rented space to an unusual tenant: a ghost laboratory. The Kitt Research Initiative's mission was to use the scientific method to document the existence of spirits. Founder Andy Kitt was known as a straight-shooter; and was unafraid — perhaps eager — to offend other paranormal investigators by exposing the fraudulence of their less advanced techniques. Kitt's efforts attracted flocks of psychics, alien abductees, witches, mediums, ghost hunters, UFOlogists, cryptozoologists and warlocks from all over New England, and the world. And there were plenty of them around. The Ghost Lab tells the astonishing story of the wild ecosystem of paranormal profiteers and consumers. But it also reveals how the twin scourges of declining scientific literacy and eroding trust in institutions have created space for armies of pseudoscientists to step into the minds of an increasingly credulous public. With his distinct voice, eye for a story and ability to show how one community's experience reflects that of a society, Matt Hongoltz-Hetling crafts a powerful narrative about just how fragmented our understanding of what is real--and what is not--has become.
