acc textbooks: *The Tamil Auxiliary Verb System* Sanford B. Steever, 2020-04-02 This book introduces the syntactic process of auxiliary formation and applies it to the grammatical analysis of the indicative, or non-modal, auxiliary verbs of Modern Tamil. Using data from spoken and written registers gathered over several years, the book demonstrates for the first time the systematic nature of auxiliary verb phenomena, and how they are integrated into the grammar of the language. Including fresh information on new verb constructions, verbal categories and tenses, this book will be a welcome addition to the current general linguistics literature, in particular the study of verbal categories and the morphosyntactic processes that instantiate them.

acc textbooks: *New Perspectives in Greek Linguistics* Nikolaos Lavidas, Elissavet Nouchoutidou, Marietta Sionti, 2020-10-27 *New Perspectives in Greek Linguistics* is a selection of papers presenting some of the ongoing research in Greek Linguistics. The contributions in this volume, which have their origin in the 4th Athens Postgraduate Conference in Linguistics, refer to various theoretical frameworks and cover a wide range of topics (from phonology of dialects to acquisition of syntax); however, they share the common reference to Greek and Theoretical Linguistics. The second common feature is a tendency to investigate already known problems using new methods, considering different factors from previous research or introducing innovative ideas. The volume is dedicated to Professor Gaberell Drachman and Professor Angeliki Malikouti-Drachman as a small token of gratitude for their ceaseless presence and their contribution to Theoretical Linguistics, to Greek Linguistics and to postgraduate studies in Linguistics in Greece. This volume is of particular interest to linguists working on various areas of Greek Linguistics, especially those who would like to keep up with ongoing research. It presents an opportunity to see the application of linguistic theory in Greek and the current comparative research.

acc textbooks: **Balkan Syntax and Semantics** Olga Mišeska Tomić, 2004-01-01 The book deals with some syntactic and semantic aspects of the shared Balkan Sprachbund properties. In a comprehensive introductory chapter, Tomić offers an overview of the Balkan Sprachbund properties. Sobolev, displaying the areal distribution of 65 properties, argues for dialect cartography. Friedman, on the example of the evidentials, argues for typologically informed areal explanation of the Balkan properties. The other contributions analyze specific phenomena: polidefinite DPs in Greek and Aromanian (Campos and Stavrou), Balkan constructions in which datives combine with impersonal clitics or non-active morphology (Rivero), Balkan optatives (Ammann and Auwera), imperative force in the Balkan languages (Isac and Jakab), clitic placement in Greek imperatives (Bošković), focused constituents in Romanian and Bulgarian (Hill), synthetic and analytic tenses in Romanian (D'Hulst, Coene and Avram), purpose-like modification in a number of Balkan languages (Bujarowska), Balkan modal existential [wh]-constructions (Grosu), child and adult strategies in interpreting empty subjects in Serbian/Croatian (Stojanović and Marelj), conditional sentences in Judeo-Spanish (Montoliu and Auwera).

acc textbooks: **Instructed Second Language Acquisition of Arabic** Mahmoud Azaz, 2023-07-26 *Instructed Second Language Acquisition of Arabic* examines the acquisition of agreement asymmetries in the grammatical system of Arabic as a second/foreign language through the lens of instructed second language acquisition. The book explores how to improve the processes of L2 learning of Arabic using evidence-based classroom research. Before it does this, it characterizes the variable challenges that English L2 learners of Arabic face when they acquire four structural cases in Arabic grammar that entail agreement asymmetries. Using the pretest-posttest design, it examines the effects of four classroom interventions using quantitative and qualitative measures. In these interventions, form-based and meaning-based measures were used to reveal to

what degree learners have developed explicit and implicit knowledge of these aspects of asymmetry. In the concluding chapter, the book provides focused and specific implications based on the results of the four studies. It provides theoretical implications that enrich the discussions of instructed second language Acquisition in Arabic and other languages more broadly. It also provides implications for teachers, curriculum designers, and textbook writers of Arabic. This book will be informative for Arabic applied linguists, researchers of Arabic SLA, Arabic instructors (at the K-12 and the college level), and Arabic program directors and coordinators. The book will also appeal to all SLA and ISLA researchers.

acc textbooks: *Teaching a Dark Chapter* Daniela R. P. Weiner, 2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist/Nazi past in Italy, East Germany, and West Germany followed relatively calm, undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation. Though these flashpoints varied among Italy and the Germanys, they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented. Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture. But as Teaching a Dark Chapter demonstrates, textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook. Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory, Daniela R. P. Weiner reveals how, long before 1968, textbooks in these three countries served as important tools to influence public memory about Nazi/Fascist atrocities. As Fascism had been spread through education, then education must play a key role in undoing the damage. Thus, to repair and shape postwar societies, textbooks became an avenue to inculcate youths with desirable democratic and socialist values. Teaching a Dark Chapter weds the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created, what they said, and how they affected the society around them.

