spanish textbooks for beginners pdf: Textbook English Elen Le Foll, 2024-07-15 This book provides a systematic, empirical account of the language typically presented in English as a Foreign Language (EFL) textbooks, based on a large corpus of EFL textbooks used in secondary schools. A modified version of the Multi-Dimensional Analysis (MDA) framework serves to examine linguistic variation both within textbooks and compared to corpora representing 'real-life' English as used outside the EFL classroom. The results highlight the characteristics of Textbook English that define it as a distinct variety of English. In light of the study's pedagogical implications, this book proposes a range of corpus-based approaches to improve the naturalness of textbook texts. It also contributes to advancing quantitative corpus linguistics methodology: its detailed online supplements aim for methodological transparency and reproducibility in line with the principles of Open Science. This book will be of interest to linguistics and language education students and researchers, as well as EFL teachers, textbook authors and editors, and those involved in curriculum development and teacher training.

spanish textbooks for beginners pdf: *Lexicon Exploration in English and Spanish Learners* Rosa María Jiménez Catalán, 2025-09-26 This book delves into psycholinguistic and cognitive aspects of lexical activation, availability, and production in English or Spanish as additional languages in classroom settings. Instead of focusing sociologically and pedagogically on lexical availability, this collective work adopts a cognitive approach. Ten studies, conducted by experienced researchers, employ a uniform methodology based on lexical availability tests in classroom contexts. Notably, each study permits learners to produce as many responses as possible within two minutes, revealing common associations and network patterns in lexical production. The book is innovative not only in providing cognitive data from Spanish learners of English, but also from Greek, Polish, and North American learners of Spanish, expanding the scope beyond traditional research on word associations. While acknowledging the pioneering work in word associations among French and

English learners, this book distinguishes itself by using lexical availability tests to explore word associations and networks in the mental lexicon of English or Spanish learners in classroom contexts. Notably, it offers lexical data from children and adolescents learning English in primary or secondary schools, as well as Spanish learners in high school and university settings, filling a gap in research on younger learners and languages other than English. The book addresses the need for empirical data on the mental lexicon of English or Spanish learners, particularly in primary or secondary classrooms, a scarcely investigated educational context.

spanish textbooks for beginners pdf: *Health Research Practices in a Digital Context* Laurent Morillon, 2020-12-03 The current “generalized digitization” of society is influencing the health environment, healthcare organizations as well as actors. In this context, human and social sciences deconstruct, nuance and sometimes even challenge certain preconceived ideas and/or dominant discourses. In this book, researchers of four nationalities and three different disciplines have agreed to open the “black box” of their work. They display their scientific practices from the perspective of epistemology, ethics and methodology. They present and analyze their values and postulates but, also, what may have influenced the project, the definition of the object and objectives, as well as their approaches. In a contextual way, the first part presents some changes in environments and infocommunicational practices related to digital health. The second part opens space to reflect on ethics and deontology. Finally, postulating that scientific fact is not an essence but the result of a process, the last part discusses the methods implemented, which may be different from those initially envisaged. This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them.

spanish textbooks for beginners pdf: *A Critical Auto/Ethnography of Learning Spanish* Phiona Stanley, 2016-11-10 The premise that intercultural contact produces intercultural competence underpins much rationalization of backpacker tourism and in-country language education. However, if insufficiently problematized, pre-existing constructions of cultural 'otherness' may hinder intercultural competence development. This is nowhere truer than in contexts in which wide disparities of power, wealth, and privilege exist, and where such positionings may go unproblematized. This study contributes to theoretical understandings of how intercultural competence develops through intercultural contact situations through a detailed, multiple case study of three conceptually comparable contexts in which Western backpackers study Spanish in Latin America. This experience, often 'bundled' with home-stay, volunteer work, social, and tourist experiences, offers a rich set of empirical data within which to understand the nature of intercultural competence and the processes through which it may be developed. Models of a single, context-free, transferable intercultural competence are rejected. Instead, suggestions are made as to how educators might help prepare intercultural sojourners by scaffolding their intercultural reflections and problematizing their own intersectional identities and their assumptions. The study is a critical ethnography with elements of autoethnographic reflection. The book therefore also contributes to development of this qualitative research methodology and provides an empirical example of its application.

Adopting a strongly comparative focus, the authors argue for greater public visibility and more nuanced discussion of the Civil War's legacy, positing a virtual museum as one means to foster dialogue.
