mr coffee manuals: Eyetracking Web Usability Jakob Nielsen, Kara Pernice, 2010-04-26 Eyetracking Web Usability is based on one of the largest studies of eyetracking usability in existence. Best-selling author Jakob Nielsen and coauthor Kara Pernice used rigorous usability methodology and eyetracking technology to analyze 1.5 million instances where users look at Web sites to understand how the human eyes interact with design. Their findings will help designers, software developers, writers, editors, product managers, and advertisers understand what people see or don't see, when they look, and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye gaze plots and heat maps, Nielsen and Pernice guide the reader through hundreds of examples of eye movements, demonstrating why some designs work and others don't. They also provide valuable advice for page layout, navigation menus, site elements, image selection, and advertising. This book is essential reading for anyone who is serious about doing business on the Web.

Crais knows how to press all the right buttons in keeping the story line taut and the action, well, explosive."—San Francisco Chronicle Carol Starkey is struggling to pick up the pieces of her former life as L.A.'s finest bomb squad technician. Fueled with liberal doses of alcohol and Tagamet, she's doing time as a Detective-2 with LAPD's Criminal Conspiracy Section. Three years have passed since the event that still haunts her: a detonation that killed her partner and lover, scarred her body and soul, and ended her career as a bomb tech. When a seemingly innocuous bomb call explodes into a charred murder scene, Carol catches the case and embarks on an investigation of a series of explosions that reveal chilling intentions. The bombs are designed expressly to kill bomb technicians. Now, as the one tech who survived the deadliest of blasts, Carol is in for the most perilous fight of her life. . . . Praise for Demolition Angel "Terrific . . . explosive . . . [a] high powered thrill ride."—The Wall Street Journal "Gripping . . . Crais piles on plot twists . . . gathering the separate threads at the end and igniting them like a string of fireworks."—People "A powerful, self-contained novel of suspense that has the compactness, velocity, and effectiveness of a well-aimed bullet . . . This is a thriller that works on every level, a pivotal work from a crime novelist operating at the top of his game."—Los Angeles Times "Fascinating and frighteningly believable . . . Starkey is one of the toughest characters to grace the crowded field of thriller books in a long time."—USA Today "A flammable techno-thriller with the kind of force that knocks out windows."—The New York Times Book Review Packs an explosive punch. Though the pace of the book moves like a quick-burning fuse, Crais still takes the time in Demolition Angel to sketch out some memorable characters: Starkey, haunted and hollow-eyed, covering up her pain with a Bogart-tough demeanor; and John Michael Fowles (aka Mr. Red), a sociopath who gets all sorts of information from the Internet without breaking a sweat. . . . Crais keeps things wound so tight that readers will be getting paper cuts in their rush to finish this one."—The Denver Post
