#### **spanish 4 textbooks: The British Book Trade and Spanish American Independence**

Eugenia Roldán Vera, 2017-03-02 The British Book Trade and Spanish American Independence is a pioneering study of the export of books from Britain to early-independent Spanish America, which considers all phases of production, distribution, reading, and re-writing of British books in the region, and explores the role that these works played in the formation of national identities in the new countries. Analysing in particular the publishing house of Rudolph Ackermann, which dominated the export of British books in Spanish to the former colonies in the 1820s, it discusses the ways in which the printed form of these publications affected the knowledge conveyed by them. After a survey of the peculiar characteristics of print culture in early-independent Spanish America and the trends in the import of European books in the region, the author examines the operation of Ackermann's publishing enterprise. She shows how the collaborative nature of this enterprise, involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators, shaped the characteristics of its publications, and how the notion of 'useful knowledge' conveyed by them was deployed in the service of both commercial and educational concerns. The hitherto unexplored mechanisms of book import, distribution, wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution. The author examines how the question-and-answer form of Ackermann's textbooks constrained both publishers and writers and oriented their readers' relation with the texts. She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual, social, national, and continental identities; this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann's textbooks during the nineteenth century.

#### **spanish 4 textbooks: Community Service-Learning for Spanish Heritage Learners**

Kelly Lowther Pereira, 2018-12-15 This book proposes community service-learning as a critical pedagogy that connects learners and communities to address key challenges in heritage language education. The book's purpose is two-fold: to fill a crucial gap in empirical research on community service-learning in the heritage language context, as well as to provide language educators and practitioners essential guidelines for designing community service-learning courses, with particular

attention paid to the characteristics and needs of Spanish heritage language learners. This book presents compelling evidence demonstrating the central role community service-learning plays in developing heritage language learners' identities, connections to the heritage language community, language attitudes, and social, cultural, and sociolinguistic awareness. Importantly, this book also addresses the often-overlooked perspectives of community partners and liaisons. As the first original research monograph on community service-learning for Spanish heritage language learners, this pioneering book will undoubtedly aid students, instructors and administrators across all levels of language education.

**spanish 4 textbooks:** *Constructions in Spanish* Inga Hennecke, Evelyn Wiesinger, 2023-07-15 *Constructions in Spanish* is the first book-length English-language volume in the field of usage-based and Cognitive Construction Grammar dedicated exclusively to Spanish. The contributions investigate a wide range of constructions from both a synchronic and a diachronic perspective, cutting across morphology, syntax, semantics and pragmatics. The constructionist perspective is also linked to comparative and typological research, to language learning and teaching and to multi-modal discourse analysis. The volume aims both at increasing the visibility of constructionist approaches to Spanish, and at offering data and analyses of Spanish for scholars working on constructional analyses of other languages. The volume thus addresses both scholars in Spanish and Romance linguistics, as it builds connections between more traditional approaches and constructionist approaches, and construction grammarians generally, especially scholars interested in comparative work.

**spanish 4 textbooks:** *Textbook English* Elen Le Foll, 2024-07-15 This book provides a

systematic, empirical account of the language typically presented in English as a Foreign Language (EFL) textbooks, based on a large corpus of EFL textbooks used in secondary schools. A modified version of the Multi-Dimensional Analysis (MDA) framework serves to examine linguistic variation both within textbooks and compared to corpora representing 'real-life' English as used outside the EFL classroom. The results highlight the characteristics of Textbook English that define it as a distinct variety of English. In light of the study's pedagogical implications, this book proposes a range of corpus-based approaches to improve the naturalness of textbook texts. It also contributes to advancing quantitative corpus linguistics methodology: its detailed online supplements aim for methodological transparency and reproducibility in line with the principles of Open Science. This book will be of interest to linguistics and language education students and researchers, as well as EFL teachers, textbook authors and editors, and those involved in curriculum development and teacher training.

**spanish 4 textbooks:** *Current Perspectives in Spanish Lexical Development* Irene Checa-García, Laura Marqués-Pascual, 2023-10-04 New quantitative methodology and the development of corpus and experimental linguistics tools have recently made researching lexical comprehension and production more accessible. While several tools and data sets are available in English (Coh-metrix, CELEX) and a few other languages, the development of resources and empirical research is still lacking in Spanish. This volume brings together original empirical research and theoretical perspectives that examine lexical development in Spanish L1, L2 and L3, with a focus on different teaching approaches and textbook coverage of Spanish lexicon in L2 curricula and the use of corpus linguistics in methodological investigations. Some questions addressed include the role of lexical development in mapping grammatical acquisition phases, the potential transfers of L1 to L2 lexical abilities, the effect of explicit vocabulary learning techniques in L2, how affective meaning modulates L2 acquisition, or how a typological understanding of lexical organization can help in teaching more effectively the lexicon of a language, among many others. The book offers an overview of what is currently being done in the field of Spanish lexical acquisition through a myriad of approaches and topics.