As research in language leads to extensive changes in our understanding and representations of grammar, the Comprehensive Grammar Resources series intends to present the most current understanding of grammar and syntax as completely as possible in a way that will both speak to modern linguists and serve as a resource for the non-specialist.

acc textbooks: *Major Trends in Theoretical and Applied Linguistics 2* Nikolaos Lavidas, Thomai Alexiou, Areti Maria Sougari, 2014-01-31 In the three volumes of *Major Trends in Theoretical and Applied Linguistics*, the editors guide the reader through a well-selected compendium of works, presenting a fresh look at contemporary linguistics. Aimed at specialists or anyone interested in languages, this publication deals with both theoretical issues and applied linguistics, looking closely at discourse analysis, gender and lexicography, language acquisition and language disorders.

acc textbooks: *Vision beyond Visual Perception* Borko Kovačević, Ian Richards, Junichi Toyota, 2017-05-11 Vision is crucial for the survival of all animals. However, as this book shows, its importance does not simply lie in visual perception, but is, rather, deeply rooted in human physiology, psychology and culture. For instance, conceptual metaphors often involve vision, such as "Seeing is Touching" and "Eyes are Limbs", among others. However, this Anglo-centric linguistic view belies the fact that vision is not a universally-preferred source for metaphor, and less studied languages spoken in the four corners of the world can present cases that are unfamiliar to those who are only acquainted with Indo-European languages and cultures. In fact, other types of perception such as hearing are often preferred as a source of comprehension in a number of languages. This volume studies various issues concerning vision both synchronically and diachronically. Its discussion involves specialists from different disciplines, ranging from cognitive science to literary scholarship. It also covers a wide range of geographical regions, such as Africa and Asia. As such, this volume will serve to shed light on the integration of disciplines concerning vision.

acc textbooks: *Languages Across Boundaries* Dik Bakker, Martin Haspelmath, 2013-09-03 This book is dedicated to Anna Siewierska, who died, far too young, in 2011. It contains 15 contributions by 20 linguists who may be counted among the foremost scholars in the field of linguistic typology. All of these articles discuss a topic that is prominent in Anna's work, whose journal articles and monographs on the passive, on word order, and on the category of person are standard literature in these respective fields. Mindful of Anna's last monograph, *Person*, the majority of the contributions in this volume discuss free and bound person forms, argument indexing, reference tracking systems, impersonals, and related issues, such as suppletion and incompleteness in person paradigms, the origin of referential systems, dependent versus independent marking, and referential hierarchies. Other topics are grammatical alignment, grammatical voice, ditransitives, and word order. Most of the contributions take a broad, typological perspective. Others give a more in depth treatment, based on data from a specific language, notably Spanish, Russian, Mandinka, and Mohawk. The book contains a complete bibliography of Anna Siewierska's linguistic production.

acc textbooks: Grammatical theory : From transformational grammar to constraint-based approaches Stefan Müller, 2023-01-04 This book introduces formal grammar theories that play a role in current linguistic theorizing (Phrase Structure Grammar, Transformational Grammar/Government & Binding, Generalized Phrase Structure Grammar, Lexical Functional Grammar, Categorical Grammar, Head-Driven Phrase Structure Grammar, Construction Grammar, Tree Adjoining Grammar). The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts, the active/passive alternation, local reorderings, verb placement, and fronting of constituents over long distances. The analyses are explained with German as the object language. The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility. The nativism hypothesis, which assumes that humans possess genetically determined innate language-specific knowledge, is critically examined and alternative models of language acquisition are discussed. The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate, the question whether constructions should be treated on the phrasal or the lexical level, and the question whether abstract, non-visible entities should play a role in syntactic analyses. It is shown that the analyses suggested in the respective frameworks are often translatable into each other. The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured.

acc textbooks: *Korean Syntax and Semantics* EunHee Lee, 2019-01-10 Explores the Korean language from both a syntactic and semantic perspective, combining mainstream ideas from minimalist syntax and formal semantics.
